Notice Regarding Distribution Agreement for EUREKA ROBOTICS Products in North America

We are pleased to announce that our group company, Maruka USA, Inc. (hereinafter referred to as Maruka USA) has entered into a distribution agreement with EUREKA ROBOTICS, INC., a subsidiary of EUREKA ROBOTICS PTE. LTD. (hereinafter referred to as EUREKA) for the North American region concerning EUREKA's products. The details are as follows.

1. Purpose of the contract

Our group invested in EUREKA in 2024 and has steadily deepened our collaboration in Japan.

EUREKA, a spin-off startup established in 2018 by Pham Quang Cuong, an Associate Professor at Nanyang Technological University in Singapore, develops and markets next-generation AI-powered robotics controllers and dedicated 3D cameras. EUREKA's flagship products, the "Eureka Controller," and the “Eureka 3D Camera”, integrates various elemental technologies, including image recognition AI, high-precision calibration, robotic path generation, and force control, enabling advanced automation previously deemed impossible in the manufacturing and logistics sectors.

To address the increasing social demand for AI technology that enhances production efficiency, driven by manufacturing promotion and labor shortages in North America, we are now extending our collaboration with EUREKA to the United States. Our aim is to provide unique and innovative automation solutions to industries such as automotive, medical devices, and aerospace in North America.

2. Future outlook

The initial impact of the agreement on the Company's consolidated financial results will be immaterial.
