The following is an English translation of the Items for Disclosure via the Internet upon Notice of Convocation of the 76th Annual General Meeting of Shareholders of LIXIL Group Corporation (the "Company") to be held on June 21, 2018. The Company provides this translation for your reference and convenience only and without any warranty as to its accuracy or otherwise. If there is any discrepancy between the Japanese version and the English translation, the Japanese version shall prevail.

To Our Shareholders

Items for Disclosure via the Internet upon Notice of Convocation of the 76th Annual General Meeting of Shareholders

1. **Notes to consolidated financial statements**
2. **Notes to nonconsolidated financial statements**

for the 76th fiscal year (from April 1, 2017 to March 31, 2018)

LIXIL Group Corporation

Pursuant to laws and regulations and the Company's Articles of Incorporation, the above items are information regarded to be provided to shareholders by placing on the Company's website (http://www.lixil.com/jp/) over the Internet.

Notes to Consolidated Financial Statements

1. Basis for Preparation of Consolidated Financial Statements

(1) Standards of preparation of consolidated financial statements

The consolidated financial statements of LIXIL Group Corporation (the "Company") have been prepared in accordance with International Financial Reporting Standards ("IFRS") pursuant to Article 120, Paragraph 1 of the Ordinance on Company Accounting. Pursuant to the provisions of the second sentence of the paragraph, certain disclosures required under IFRS are omitted.

(2) Basis of consolidation

Number of subsidiaries: 217

Major subsidiaries: LIXIL Corporation
LIXIL VIVA CORPORATION
LIXIL Total Hanbai Corporation
LIXIL Total Service Corporation
Kawashima Selkon Textiles Co., Ltd.
LIXIL Group Finance Corporation
GROHE Group S.à r.l.
Permasteelisa S.p.A.
ASD Holding Corp.
A-S CHINA PLUMBING PRODUCTS Ltd.
TOSTEM THAI Co., Ltd.
LIXIL INTERNATIONAL Pte. Ltd.
LIXIL GLOBAL MANUFACTURING VIETNAM Co., Ltd.
LIXIL Manufacturing (Dalian) Corporation

LIXIL TEPCO Smart Partners Inc. and another company were newly established and included in the scope of consolidation in the year ended March 31, 2018. Grome Marketing (Cyprus) Ltd. and eleven other companies' shares were acquired and included in the scope of consolidation in the year ended March 31, 2018.

LIXIL-Haier Housing Products (Qingdao) Co., Ltd. and two other companies were excluded from the scope of consolidation as the entire shares of these companies were disposed of. IDEAL STANDARD (THAILAND) Ltd. and other two companies were excluded from the scope of consolidation as they were liquidated. The Company merged by absorption with GraceA Corporation.

During the year ended March 31, 2018, the Company resolved to sell 100% of the shares of Permasteelisa S.p.A. and signed off on a share transfer agreement. Details are described in Note 10. "Discontinued Operations."

(3) Application of the equity method

Number of associates accounted for using the equity method: 67

Major associates accounted for using the equity method: Sanyo Homes Corporation
Ken Depot Corporation

From the year ended March 31, 2018, Fukui Computer Holdings, Inc. was excluded from the scope of the equity method as part of Fukui Computer Holdings, Inc.'s shares were disposed of and significant influence was lost. Grome Marketing (Cyprus) Ltd. and another company were excluded from the scope of the equity method and included in the scope of consolidation as their outstanding shares were acquired and the control was obtained.

(4) Fiscal year of subsidiaries

In preparing the consolidated financial statements, subsidiaries with fiscal year ends other than the Company's March fiscal year end provisionally prepare financial statements as of March 31, which are used for consolidation.

(5) Significant accounting policies

1) Inventories

The historical cost of inventories includes costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Inventories are stated at the lower of cost and net realizable value. Historical cost is determined mainly by using the weighted-average method. Net realizable value represents the estimated selling price in the ordinary course of business less the estimated costs of completion and estimated costs necessary to make the sale.

Carrying amounts of inventories recognized in the consolidated statement of financial position are reviewed regularly. When there is slow-moving inventory over a long period, or when the Company and its subsidiaries (the "Group") does not expect that all or a portion of the inventory will be recovered through sales, carrying amounts are written down to their estimated net realizable values.

2) Property, plant and equipment

The Group measures property, plant and equipment by using the cost model at historical cost less accumulated depreciation and accumulated impairment losses. The historical cost includes any costs directly attributable to the acquisition of the asset and dismantlement, removal and restoration costs, as well as borrowing costs eligible for capitalization.

Property, plant and equipment are depreciated mainly by using the straight-line method over their estimated useful lives, except for assets that are not subject to depreciation, such as land. The estimated useful lives of major property, plant and equipment are as follows:

•Buildings and structures: 8 to 50 years
•Machinery and vehicles: 7 to 12 years
•Tools, furniture and fixtures: 2 to 20 years

The depreciation method, estimated useful lives and residual values are reviewed at each fiscal year end. If there are any changes made to the depreciation method, estimated useful lives or residual values, such changes are accounted for as changes in accounting estimates and applied prospectively starting from the fiscal period of change.

The carrying amount of property, plant and equipment shall be derecognized on disposal or when no future economic benefits are expected from its continued use. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the consideration for disposal and the carrying amount, and is recognized in profit or loss.

3) Goodwill

Goodwill arising from business combinations is stated at historical cost less accumulated impairment losses.

Goodwill is not amortized but allocated to cash-generating units ("CGU") (or groups of CGU) and tested for impairment at least once a year, or whenever there is any indication of impairment. Impairment losses on goodwill are recognized in profit or loss and no subsequent reversal is made.

Goodwill is derecognized at the time of disposal of the associated CGU (or group of CGU) and included in the carrying amount of the disposed operation when profit or loss on disposal is recognized.

4) Other intangible assets

After recognition, intangible assets are measured by using the cost model. Intangible assets are carried at historical cost less any accumulated amortization and accumulated impairment losses.

(i) Intangible assets acquired individually
Measured at historical cost on initial recognition

(ii) Intangible assets acquired through business combinations
Measured at fair value on the acquisition date

(iii) Internally generated intangible assets

Research and development costs arising internally within the Group are expensed when incurred, with the exception of expenditures for development activities that meet all of the following capitalization criteria:

- The technical feasibility of completing the intangible asset so that it will be available for use or sale;
- The Company's intention to complete the intangible asset and use or sell it;
- The Company's ability to use or sell the intangible asset;
- How the asset will generate probable future economic benefits;
- The availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- The Company's ability to measure reliably the expenditure attributable to the intangible asset during its development.

Intangible assets with finite useful lives are amortized by using the straight-line method over their estimated useful lives. The estimated useful lives of major intangible assets with finite useful lives are as follows:

- Software: 5 years
- Customer-related assets: 13 to 30 years
- Trademarks: 5 to 20 years
- Technological assets: 6 to 10 years

Trademarks with indefinite business periods are classified as intangible assets with an indefinite useful life when it is determined that there is no foreseeable limit to the period in which future economic benefits are expected, given that business periods continue, in principle, as long as the business continues.

Intangible assets with indefinite useful lives and intangible assets with finite useful lives that are not ready to use are not amortized, but they are tested for impairment at least once a year or whenever there is any indication of impairment.

Amortization methods, useful lives and residual values of assets are reviewed at each fiscal year end and any changes are accounted for as changes in accounting estimates and applied prospectively starting from the fiscal period of change.

5) Investment property

Investment property is property held to earn rentals or for capital appreciation or both.

Investment property is measured by using the cost model, which is consistent with the accounting treatment for buildings under property, plant and equipment, and stated at cost less accumulated depreciation and accumulated impairment losses.

Investment property is depreciated by using the straight-line method over the estimated useful life, which is consistent with the accounting treatment for buildings under property, plant and equipment.

The depreciation method, estimated useful lives and residual values are reviewed at each fiscal year end. If there are any changes made to the depreciation method, estimated useful lives or residual values, such changes are accounted for as changes in accounting estimates and applied prospectively starting from the fiscal period of change.

6) Impairment of non-financial assets

Non-financial assets, such as property, plant and equipment, goodwill and other intangible assets, are assessed for any indications of impairment at the end of every fiscal year. Impairment tests are performed in cases where there is an indication of impairment. However, for goodwill and intangible assets with indefinite useful lives, impairment tests are performed at least once a year regardless of any indication of impairment. Assets for which tests cannot be performed individually are merged into the smallest group of assets that generate cash inflows that are largely independent of the cash inflows from other assets or

groups of assets (CGU), and impairment tests are performed for each CGU (or group of CGU). A CGU (or group of CGU) to which goodwill is allocated for the purpose of impairment testing represents the lowest level at which the goodwill is monitored for internal management purposes and is not larger than an operating segment. Goodwill that forms part of the carrying amount of an investment accounted for under the equity method is not separately recognized, and therefore, it is not tested for impairment separately. If there is any indication that investments in associates and joint ventures accounted for using the equity method may be impaired, the entire carrying amount of the investment is tested as a single asset.

The recoverable amount of an individual asset or a CGU is measured as the higher of its fair value less costs of disposal or its value in use. Where the carrying amount of the asset or CGU exceeds its recoverable amount, impairment losses are recognized and the asset is written down to its recoverable amount. In determining value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

For assets other than goodwill, an assessment is made at the end of every fiscal year as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased, such as any changes in assumptions used for the determination of the recoverable amount. If any such indication exists, the Group estimates the asset's or CGU's recoverable amount. In cases where the recoverable amount exceeds the carrying amount of the asset or CGU, impairment losses are reversed up to the lower of the determined recoverable amount or the carrying amount that would have been determined, net of depreciation, had no impairment loss for the asset been recognized in prior years. Recognized impairment losses relating to goodwill cannot be reversed.

7) Financial instruments

The Group classifies non-derivative financial assets as loans and receivables, held-to-maturity investments and available-for-sale financial assets. Non-derivative financial liabilities are classified as other financial liabilities.

(i) Non-derivative financial assets

Non-derivative financial assets are initially recognized on the transaction date and measured at the sum of the fair value and transaction costs.

Financial assets are derecognized only when the contractual rights to receive cash flows from them have expired, or the Group transfers the asset and substantially all of the risks and rewards of ownership are transferred. When the Group has continuing control of a transferred financial asset, but when substantially all of the risks and rewards of ownership are not transferred nor retained, the Group recognizes retained interests in the asset as well as related liabilities for potential payments.

(a) Loans and receivables

Non-derivative financial assets that are loans or trade and other receivables with fixed or determinable payments that are not quoted in an active market are classified as loans and receivables. Loans and receivables are measured at amortized cost determined by using the effective interest method based on estimated future cash receivables over the expected life (in certain cases, shorter periods are used) of the asset, less impairment losses. In principle, interest income is recognized by using the effective interest method.

(b) Held-to-maturity investments

Non-derivative financial assets with fixed or determinable payments and fixed maturities are classified as held-to-maturity investments when the Group has the positive intention and ability to hold them to maturity. Held-to-maturity investments are measured at amortized cost using the effective interest method, less impairment losses. In principle, interest income is recognized using the effective interest method.

(c) Available-for-sale financial assets

Non-derivative financial assets are classified as available-for-sale financial assets if they are designated as available-for-sale financial assets or they are not classified as held-to-maturity investments or loans and receivables.

Available-for-sale equity shares traded in the market are measured at quoted prices. Unquoted equity shares are measured at fair values determined using valuation techniques. Fair values are determined using the methods presented in Note 6 "Financial Instruments." Gains or losses arising from changes in fair value are recognized in other comprehensive income. However, impairment losses are recognized in profit or loss in the fiscal year in which they occur.

Cumulative gains or losses recognized as other comprehensive income up to the derecognition of available-for-sale financial assets or recognition of impairment losses are reclassified to profit or loss for that period.

Dividends associated with available-for-sale financial assets are recognized in profit or loss when the shareholder's right to receive the payment is established.

(d) Impairment of non-derivative financial assets

Non-derivative financial assets are assessed for any objective evidence of impairment for each fiscal year. For quoted and unquoted equity shares classified as available-for-sale financial assets, a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment. Objective evidence of impairment of redeemable securities and all other financial assets classified as available-for-sale financial assets includes the following:

- Significant financial difficulty of the issuer or borrower
- Default or delinquency in interest or principal payments
- High possibilities of issuers' bankruptcy or entering financial reorganization

(Financial assets measured at amortized cost)

For financial assets measured at amortized cost, impairment losses are recognized if there is objective evidence that the financial asset's estimated future cash flows will be affected as a result of at least one event occurring after initial recognition.

The amount of impairment losses is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). The present value of the estimated future cash flows is discounted at the financial asset's original effective interest rate. Impairment losses are recognized by directly reducing the financial asset's carrying amount, with the exception of cases in which the loss indirectly reduces the asset's carrying amount through allowance for doubtful accounts. Allowance for doubtful accounts is set up when trade receivables, including those with changed terms, are considered uncollectible. The allowance is reduced when receivables are subsequently waived or collected. Changes in allowance for doubtful accounts are recognized as profit or loss, except for reduction due to use for write off.

If, in a subsequent period, the amount of the impairment losses decreases and the decrease can be related objectively to an event occurring after the recognition of impairment, the previously recognized impairment losses are reversed through profit or loss to the extent that the carrying amount of the receivables after the reversal of impairment losses does not exceed the amortized cost had the impairment not been recognized.

(Available-for-sale financial assets)

For available-for-sale financial assets, cumulative losses recognized as valuation difference in available-for-sale financial assets in other components of equity are reclassified to profit or loss and recognized as impairment losses. Cumulative losses reclassified from other comprehensive income to profit or loss are the difference between the historical cost and current fair value, less impairment losses previously recognized as profit or loss. In addition, impairment losses for available-for-sale

equity financial assets previously recognized in profit or loss cannot be reversed. Changes in fair value after impairment are recognized through other comprehensive income.

(ii) Non-derivative financial liabilities

Bonds and borrowings and other financial liabilities are measured at fair value less transaction costs at initial recognition. After initial recognition, financial liabilities are measured at amortized cost using the effective interest method based on estimated future cash payment over the expected life (in certain cases, shorter periods are used). Interest expense is recognized using the effective interest method. A financial liability is derecognized at the time the obligation specified in the contract ceases (i.e., the obligation is discharged, canceled or expired).

(iii) Compound financial instruments

The liability component of a compound financial instrument is measured at initial recognition by the fair value of a similar liability without the equity conversion option. The equity component is measured at initial recognition by deducting the fair value of the liability component from the fair value of the entire financial instrument. Direct transaction costs are allocated in proportion to the initial carrying amount of the liability component and equity component.

After initial recognition, the liability component of a compound financial instrument is measured at amortized cost using the effective interest method. The equity component of a compound financial instrument is not remeasured after initial recognition.

Interests associated with the liability component are recognized in profit or loss as finance costs. When the equity conversion option is exercised, the liability component is transferred to equity and neither gains nor losses are recognized.

(iv) Derivatives (including hedge accounting)

The Group uses forward currency contracts, interest rate swaps, cross-currency swaps and commodity swaps to hedge its foreign currency risks, interest rate risks and commodity price risks, respectively. The use of derivative transactions is limited to risk hedging purposes and is not for speculation purposes. These derivative financial instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value.

Hedge effectiveness of hedging instruments and hedged items is assessed based on the evaluation of receivables and/or payables balances, hedge transaction terms and other elements as required.

Derivatives that qualify for hedge accounting are designated as hedging instruments in cash flow hedges. A cash flow hedge is a hedge of the exposure to variability in cash flows that is attributable to a particular risk associated with a recognized asset or liability or a highly probable forecast transaction and could affect profit or loss.

At the inception of the hedge, the Group formally designates and documents the relationship between a hedging instrument and a hedged item and the risk management objective and strategy for undertaking various hedge transactions. The documentation includes identification of hedging instruments, hedged items or transactions, the nature of the risks being hedged and how the hedging instrument's effectiveness is assessed in offsetting the exposure to changes in the hedged item's cash flows attributable to the hedged risks. Such hedges are expected to be highly effective in offsetting changes in cash flows and are assessed on an ongoing basis to determine that they have actually been effective throughout the fiscal reporting periods for which they were designated as hedges.

Hedge accounting is discontinued when a designated hedge is revoked, the hedging instrument expires, or is sold, terminated or exercised, or the hedge no longer qualifies for hedge accounting.

The portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is recognized as other comprehensive income. The ineffective portion of the gain or loss on the hedging instrument is immediately recognized as profit or loss in the consolidated statement of profit or loss.

The amount of hedging instruments recognized in other comprehensive income is reclassified to profit or loss when the transactions related to hedged items affect profit or loss.

Derivatives in which hedge accounting is not applied are recognized at fair value with changes in the fair values recognized as profit or loss in the consolidated statement of profit or loss.

(v) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis or to realize the assets and settle the liabilities simultaneously.

8) Leases

A finance lease is a lease that transfers substantially all the risks and rewards incidental to ownership of an asset. An operating lease is a lease other than a finance lease.

In finance lease transactions, leased assets and lease obligations are recognized in the consolidated statement of financial position at the lower of the fair value of the leased property or the present value of the minimum lease payments, each determined at the inception of the lease. Total minimum lease payments are apportioned between the finance cost and the reduction of the lease obligations based on the effective interest method. Finance costs are recognized in the consolidated statement of profit or loss. Leased assets are depreciated by using the straight-line method over the shorter of their estimated useful lives or lease terms.

In operating lease transactions, lease payments are recognized as an expense by using the straight-line method over the lease terms in the consolidated statement of profit or loss.

Determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at the inception of the lease, in accordance with IFRIC 4, Determining Whether an Arrangement Contains a Lease, even if the arrangement does not take the legal form of a lease.

9) Provisions

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the obligation will be required to be settled and a reliable estimate can be made of the amount of the obligation.

Provisions are recognized based on the best estimates of necessary expenditures (future cash flows) in order to settle present obligations by taking into account risks and uncertainties associated with the obligation at the end of the fiscal year. Where the effect of the time value of money is material, provisions are measured using the estimated future cash flows, discounted using a pre-tax rate reflecting the time value of money and the risks specific to the liability.

For asset retirement obligations, provisions are recognized for restoration costs and expenditures incurred as a result of asset use, and the same amount is added to the asset's historical cost. Future estimated expenses and applied discount rates are reviewed every fiscal year. If revisions are deemed necessary, additions or deductions are made to the carrying amount of the relevant asset, and are accounted for as changes in accounting estimates.

10) Employee benefits

(i) Defined benefit pension plans

There are two types of defined benefit pension plans for employees of the Company and certain subsidiaries: cash-balance plan in which the amounts of benefit changes is based on the market yields on government bonds; and lump-sum payment retirement plan.

The projected unit credit method is used to determine the present value of defined benefit obligations, related current service costs and past service costs for each pension plan. The discount period is

determined based on the period ending at the expected date of benefit payment for each pension plan, and the discount rate is determined by reference to market yields at the end of the fiscal year on high-quality corporate bonds corresponding to the discount period. Net defined benefit liabilities (assets) are determined as the present value of defined benefit obligations less the fair value of plan assets (the effect of the asset ceiling is taken into account, if necessary).

Remeasurements of net defined benefit liabilities (assets) are recognized in other comprehensive income and transferred to retained earnings immediately in the fiscal year in which they occur. Remeasurements are composed of actuarial gains and losses, return on plan assets and any changes due to the effect of the asset ceiling, excluding amounts included in net interest costs. Service costs and net interest costs are recognized in profit or loss in the period in which they occur.

(ii) Defined contribution plans

Certain subsidiaries have established defined contribution plans. Defined contribution plans are post-employment benefit plans under which an employer regularly pays fixed contributions into employees' individual accounts and will have no legal or constructive obligations to pay further contributions. As a result, contributions to defined contribution plans are expensed in the period in which an employee has rendered services.

(iii) Short-term employee benefits

Short-term employee benefits are not discounted, but expensed when related services are rendered.

For bonuses and paid absences, future benefit payments for each plan are accounted for as liabilities when the following are met:

- There is a present legal or constructive obligation to make payment as consideration for services rendered by employees in both prior years and the current year; and
- The payment amount can be estimated reliably.

(iv) Other long-term employee benefits

In relation to obligations for long-term employee benefits other than post-employment benefits, future benefit payments to be incurred as consideration for services rendered by employees in prior years and the current year are accounted for as liabilities.

11) Revenue

The Group recognizes revenue on a transaction by transaction basis, which is generally based on contracts. When there are multiple-element arrangements in a single contract, revenue is accounted for based on identifiable individual transaction components. If multiple contracts are closely related to each other and comprise one transaction component as a whole, the multiple contracts are accounted for as a single transaction.

(i) Sale of merchandise and finished goods

The Group is engaged in the sale of merchandise and finished goods in the Water Technology business, Housing Technology business and Kitchen Technology business through distributors and housing manufacturers. Installation services are provided for certain merchandise and finished goods at the time of sale. In addition, home building materials and other merchandise are directly sold to end users at home centers.

Revenue is recognized for the sale of merchandise and finished goods when the following are met:

- The Group transfers to the buyer the significant risks and rewards of ownership of the goods;
- The Group retains neither continuing managerial involvement nor effective control over the goods;
- It is probable that future economic benefits associated with the transaction will flow to the Group; and
- Revenue and costs in respect of the transaction can be measured reliably.

Revenue is measured at the fair value of the consideration received (or receivable), less trade discounts, volume rebates and taxes, including consumption tax.

(ii) Construction contracts

The Group enters into long-term construction contracts, mainly for its Building Technology business. In relation to revenue arising from these construction contracts, when the outcome of construction contracts can be estimated reliably, revenue is recognized based on the percentage of completion as of the end of the fiscal year. The percentage of completion is determined as the ratio of construction contract costs incurred to date to the estimated total costs under the construction contract. When the outcome of construction contracts cannot be estimated reliably, revenue is recognized only to the extent of construction contract costs incurred that it is probable will be recoverable. Loss that will probably be incurred is recognized as an expense immediately.

Construction contract assets represent the total costs incurred plus recognized profits (less recognized losses) that exceed the billing amount for all construction contracts in progress at the end of the fiscal year. Construction contract liabilities represent the total costs incurred plus recognized profits (less recognized losses) that are less than the billing amount. The amount of construction contract assets and liabilities is determined for each contract.

(iii) Other

The Group renders a variety of other services in its housing solutions and real estate-related businesses. Revenue associated with these services is recognized at the time services are rendered in accordance with service contracts.

12) Foreign currency translation

(i) Translation of foreign currency transactions

Foreign currency transactions are translated into the respective functional currencies of the group companies using the exchange rate at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency using the exchange rate as of the fiscal year end. Non-monetary items measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction.

Exchange differences arising on translations and settlements are recognized in profit or loss. Exchange differences arising from financial assets measured at fair value through other comprehensive income and cash flow hedges are recognized in other comprehensive income.

(ii) Translation of foreign operations

Assets and liabilities of foreign operations (including goodwill arising from acquisitions and the adjustments of fair value) are translated into Japanese yen using the exchange rate as of the fiscal year end. Revenue and expenses are translated into Japanese yen using the average exchange rate for the fiscal year, unless there is no significant fluctuation in the exchange rate. Translation differences are recognized in other comprehensive income. On the disposal of a foreign operation, involving a loss of control, the cumulative amount of foreign currency translation differences relating to the applicable foreign operation are transferred to profit or loss in the period of disposal.

13) Assets held for sale

An asset or asset group which is expected to be recovered through a sale transaction rather than through continuing use is classified as an asset or disposal group held-for-sale if the management commit to a plan to sell, it is highly probable that the asset or asset group will be sold within one year and the asset or asset group is available for immediate sale in its present condition. Assets classified as held for sale or included within a disposal group that is classified as held for sale are measured at the lower of its carrying amount or its fair value less costs of sell. Property, plant and equipment and intangible assets classified as held for sale and property, plant and equipment and intangible assets included within a disposal group that is classified as held for sale are not depreciated or amortized.

14) Discontinued operations

Discontinued operations include components of an entity already disposed of or classified as held for sale. The Company recognizes them if they represent a separate major line of business or geographical area of operations and there is a plan to dispose of one of the businesses or geographical areas.

15) Accounting for consumption tax

Transactions subject to consumption tax are recorded at amounts exclusive of consumption tax.

2. Notes on Changes in Presentation

Income (loss) from discontinued operations, net of tax, is presented below net income for continuing operations in the consolidated statements of profit or loss.

3. Notes to Consolidated Statement of Financial Position

(1) Pledged assets

Land	147 million yen

The above assets are pledged as collateral for long-term borrowings to be repaid within one year in the amount of 23 million yen and long-term borrowings in the amount of 204 million yen.

(2) Allowance for doubtful accounts directly deducted from assets

Trade and other receivables	2,731 million yen
Other financial assets (Current assets)	5 million yen
Other financial assets (Non-current assets)	39,456 million yen
Total	42,192 million yen

(3) Accumulated depreciation and impairment loss on property, plant and equipment

697,134 million yen

(4) Contingent liabilities

The Group guarantees liabilities to certain banks in the amount of 165,480 million yen for Permasteelisa S.p.A. and its subsidiaries' performance bonds under contracts and others. The Group also provides business-related guarantees and other guarantees to counterparties in the amount of 3,838 million yen.

4. Notes to Consolidated Statement of Profit or Loss

(1) Impairment losses

The Company recognized impairment losses amounting to 6,261 million yen as other expenses in the consolidated statement of profit or loss for the year ended March 31, 2018. The main impaired assets are as follows:

(Millions of yen)

Category	Segment	Component and amount	
Manufacturing facilities for faucets, etc.	Water Technology business	Machinery and vehicles	985
		Goodwill	1,311
		Customer-related assets	272
		Trademarks	1,957
		Other	71
		Total	4,596

The Group recognized impairment losses for the assets of manufacturing facilities for faucets, etc., which were mainly recognized on the aqcuisition date of Grohe Dawn Watertech Holdings Propriety Limited in April 2015. The carrying amounts of the relevant assets were written down to their recoverable amounts, and related impairment losses were recorded as other expenses in the consolidated statement of profit or loss since the initially anticipated earnings have been no longer expected.

An asset's recoverable amount is the higher of its fair value less costs of disposal and the asset's value in use. Manufacturing facilities for faucets, etc. are measured at fair value less cost of disposal, determined by discounting future cash flows at a discount rate of 13.8%. For goodwill, the Company recognized impairment losses of the entire amount of the total carrying book value.

(2) Gain on disposal of interest in former associates

During the year ended March 31, 2018, LIXIL Corporation ("LIXIL"), a consolidated subsidiary of the Company, transferred part of the shares of Fukui Computer Holdings Inc., ("Fukui") and subsequently posted gains on share transfer. As of the end of the year ended March 31, 2018, LIXIL continues to hold shares representing 10% of the total number of issued and outstanding shares of Fukui. The stocks are evaluated at fair value and the difference from the book value of the equity method was recorded as gains on valuation. The gain on disposal of interest in Fukui amounting to 11,618 million yen were recognized in the Consolidated Statement of Profit or Loss for the year ended March 31, 2018, which is the sum of gains on share transfer and gains on valuation.

5. Consolidated Statement of Changes in Equity

(1) Class and total number of shares outstanding and class and number of treasury shares

	Class of shares	Number of shares at beginning of the fiscal year (thousand)	Increase during the fiscal year (thousand)	Decrease during the fiscal year (thousand)	Number of shares at the end of the fiscal year (thousand)
Shares outstanding	Ordinary shares	313,054	—	—	313,054
Treasury shares	Ordinary shares	25,361	11	2,108	23,264

Notes: 1. Number of treasury shares is the total of treasury shares owned by the Company and those owned by associates accounted for using the equity method, which are determined in proportion to the Company's interest in the associates.
2. The increase is mainly due to the purchase of stocks of less than one unit of 11 thousand shares.
3. The decrease is mainly due to an exercise of stock options of 2,062 thousand shares.

(2) Dividends

1) Dividends paid

Resolution	Class of shares	Total dividends (Millions of yen)	Dividends per share (Yen)	Record date	Effective date
Board of Directors Meeting held on May 22, 2017	Ordinary shares	8,631	30	March 31, 2017	June 7, 2017
Board of Directors Meeting held on November 11, 2017	Ordinary shares	8,649	30	September 30, 2017	November 24, 2017
Total	—	17,281	—	—	—

Note: Total dividends are the resolution amount of dividends less dividends attributed to the Company's shares owned by associates accounted for using the equity method.

2) Dividends with a record date in the current year but an effective date subsequent to the current year

Resolution	Class of shares	Total dividends (Millions of yen)	Dividends resource	Dividends per share (Yen)	Record date	Effective date
Board of Directors Meeting held on May 21, 2018	Ordinary shares	10,413	Retained earnings	35	March 31, 2018	June 6, 2018

Note: Total dividends are the resolution amount of dividends less dividends attributed to the Company's shares owned by associates accounted for using the equity method.

(3) The number of shares subject to the exercises of stock options whose exercise period has already arrived as of March 31, 2018

4th stock options	347,500 shares
5th stock options	2,634,000 shares
7th stock options	3,197,300 shares
8th stock options	40,500 shares
Yen-based Convertible bond-type Euro bonds with subscription rights to shares due 2020	15,463,917 shares
Yen-based Convertible bond-type Euro bonds with subscription rights to shares due 2022	15,789,473 shares
Total	37,472,690 shares

6. Financial Instruments

(1) Financial instruments

Risks of financial instruments and risk management system for the risks are as follows:

1) Market risk management

The Group's businesses are exposed mainly to risks of changing economic and financial market environments. Risks of changing financial market environments include (i) currency risk, (ii) interest rate risk, (iii) price risk of equity instruments and (iv) price risk of merchandise.

(i) Currency risk

Currency risk arises from transactions undertaken by the Group companies in currencies other than the functional currency. It may affect selling prices and revenue of finished goods denominated in foreign currencies.

The Group manages such currency risk arising from foreign currency transactions by utilizing foreign exchange forward contracts and cross-currency interest rate swaps.

(ii) Interest rate risk

Since the Group companies borrow funds at both fixed and floating interest rates, those at floating interest rates are exposed to interest rate risk. To mitigate this risk, the Group maintains an appropriate mix of fixed and floating interest rate borrowings, and also utilizes interest rate swaps and cross-currency interest rate swaps.

(iii) Price risk of equity instruments

Price risk of equity instruments arises from equity instruments (shares) that the Group holds mostly to strengthen relationships with counterparties.

To manage the price risk, the Group regularly analyzes market values and financial conditions of issuers and reconsiders its portfolio if necessary.

(iv) Commodity price risk

The Group enters into commodity swap contracts to manage and mitigate risks arising from price changes of raw materials (mainly aluminum ingots and copper).

2) Credit risk management

Trade and other receivables arising from the Group's business transactions are exposed to credit risk of its counterparties.

To manage credit risk, the Group sets credit limits and regularly monitors credit status and operations of its counterparties. As it is necessary to minimize potential risks, such as concentrations of credit risk and the counterparty's failure to make payments, the Group adjusts credit limits based on the results of such monitoring. The Group also takes security measures, such as collateral and guarantees depending on the credit status of the counterparties. Since the Group's customer base is broad and not interrelated, the Group is not exposed to excessive risk of customer concentrations.

Derivative transactions are restricted to high credit rating financial institutions to minimize credit risk.

The carrying amount of financial instruments exposed to credit risk and the amount of guarantee obligations disclosed in Note (4)"Contingent liabilities" of Note 3 "Notes to Consolidated Statement of Financial Position" represent the maximum exposure to credit risk at the fiscal year end without considering the value of collateral held by the Group.

3) Liquidity risk management

The Group raises funds by issuing bonds, borrowings and other means. These liabilities are exposed to liquidity risk, such as failure to repay by the due date because of deteriorating funding environments. To mitigate this risk, the Group develops and revises funding plans on a timely basis, and maintains ample cash balances and credit lines from financial institutions.

(2) Fair value of financial instruments

Carrying amount and fair value of financial instruments as well as their differences as of March 31, 2018 are as follows:

(Millions of yen)

	Carrying amount	Fair value	Difference
Assets			
Loans and receivables	41,135	42,526	1,391
Liabilities			
Financial liabilities measured at amortized cost			
Bonds and borrowings	687,909	692,978	5,069
Other financial liabilities	29,631	29,881	250

Notes: 1. Assets and liabilities with carrying amounts which approximate fair value or those measured at fair value on a recurring basis are not included in the table.

2. Loans and receivables are recognized in other financial assets in the consolidated statement of financial position.

3. The fair value measurement approach is as follows:

Loans and receivables, bonds and borrowings, and other financial liabilities measured at amortized cost	Measured at present value using a discount rate, adjusted for credit risks of the Group or its counterparties.

7. Investment Property

Certain subsidiaries own investment property in Tokyo and other areas in Japan. The carrying amount and fair value of the investment property as of March 31, 2018 are as follows:

(Millions of yen)

Carrying amount	7,787
Fair value	7,885

Notes: 1. Carrying amount of investment property represents historical cost less accumulated depreciation and impairment losses.

2. Fair value of investment property is mainly determined by external real estate appraisers using the discounted cash flow method or referring to market prices of similar assets.

8. Per Share Information

(1) Equity attributable to owners of the parent per share 2,128.77 yen

(2) Basic earnings per share

Continuing operations 230.04 yen

Discontinued operations -40.91 yen

Total 189.13 yen

9. Notes to Subsidiary

(1) Public offering with concurrent, sale of shares of LIXIL VIVA, and its issuance of new shares

LIXIL VIVA CORPORATION ("LIXIL VIVA"), a consolidated subsidiary of the Company, was listed on the first section of the Tokyo Stock Exchange on April 12, 2017. LIXIL VIVA was a wholly-owned subsidiary of the Company. Concurrently with the public offering, the Company sold a portion of its LIXIL VIVA ordinary shares, and LIXIL VIVA raised funds through issuance of new shares through the public offering.

As a consequence of the above transactions, the Company continues to hold 52% of LIXIL VIVA's total number of shares issued. The transactions represent partial sale of the subsidiary's shares, and the Company keeps a control in the subsidiary. As a result of the transaction, capital surplus and non-controlling interests have increased as follows:

(Millions of yen)

Increase in capital surplus	14,348
Increase in non-controlling interests	25,095

(2) Grohe Dawn Watertech Holdings Propriety Limited becoming a wholly-owned subsidiary

LIXIL Corporation, a consolidated subsidiary of the Company, acquired 49% of shares of Grohe Dawn Watertech Holdings Propriety Limited ("GDWT"), a consolidated subsidiary of the Company. As a consequence, GDWT became a wholly-owned subsidiary of the Group.

The transaction represents an additional acquisition of existing shares of a subsidiary, which the Group already had the control in the subsidiary. An increase in capital surplus and decrease in non-controlling interests related to the above transaction are as follows:

(Millions of yen)

Increase in capital surplus	2,025
Decrease in non-controlling interests	4,371

(3) Share transfer of LIXIL-Haier Housing Products (Qingdao) Co., Ltd.

1) Main reason for the transfer

Haier Group, a major home electrical appliance maker in China, has embarked on its "Big Kitchen" strategy, aimed at strengthening its global kitchens business platform. The Group agreed to support this strategy by transferring its equity in LIXIL-Haier Housing Products (Qingdao) Co., Ltd. to Haier Group. The transfer of these shares is in line with efforts at the Group to optimize its business portfolio to enhance operational efficiency and strength financial conditions. This transaction also aligns with the Company's ongoing efforts to simplify its business structure, enabling further synergies and efficiencies across its global organization.

2) Name of transferee company and date of share transfer

Name of the transferee company	Qingdao Haier Kitchen Facilities Co., Ltd.
Date of share transfer	December 25, 2017

3) Name of transferred company and major business

Name	LIXIL-Haier Housing Products (Qingdao) Co., Ltd.
Major business	Manufacturing of home building materials

4) Overview of transfer

Ratio of shares held before the transfer	51%
Ratio of shares transferred	51%
Ratio of shares held after the transfer	-%
Received amount	446 million Chinese yuan (7,696 million yen)
Gain on share transfer	5,068 million yen gain was recognized as a gain on sale of subsidiaries in finance income in the Consolidated Statement of Profit or Loss for the year ended March 31, 2018

10. Discontinued Operations

Transfer of shares of Permasteelisa S.p.A.

The Company resolved at the Board of Directors Meeting held on August 21, 2017 to sell 100% of the shares of Permasteelisa S.p.A. ("Permasteelisa") held by its wholly-owned subsidiary LIXIL Corporation ("LIXIL") to Grandland Holdings Group Limited ("Grandland"), and signed off on a share transfer agreement on the same date. Since this share transfer is subject to approvals from regulatory bodies in relevant countries, date of actual share transfer is not fixed yet.

Because of the above decision, on the premise of obtaining the approvals, all the revenue, income (loss), and other items of Permasteelisa and its subsidiaries are classified to the discontinued operations in the consolidated financial statements.

(1) Main reason for the transfer

The Group has focused on optimizing its business portfolio in line with broader steps to enhance operational efficiencies and strengthen financial conditions. The transaction is also in line with the Company's ongoing efforts to simplify the business structure, enabling further synergies and efficiencies through enhanced integration.

Permasteelisa is a world leader in the engineering, project management, manufacturing and installation of curtain wall and interior systems, and has positioned high-end curtain walls at the core of its business. Permasteelisa has established a solid position in markets around the world including Europe, Asia and North America.

However, there are many differences between Permasteelisa and the Company's businesses in terms of management, especially in its cycle of businesses and the types and range of risks. For this reason, the Company concluded a contract for the share transfer of Permasteelisa to Grandland, which is a leading high-quality and service oriented architectural decoration enterprise in China.

(2) Name of the transferee company and date of share transfer

Name of the transferee company	Grandland Holdings Group Limited
Date of share transfer	Share will be transferred as soon as the approvals from the regulatory bodies in the relevant countries are obtained

(3) Name of transferred company and major business

Name	Permasteelisa S.p.A.
Major business	Design and build architectural envelopes, interiors and complex forms

(4) Overview of the transfer

Numbers of shares held before the transfer	25,613,544 shares (Voting right ratio: 100%)
Number of shares transferred	25,613,544 shares
Number of shares held after the transfer	-share (Voting right ratio: - %)
Consideration received	168 million euros (Note) 1,2 (21,875 million yen, the amount is converted at 1 Euro = 130.52 Yen)
Relationship with the Company after the share transfer (Note) 3	80 million euros will be loaned by LIXIL to Grandland on the date of share transfer. The final maturity date is 5 years from the date of the share transfer.

Note: 1. 25 million euros (3,224 million yen) was received as a part of the sales price during the year ended March 31, 2018.

2. The ultimate sales price of the shares will be determined at the date of share transfer after the adjustments due to the changes of premise occurred by the date of share transfer. 81 million euros out of the sales price are recognized as accounts receivable-other at the date of the share transfer, and the amounts will be collected depending on Permateelisa's progression of the collection of part of receivables for construction.

3. In addition to the loans from LIXIL to Grandland described above, there is a possibility that the Company may recognize a loss due to results of certain legal disputes and/or collectability of receivables for construction on certain construction projects (contingent liabilities). The maximum amount of the loss is estimated to be approximately 220 million euros (or approximately 29,000 million yen) as of the year ended March 31, 2018.

(5) Assets and liabilities related to discontinued operations

Assets and liabilities related to discontinued operations are as follows:

	Millions of yen
Assets related to discontinued operations	
Cash and cash equivalents	5,212
Trade and other receivables	55,511
Inventories	4,167
Construction contract assets	61,200
Property, plant and equipment	12,135
Goodwill and other intangible assets (Note)	19,690
Deferred tax assets	6,715
Other financial assets (current)	3,265
Other current assets	11,326
Other assets	987
Total	**180,208**
Liabilities related to discontinued operations	
Trade and other payables	38,041
Bonds and borrowings (current)	16,110
Construction contract liabilities	25,416
Income tax payables	2,670
Net defined benefit liabilities	3,661
Deferred tax liabilities	9,848
Other financial liabilities (current)	1,054
Other current liabilities	27,953
Other liabilities	2,704
Total	**127,457**

Note: Goodwill and other intangible assets include customer-related assets and technology-based assets, which were recognized through the purchase price allocation at the acquisition date. The book value of goodwill was 20,724 million yen immediately before the reclassification of all the assets and liabilities of Permasteelisa and its subsidiaries, which was reevaluated at the fair value less costs to sell. The recognized loss due to the reevaluation is presented under loss for the year ended March 31, 2018 from discontinued operations.

(6) Profit and loss related to discontinued operations

Profit and loss related to discontinued operations are as follows:

	Millions of yen
Revenue	164,527
Loss recognized on the measurement to fair value, less costs to sell the disposal group constituting the discontinued operations (Note)	△21,867
Other profit and loss	△167,557
Profit before tax from Discontinued operations	△24,897
Income tax expenses	
Income tax expenses from operations	△727
Income tax expenses from the loss recognized on the measurement to fair value, less costs to sell the disposal group and on the relevant expenses on the disposal of the disposal group classified to the discontinued operations (Note)	13,836
Total income tax expenses	13,109
Loss for the year from discontinued operations	△11,788

Note: Loss (net of tax) recognized in the current year on the measurement to fair value, less costs to sell the disposal group and the relevant expenses on the disposal of the disposal group classified to the discontinued operations was 8,031 million yen.

11. Additional Information

Consolidated taxation system

During the year ended March 31, 2018, the Company and its wholly-owned domestic subsidiaries in Japan filed a request of the adoption of the consolidated taxation system. As a consequence, the Company has accounted for deferred tax based on the application of the consolidated taxation system from the year ended March 31, 2018. The amount of income tax expenses for continuing operation in the Consolidated Statement of Profit or Loss decreased by 4,356 million yen, and the Earning per share increased by 15.10 yen.

12. Other Notes

Figures less than one million yen are rounded down to the nearest million yen.

Notes to Nonconsolidated Financial Statements

1. Significant Accounting Policies

(1) Valuation standards and methods for securities

1) Investments in subsidiaries and associates

Stated at cost determined by the moving-average method.

2) Available-for-sale securities

Marketable securities

Stated at fair value at the end of the fiscal year. Unrealized gains or losses, net of applicable income taxes, are directly included in net assets. Costs of securities sold are determined by the moving-average method.

Non-marketable securities

Stated at cost determined by the moving-average method.

(2) Depreciation method of non-current assets

1) Property, plant and equipment other than leased assets

Depreciated under the declining-balance method.

2) Leased assets

Leased assets regarding finance leases which do not transfer ownership

Depreciated over the lease term using the straight-line method with no residual value.

(3) Provisions

Provision for bonuses

An accrual is provided for the payment of employees' bonuses based on the expected amount to be paid.

(4) Accounting for convertible bonds with subscription rights to shares

Proceeds from the issuance of convertible bonds with subscription rights to shares are not allocated between the bond portion and the subscription right portion, but are accounted for as straight bonds.

(5) Accounting for consumption tax

Transactions subject to consumption tax are recorded at amounts exclusive of consumption tax.

2. Changes in Presentations

Changes according to early adoption of "Partial Amendments to Accounting Standard for Tax Effect Accounting"

The Company has early adopted ASBJ Statement No.28 "Partial Amendments to Accounting Standard for Tax Effect Accounting" issued on February 16, 2018, from the fiscal year ended March 31, 2018.

Consequently, all deferred tax assets and liabilities have been changed to be classified into investments and other assets in the non-current assets and the non- current liabilities respectively.

In addition, valuation allowance has been separated into "valuation allowance for tax loss carryforwards" and "valuation allowance for deductible temporary difference" in Note6 "Deferred Tax Assets and Deferred Tax Liabilities"- in accordance with paragraph 4 of "Partial Amendments to Accounting Standards for Tax Effect Accounting"

3. Notes to Nonconsolidated Balance Sheet

(1) Accumulated depreciation on property, plant and equipment 16 million yen

(2) Guaranteed obligations

The Company guarantees transfer receivables arising from factoring service and loans payable of the following subsidiary or associate:

LIXIL Group Finance Corporation	77,610 million yen

The Company guarantees deposits received by the following subsidiary or associate:

LIXIL Corporation	264 million yen

The Company guarantees performance obligations related to construction contracts of the following subsidiary or associate:

Josef Gartner GmbH	16,494 million yen

The Company guarantees loans payable of the following subsidiary or associate:

Grohe Holding GmbH	14,966 million yen

(3) Receivables from and payables to subsidiaries and associates

Short-term receivables	192,409 million yen
Short-term payables	2,108 million yen

4. Notes to Nonconsolidated Statement of Income

(1) Transactions with subsidiaries and associates

Operating transactions	
Dividend income	2,323 million yen
Management fee income	3,049 million yen
Other operating revenue	1,178 million yen
Non-operating transactions	991 million yen

(2) Gain on sale of investments in subsidiaries and associates

The Company sold part of shares of LIXIL VIVA CORPORATION, which is a consolidated subsidiary, accordingly, a gain amounting to 24,075 million yen was recognized as "Gain on sale of investments in subsidiaries and associates" in extraordinary income.

5. Notes to Nonconsolidated Statement of Changes in Equity

Class and number of treasury shares as of March 31, 2018

Ordinary shares	23,263,729 shares

6. Deferred Tax Assets and Deferred Tax Liabilities

Major components of deferred tax assets and deferred tax liabilities

Deferred tax assets	
Loss on valuation of investments in subsidiaries and associates	2,869 million yen
Tax loss carryforwards	2,981 million yen
Loss on valuation of investment securities	510 million yen
Loss on sale of investments in subsidiaries and associates	109 million yen
Other	625 million yen
Subtotal	7,096 million ye
Less: valuation allowance for tax loss carryforwards	(580) million yen
Less: valuation allowance for deductible temporary difference	(3,922) million yen
Subtotal	(4,503) million yen
Total	2,593 million yen
Deferred tax liabilities	
Unrealized gain on available-for-sale securities	(1,926) million yen
Gain on sale of investments in subsidiaries and associates	(961) million yen
Other	(0) million yen
Total	(2,888) million yen
Net deferred tax liabilities	(294) million yen

(Additional Information)

Consolidated taxation system

During the fiscal year, the Company filed a request of approval for the adoption of the consolidated taxation system, and the application of the consolidated taxation system is to be effective from the next fiscal year. Therefore, in accordance with the "Practical Solution Tentative Treatment of Tax Effect Accounting Under Consolidated Taxation System (Part 1) (ASBJ PITF No.5,January 16, 2015)" and the "Practical Solution on Tentative Treatment on Tax Effect Accounting Under Consolidated Taxation System (Part 2) (ASBJ PITF No.7,January 16, 2015)", the Company has accounted for deferred taxes based on the application of the consolidated taxation system from the year ended March 31, 2018.

As a result, the amount of income taxes-Deferred decreased by 2,593 million yen, and the Earning per share increased by 8.99 yen.

7. Related Party Transactions

(1) Subsidiaries and associates

(Millions of yen)

Type	Name of company	Share of voting rights owned by the Company /(owned by the related party)	Relationship with the related party	Transaction	Transaction amount	Account	Balance as of March 31, 2018
Subsidiary	LIXIL Corporation	Directly owned 100%	Control and management by holding shares Concurrent post of directors	Acceptance of seconded employees (Note 1)	447	Accrued expenses	34
				Receipt of management fees (Note 2)	2,877	Other receivables	258
Subsidiary	LIXIL Group Finance Corporation	Directly owned 100%	Control and management by holding shares Concurrent post of directors	Lending of funds (Note 3)	192,035	Short-term loans receivable	192,035
				Receipt of interest income (Note 3)	835	Other receivables	67

Terms and conditions of the transactions and policies for determining the terms and conditions

Note: Exercised subscription rights to shares are those exercised in the current year based on the resolutions of Board of Directors on April 17, 2012 and April 15, 2013. Transaction amounts are calculated by multiplying the shares granted in exercising subscription rights by amounts paid.

8. Per Share Information

(1) Net assets per share	1,710.36 yen
(2) Earnings per share	82.16 yen

9. Business Combination

Absorption-type merger of a GraceA Co.,LTD.

(1) Overview of transaction

1) Name and business description of absorbed company

Name of absorbed company	GraceA Co.,Ltd.
Description of business	Management and advices on the business activities of GROHE Group S.à r l., and other related business arisen after the acquisition of GROHE.

2) Date on which business combination was effected

March 2, 2018

3) Legal form of business combination

An absorption-type merger, with the Company as the surviving company, and GraceA Co.,Ltd. as the absorbed company.

4) Name of company after business combination

LIXIL Group Corporation

5) Main reason for business combination

The Company is continually seeking to refine its business portfolio in order to enhance operational efficiency and strengthen financial conditions and governance.

As part of this, the Company converted the ownership of GROHE Group S.à r.l., ASD Holding Corp., and LIXIL INTERNATIONAL Pte Ltd., from indirect holding through LIXIL Corporation to direct holdings, and merged by absorption with GraceA Co.,Ltd., in the fiscal year ended March 31,2018, with the aim of further simplifying its business structure, strengthening governance, and enhancing operational efficiency.

(2) Overview of accounting treatment

The business combination was accounted for as a transaction under common control, in accordance with ASBJ Statement No 21, "Accounting Standard for Business Combinations" and ASBJ Guidance No.10, "Guidance on Accounting Standard for Business Combinations and Accounting Standard for Business Divestitures", issued on September 13, 2013.

As a result of the business combination, a gain amounting to 45 million yen was recognized as "Gain on extinguishment of tie-in shares" in extraordinary income in Nonconsolidated Statement of Income for the year ended March 31,2018.

10. Consolidated Dividend Regulations

The Company is subject to consolidated dividend regulations, meaning that it calculates the distributable amount for dividends on a consolidated basis.

11. Other Notes

Figures less than one million yen are rounded down to the nearest million yen.
