Announcement concerning Disparity between Forecast and Actual Figures for Fiscal Year 2013 (February 1, 2013 – December 31, 2013)

Please be informed of the following disparity between SUMCO Corporation's forecast of consolidation business results for fiscal year 2013 announced on December 6, 2013 and the actual consolidated business results announced today.

1. Disparity between forecast and actual figures for fiscal year 2013

(February 1, 2013 – December 31, 2013)

	Net sales (millions of yen)	Operating income (millions of yen)	Ordinary income (millions of yen)	Net income (millions of yen)	Net income per share (yen)
Previous forecast (A)	183,000	17,000	6,000	500	△2.05
Actual Figures (B)	185,105	17,801	7,065	715	△1.22
Amount of change (B-A)	2,105	801	1,065	215	
Rate of change (%)	1.2	4.7	17.8	43.0	
(Reference) Results for FY2012 (February 1, 2013 – December 31, 2013)	206,691	13,215	9,464	3,426	8.93

2. Reasons for disparity

During FY2013, the market for silicon wafers for semiconductors was impacted as demand for smartphones shifted sharply from high-end products to low-end products in the second half of the year. Reflecting this change in demand structure, foundries adjusted their output. However, the adjustment period was shorter than initially expected as demand for low-end products grew at an accelerated pace, and SUMCO Group's net sales slightly exceeded previous forecasts.

As a result, operating income, ordinary income and net income also exceeded previous forecasts.
