Notice of Large Orders Received

Seibu Giken Co., Ltd. (“Sebu Giken”) is pleased to announce that we have received two separate large orders for a lithium-ion battery manufacturing plants for electric vehicles (EV), as follows:

1. Background of the Orders

Seibu Giken has been engaged in the worldwide business of manufacturing and selling equipment and devices that are essential for the production process of lithium-ion batteries for EV. We have received two new orders due to our proven track record.

2. Order Details

(1) Domestic order

Customers	Japanese engineering service company
Amount of order received	Approx. JPY0.5 bn
Details of order received	Low dew point desiccant dehumidifiers for major Japanese automakers
Expected delivery	Q4 2024 – Q1 2025

(2) Overseas order

Customers	U.S. general contractor
Amount of order received	Approx. JPY2.0 bn
Details of order received	Low dew point desiccant dehumidifiers for major U.S. EV automakers
Expected delivery	Q2 2024

Please note that we are unable to disclose the customer’s name, site name, the number of units sold, and other specific details of the new order recipients and end-users from the viewpoint of protecting trade secrets to the recipients and end-users. In addition, there are no capital, personal, or business relationships that should be disclosed between Seibu Giken and the order recipients. In addition, neither of them is our related parties.

3. Impact on Financial Results

The above orders have no impact on the Seibu Giken’s financial results for the year ended December 31, 2023. Sales are expected to be recorded in the fiscal years ending December 31, 2024 and 2025.

Appendix

1. About Seibu Giken

With our Purpose " Provide green air solutions for every environment," Seibu Giken develops, manufactures the desiccant dehumidifiers and VOC concentrators, etc., sells these products in more than 50 countries worldwide and provides services including installation and maintenance.

2. About the Desiccant Dehumidifier

It is a device for dehumidifying air by absorbing moisture inside the honeycomb rotor using an adsorbent such as silica gel or zeolite. Since there is no need to cool the air, it is possible to dehumidify efficiently even in a low-temperature environment of 15°C or less or in a low dew point environment. In addition to food and pharmaceutical factories that require humidity control, in recent

years it has been adopted in the production process for lithium-ion batteries, which require an ultra-low dew point environment.

3. Backlog History

(Thousands of yen)	As of December 31, 2022	・・・	As of September 30, 2023
Desiccant dehumidifier	5,258,091	・・・	8,007,592
VOC concentrator	3,472,776	・・・	4,873,032
Others	947,251	・・・	871,952
Total	9,678,118	・・・	13,752,576
