Inquiries: Naokazu Hasegawa, Corporate Officer
and General Manager of Corporate Communication Department

Approach to Reducing the Minimum Investment and Associated Basic Policy

1. Approach to reducing the minimum investment

DyDo Group Holdings believes that it is important to put in place an environment in which it is easy for individual investors to invest in the company. In addition, we recognize that reducing the minimum investment (i.e., the total cost of the smallest number of shares that can be purchased by investors) is an effective way to increase share liquidity while opening up the possibility of investing in the company to a larger cross-section of investors.

2. Basic policy on reducing the minimum investment

DyDo Group Holdings will carefully study potential reductions in the minimum investment based on a comprehensive consideration of factors such as stock market trends, changes in shareholder makeup and purchase volume, and cost-effectiveness.

*This press release constitutes a disclosure in accordance with Article 409 of the Tokyo Stock Exchange's Securities Listing Regulations (concerning disclosure of reductions in the minimum investment), which applies to the Company since its minimum investment as of January 20, 2017, was valued at 500,000 yen or greater.
