2. Rationale for Acquisition

SLR invests primarily in the SOSiLA series of logistics properties developed by Sumitomo Corporation with the aim of connecting "people" and "society." In addition, SLR continuously works to acquire logistics properties and industrial properties other than the SOSiLA series by using the original route of SRM for the purpose of diversifying and enhancing its portfolio and has launched the "LiCS" brand for these properties.

The Property to Be Acquired will be the first industrial property under the "LiCS" brand. As a plant that manufactures custom truck bodies for major transport companies supporting Japan's logistics sector, the Property to Be Acquired is very profitable and rare. SRM decided to acquire it on the basis that it is a property that will allow SLR to achieve further diversification and enhancement of its portfolio. For the features of the Property to Be Acquired, please refer to "3. Overview of the Property to Be Acquired" below.
