Announcement of the release of integrated report "RAKSUL Value Creation Report 2024"

We are delighted to announce the release of our integrated report, "RAKSUL Value Creation Report 2024"

Since our foundation, under the vision of "BETTER SYSTEMS, BETTER WORLD," we aim to change the world by reinventing traditional industry structures with the power of the Internet. In RAKSUL Value Creation Report 2024, we are strengthening and improving our disclosure based on stakeholder feedback and suggestions from our day-to-day engagement activities to provide an organized presentation of financial and non-financial information about our efforts to realize our vision.

In the Integrated Report 2024, under the leadership of the new management team, we have worked to deepen the understanding of what we will "keep" and what we will "change" in the future, as well as to enhance the content of the report with regard to specific initiatives in human capital, environment, and governance that contribute to the realization of sustainability.
