Synspective Signs Agreement on the Use of Satellite Imagery During Disasters with NTT DOCOMO and NTT DATA

We are pleased to announce that Synspective Inc. signed an “Agreement on the Use of Satellite Imagery During Disasters” with NTT DOCOMO, Inc. and NTT DATA Japan. Under the agreement, the three companies will work together to support faster, broader assessment of disaster-affected areas and the restoration of communication infrastructure.

Under this agreement, satellite imagery, which enables broad, area-wide assessment, will be used to evaluate conditions such as flooding, landslides, and road passability from above, even when on-site access is difficult due to road closures, power outages, or severe weather. By complementarily using optical satellite imagery, which provides intuitive visual clarity, and SAR satellite imagery, which can observe the ground at night or through bad weather, the initiative aims to enable rapid assessment of disaster conditions, identify recovery routes, and achieve the early restoration of communication services.
