**FOR IMMEDIATE RELEASE**

# Nippon Prologis REIT Receives Building-Housing Energy-Efficiency Labeling System Certification

Nippon Prologis REIT, Inc. (NPR) today announced it has received a certification of the Building-Housing Energy-Efficiency Labeling System (BELS) for two of its properties, Prologis Park Kobe 2 and Prologis Park Koga 1. BELS is a system to assess energy conservation performances of buildings, which is being promoted by Japan's Ministry of Land, Infrastructure, Transport and Tourism (MITI).

## 1. Prologis Group's Environmental Initiatives and BELS Certification

The Prologis Group, as a leading global provider of distribution facilities and NPR's sponsor, is committed to promoting renewable energy and incorporating sustainable features into its logistics facilities. NPR received the BELS certification for its two properties as a result of energy initiatives put into place by the Prologis Group.

## 2. Overview of BELS

MITI enacted the Assessment Guideline of Indication of Energy Saving Capabilities of Non-residential Buildings in 2013 to improve energy conservation in Japan and to indicate applicable energy-related information in various circumstances, including the real estate market. BELS uses an evaluation method that complies with the Amendment of Energy Conservation Standards (enforced April 1, 2014). According to BELS, a third-party evaluator assesses the energy conservation performance of buildings using a variety of measurements. Ratings are given according to a scale (one star "★" to five stars "★★★★★").

## 3. BELS Assessment Results

| Property Name | Location | Assessment Grades | Evaluation Date |
|---|---|---|---|
| Prologis Park Kobe 2 | 4-11-4, Mitsugaoka, Nishi-ku, Kobe, Hyogo | ★★★★★ | Dec. 27,2016 |
| Prologis Park Koga 1 | 8-15, Kitatone, Koga, Ibaraki | ★★★★ | Jan. 27, 2017 |

Evaluator: JAPAN ERI CO., LTD.

## 4. NPR's Future Initiatives

As a leading global provider of distribution facilities, the Prologis Group is committed to developing environmentally friendly logistics facilities according to environmental guidelines established in each country/region. As a member of the Prologis Group, NPR will continue to invest, operate and manage such facilities in order to minimize environmental impact and maximize energy conservation.
