Comprehensive Management Support for Medical Corporation Hiroyoshikai, by Frontier Capital Inc.

Frontier Capital Inc. (Head Office: Roppongi, Minato-ku, Tokyo; Representative Director: Shoichiro Onishi; hereinafter referred to as "FCI"), a consolidated subsidiary of Frontier Management Inc. (Head Office: Roppongi, Minato-ku, Tokyo; Representative Director: Shoichiro Onishi), will provide comprehensive management support including operation support (hereinafter referred to as "management support, etc.") to Medical Corporation Hiroyoshikai (Head Office: Ryugasaki, Ibaraki Prefecture; President: Hiroki Onose; hereinafter referred to as " Hiroyoshikai "), so we will inform you as follows.

In recent years, with the growing awareness of the oral environment in preventive medical care, periodontal disease treatment, cosmetic dentistry, etc., the importance of the dental field has been increasing for the financial aspect of medical care and for extending healthy life expectancy. Under such circumstances, Hiroyoshikai was founded in 1918 in Ryukesaki City, Ibaraki Prefecture, and has built up a track record and trust in dental care in the community for more than 100 years. Currently, Hiroyoshikai operates two dental clinics, Onose Dental Clinic (4248-1 Kamimachi, Ryukesaki-shi, Ibaraki) and Shinjuku Oak Tower Dental Clinic (Sumitomo Fudosan Shinjuku Oak Tower A-203, 6-8-1 Nishi-Shinjuku, Shinjuku-ku, Tokyo). Under the leadership of Hiroki Onose, President of ICOI (International Society of Oral Implantology), who is a leader in the Japanese dental industry, Hiroyoshikai provides "painless, as little grinding as possible, and no extraction" dental treatment with advanced digital technology based on the concept of quickness and quality. Both clinics boast a high level of satisfaction.

FCI will utilize the know-how accumulated over many years by the Frontier Management Group in providing consulting services, including management support, to the healthcare industry to promote the sustainable development of Hiroyoshikai and further improvement of services for patients. Furthermore, FCI will contribute to the development of the dental medical industry as a whole.

The concept of FCI is to contribute to the revitalization of local economies by providing support for resolving management issues from a long-term perspective, by investing people, know-how, and money to various entities with management issues, not limited to specific industries, areas, and industries. In the medical industry, where many small and medium-sized corporations and individuals are managed, there is a lot of room for improvement through management support, etc., FCI will continue to actively consider providing management support and other services to many medical-related corporations in the future, with the aim of supporting business succession needs and maintaining and improving sustainable local medical care.

FCI differs from conventional PE funds in that it focuses on long-term, sustainable growth from a managerial perspective through a variety of management support methods and teamwork of internal human resources. In response to the management issues faced by business support providers, each company in the Frontier Management Group will work together to provide management improvement know-how, abundant management personnel, and various networks to support long-term and continuous value enhancement.
