As part of the annual business plan, at the beginning of each fiscal year a risk compliance program is drawn up, and trainings in the relevant laws and regulations, measures to cultivate awareness of legal issues (publishing an internal monthly journal, soliciting and displaying compliance slogans etc.) have been implemented, in addition to which a compliance questionnaire is circulated every fiscal year in order to check the level of awareness among all officers and employees of the Group with regard to laws and regulations.

In addition, the Risk Management and Compliance Committee's meeting and a business law liaison meeting attended by heads of business teams of the operational divisions and responsible personnel from each Group company are held every month, during which participants share information about amendments to laws and regulations, etc. relating to businesses and notices from ministries with jurisdiction etc., while the results of deliberations by the Committee are reported to the monthly meetings of the Board of Directors.

We also implemented the same measures for the subsidiaries that joined the Group for the first time this fiscal year.

(2) Strengthen the checking function for breaches of laws and regulations

As well as monitoring and supervising by two Outside Directors and five Audit & Supervisory Board Members (all Outside Audit & Supervisory Board Members) at the Board of Directors' meeting, periodic meetings are held to exchange opinions between Audit & Supervisory Board Members and Outside Directors (held twice during the fiscal year under review), and between Audit & Supervisory Board Members and legal advisors (held three times during the fiscal year under review), so as to check for any signs of breaches of laws and regulations by the Directors responsible for executing business.

Moreover, while the Internal Audit Department conducts internal audits of the business

executed by the Company and the Group companies and checks for any breach of laws and regulations, the Company has set up a whistle-blowing system providing internal, external and, from the fiscal year under review, Audit & Supervisory Board Member points of contact, further strengthening the structure that is intended to detect breaches of laws and regulations at an early stage.

From the fiscal year under review, we have begun self-inspections at the departmental level to check the state of compliance with relevant laws and regulations, with the results monitored by the Internal Audit Department.

(3) Promptly react to any breach of laws and regulations, and make information disclosure

At meetings of the Board of Directors, corporate governance meetings, management meetings and meetings of the Risk Management and Compliance Committee, checks are made for signs, or actual occurrences, of breaches of laws and regulations, instructions are given regarding responses, and status reports are made. (4) Eliminate any association with anti-social forces

The Company continues screening of counterparties at the inception of transactions and carries out trainings on action against anti-social forces for all officers and employees of the Group in order to completely eliminate any association with anti-social forces.

Following the "Act on Prevention of Transfer of Criminal Proceeds" being amended and coming into effect, we have reviewed our business practices and implemented appropriate responses.

From the fiscal year under review, by making committee members of those responsible for internal control at the major Group companies, we have strengthened our processes for understanding information from each Group company that should be disclosed.

3. Management of Risk of Loss

(1) Ensure thorough understanding, analysis and assessment of risks

As part of the risk compliance program drawn up at the beginning of each fiscal year, an annual plan for risk management is drawn up and implemented.

Additionally, we implement stress tests on a half-yearly basis in relation to the Group's business environment (real estate market conditions, the trend in interest rates and financial institution funding etc.). The results are reported at the Board of Directors' meetings and the growth strategy meetings held twice a year to discuss business strategies going forward (attended by all Executive Officers and heads of each department).

For significant risks relevant to overall operations as well as individual businesses (top 30 risks), in addition to conducting an assessment every fiscal year, new risks that should be added are extracted, and preventive measures and responses in the event of the risk materializing are considered.

Supplementary Explanation Concerning the Subject Matter

Basic Policy as to How the Persons Who Control Decision-making of the Financial and Business Policies of the Company Should Be

(1) Contents of the basic policy

The Company believes it is necessary for the persons who control decision-making regarding the Company's financial and business policies to have a sufficient understanding of the financial and business affairs of the Company and the source of its corporate value, and to be capable of continuously and sustainably ensuring and enhancing the Company's corporate value and, in turn, the common interests of its shareholders.

The Company also believes that decisions regarding takeover propositions involving a change of control of the Company should ultimately be made based on the will of the shareholders of the Company as a whole. Furthermore, the Company will not reject a large-scale acquisition offer of the shares of the Company if it will contribute to the corporate value of the Company and, in turn, the common interests of its shareholders.

Nevertheless, among them are not a few forms of large-scale acquisition of shares that benefit neither the corporate value of the target company nor the common interests of its shareholders. Such acquisitions include those with a purpose that would apparently harm the corporate value of the target company and the common interests of its shareholders, those with the potential to practically coerce shareholders into selling their shares, those that do not provide sufficient time or information for the target company's board of directors and shareholders to consider the details of the large-scale acquisition offer, or for the target company's board of directors to make an alternative proposal, and those that require the target company to discuss or negotiate with the acquirer in order to procure more favorable terms than those originally presented by the acquirer.

It is particularly necessary and essential for the persons who make decisions on the Company's financial and business policies to (i) maintain the system under which the Company internally covers

the six business fields that allow the "integration of real estate and finance," which leads to maximization of the potential of the Company group, (ii) maintain employees who support that system with knowledge and experience specializing in real estate and finance, (iii) maintain the Company's trust in the real estate industry that has been built up over a long period of time based on the establishment of the ability and information networks supporting various value creation technologies, and (iv) master knowhow that enables comprehensive business. Unless the acquirer of a proposed large-scale acquisition of the shares in the Company understands the source of the corporate value of the Company as well as the details of financial and business affairs of the Company and would ensure and enhance these elements over the medium-to-long term, the corporate value of the Company and, in turn, the common interests of its shareholders would be harmed.

The Company believes that a person who undertakes a large-scale acquisition of the shares in the Company in a manner that does not contribute to the corporate value of the Company or the common interests of its shareholders will not be the right person to control decisions on the Company's financial and business policies.
