Nagoya Stock Exchange Implements "exaBase Generative AI"

- Enhancing Functionality as a Securities Market Platform in Market Management -

Exa Enterprise AI Inc. (Minato-ku, Tokyo; Representative Director: Takuma Oue; hereinafter “Exa Enterprise AI”), a group company of ExaWizards Inc., is pleased to announce that Nagoya Stock Exchange, Inc. (hereinafter "Nagoya Stock Exchange") has implemented our corporate ChatGPT service "exaBase Generative AI." Nagoya Stock Exchange will use the service to improve the efficiency and quality of their internal operations, such as creating documents related to market operations, meeting minutes, and data analysis. As a platform provider in the securities market, they will continue to provide fair and reliable market services that contribute to the growth of companies and the asset formation of investors.

Exa Enterprise AI aims to unlock human potential and create a society where new challenges can be addressed by providing generative AI services and products to enhance the productivity of Japanese companies and organizations.

☑ Background

Nagoya Stock Exchange has been improving efficiency by developing business systems and tools for various departments. However, developing business systems incurs costs, making it less cost-effective for small-scale tasks. And though tool creation can be handled at low cost, there were challenges such as a shortage of in-house technicians and dependencies on specific individuals. Under these circumstances, they decided to use generative AI to respond quickly to small-volume, high-variety tasks.

exaBase Generative AI can be used at low cost even if only using a small number of accounts. It utilizes high-precision, fast-response GPT-4o and a logical-thinking capable o3-mini. It also includes standard features such as prohibited word registration and confidential information blocking, providing both high security and ease of use.

Exa Enterprise AI will continue to support the Nagoya Stock Exchange in expanding the use of exaBase Generative AI and promoting further DX within the company.

☑ About exaBase Generative AI

exaBase Generative AI has been used by 740 companies and over 70,000 users since its paid service launch in June 2023. It addresses security and compliance issues for corporate use, allowing administrators to monitor usage and register prohibited words. Users can estimate productivity improvements from using generative AI and view these estimates as a graph. The service also supports the use of unique company data, allowing users and administrators to upload files specific to their company for discussion and content generation. Companies listed on the Nagoya Stock Exchange, such as Toyoda Gosei and Nagoya Railroad (which won the Grand Prix at the Generative AI Awards 2024*), have adopted this service. In addition, the business-specific generative AI "exaBase IR Assistant" provided by Exa Enterprise AI has been introduced to companies such as Hikari Food Service, Mitsubishi Heavy Industries, Toyoda Gosei, Tokai Tokyo Financial Holdings, Nagoya Railroad, IBIDEN, and Panasonic Holdings.
