## Odakyu Electric Railway, a DX-Certified Company, Adopts "exaBase IR Assistant"

- Utilizing Generative AI for Operational Efficiency and Maximizing Corporate Value Through Enhanced Disclosures and Dialogue -

Exa Enterprise AI Inc. (Minato-ku, Tokyo; Representative Director: Takuma Oue; hereinafter “Exa Enterprise AI“), a group company of ExaWizards Inc., is pleased to announce that Odakyu Electric Railway Co., Ltd. (hereinafter "Odakyu") has begun implementing "exaBase IR Assistant." Odakyu intends to leverage this generative AI specialized for IR operations to promote DX in their department, creating a framework that allows them to focus on high-value-added disclosures and dialogue.
Exa Enterprise AI’s goal is to unlock human potential and help foster a society where people can take on new challenges and improve productivity through the AI services and products they provide to Japanese companies and organizations.

**☑ Background**

Odakyu, under its management vision "UPDATE Odakyu — Toward a Regional Value-Creation Company," is striving to grow sustainably alongside its communities by addressing regional challenges and creating new value to drive profits through capital cost-conscious management. As part of strengthening the management foundation required to achieve this vision, Odakyu has prioritized DX strategies and has been exploring generative AI for operational efficiency.

To advance operational DX and establish a framework that allows for high-value-added disclosures and dialogue, Odakyu has decided to introduce exaBase IR Assistant, a generative AI service tailored specifically for IR operations.

The impact of this matter on the performance for the fiscal year ending March 2026 is expected to be minimal.

**☑ About exaBase IR Assistant**

exaBase IR Assistant utilizes AI to generate meeting minutes from audio and video of IR meetings for analysis and potential questions. It also provides an AI that automatically generates anticipated questions and corresponding answers for financial briefings, shareholder meetings, press conferences, and other briefings using various IR documents as data sources and incorporating company-specific information.

In the future, Exa Enterprise AI will collaborate with external information sources and release new features for exaBase IR Assistant to support information disclosure practices of listed companies through "IR Tech."
