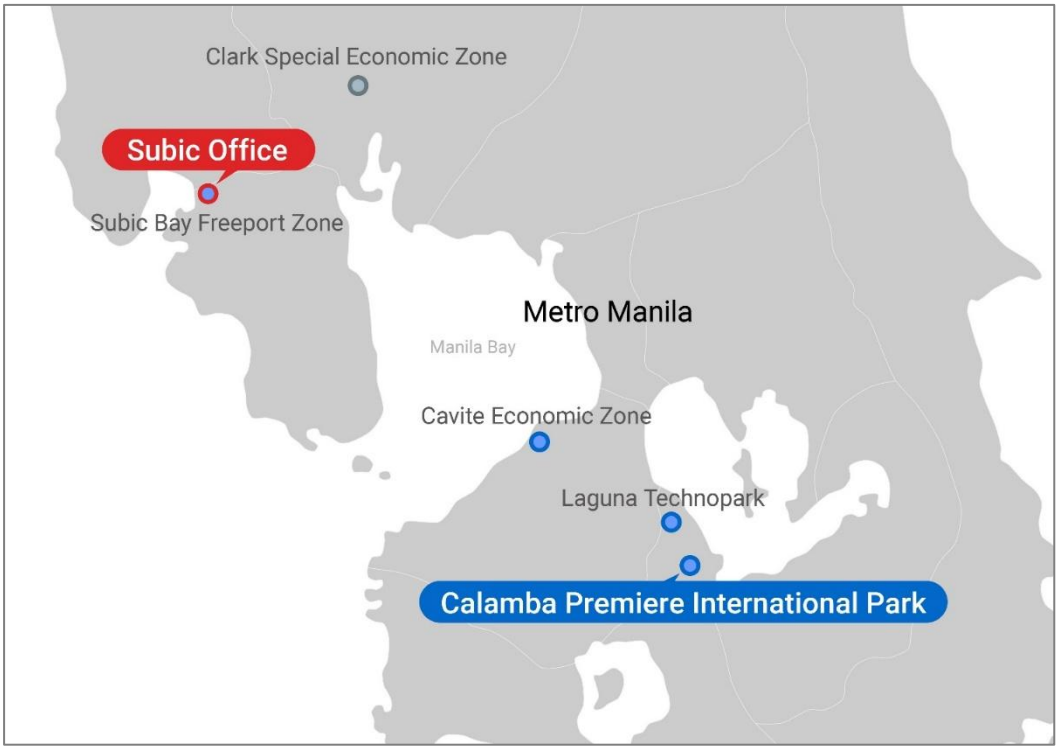
OCTOBER 31, 2025

InfiniVAN establishes its first northern Manila sales base in Subic to expand corporate services, and signs partnership agreement with southern industrial park “CPIP”

InfiniVAN, Inc. (hereinafter “InfiniVAN”), the telecommunications subsidiary of IPS, Inc. (the “Company”), opened its fifth domestic office in Subic in September 2025. This marks the first sales base in the northern part of the Metro Manila on Luzon Island, Philippines, and aims to expand the provision of corporate internet connection services. Additionally, InfiniVAN has entered into a partnership agreement with the operator of the industrial park “Calamba Premiere International Park” (hereinafter “CPIP”) in the southern part of the metropolitan area to enable the provision of communication lines to tenant companies. Details are as follows.

The Subic area north of Metro Manila once housed one of Asia's largest U.S. naval bases and later developed as an economic zone. In addition to industrial parks converted from the former base, InfiniVAN anticipates a potential customer base of around 1,000 companies, including logistics-related businesses, warehouses, and hotels. It offers excellent accessibility to the surrounding Pampanga province, including the Clark Special Economic Zone within it, as well as emerging regions like Tarlac province, making it a prime location covering the core industrial belt.



Meanwhile, CPIP is located south of the Metro Manila, covering a total area of approximately 80,000 square meters and housing about 100 companies. It serves as a base for leading Japanese, American, and Korean companies, and InfiniVAN aims to develop new business opportunities there. InfiniVAN has recently expanded its service coverage by forming partnerships with over 10 promising industrial parks. These include the Cavite Economic Zone, which houses many companies including Japanese firms, the similarly large Laguna Techno Park, as well as, in Batangas Province further south, the First Philippine Industrial Park (FPIP)—where a Japanese trading company holds partial equity—and the Lima Technology Center.

Signing Ceremony with CPIP

At the Subic Office Opening

InfiniVAN has been providing corporate internet connectivity services primarily to medium-sized and large enterprises in Metro Manila, including major financial institutions in the Philippines, Japanese companies, and local businesses. Moving forward, InfiniVAN will continue to enhance our customer acquisition initiatives to build a robust foundation for sustainable growth.

■About InfiniVAN

In the Philippines, InfiniVAN is working to solve social issues and reduce regional disparities through the construction of telecommunications infrastructure. In 2023, the Philippine Domestic Submarine Cable Network (PDSCN), connecting the Philippine islands, was completed. InfiniVAN now provides telecommunications services throughout the Philippines, from Luzon Island to the Central Visayas region and southern Mindanao Island.
