Announcement of Inclusion in the Amplify Transformational Data Sharing ETF (BLOK)

Metaplanet Inc. is pleased to announce its inclusion in the Amplify Transformational Data Sharing ETF ("BLOK"), a globally recognized index comprising 53 leading companies engaged in the development and utilization of blockchain technology. The ETF features prominent names such as MicroStrategy, Robinhood, Nvidia, and SBI Holdings.

Managed by Amplify ETFs, BLOK leverages an actively managed strategy to identify and invest in companies pioneering the use and advancement of blockchain technology. Its focus on flexibility and market responsiveness makes it a key instrument for investors looking to capture value in this dynamic sector. With net assets exceeding $930 million, BLOK is a widely followed ETF in the blockchain investment landscape.

Metaplanet's estimated starting weight in BLOK is approximately 2.9%. This inclusion reflects increasing investor interest in Metaplanet as Japan's leading Bitcoin Treasury Company and highlights its disciplined approach to Bitcoin accumulation.

For further details on BLOK, visit the Amplify ETFs website: https://amplifyetfs.com/blok/.
