Net changes of items other than shareholders' equity	3,294	—	3,294	3,294
Total change during the period	3,294	—	3,294	7,376
Balance at the end of the current period	13,055	16,995	30,050	104,900

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

[Basis of presenting consolidated financial statements]

1. Basis of consolidation:

(1) Consolidated subsidiaries: 4

Names of the consolidated subsidiaries: Heiwa Service Co., Ltd., Housing Service Co., Ltd., HEIWA REAL ESTATE Asset Management CO., LTD., The Tokyo Shoken Building Incorporated

Charites Y.K., a former consolidated subsidiary, is excluded from the scope of consolidation from the current consolidated fiscal year due to a decrease in materiality.

(2) Names, etc. of major non-consolidated subsidiaries

Major non-consolidated subsidiaries

Kabutocho Heiwa Bldg. No. 3 Co., Ltd.

(Reason for exclusion from the scope of consolidation)

All non-consolidated subsidiaries are small-scale businesses whose combined total assets, net sales, net income/loss (corresponding to the equity owned by the Company), and retained earnings (corresponding to the equity owned by the Company) have no significant effect on the overall results of the consolidated financial statements.

2. Basis of applying the equity method:

(1) Names of major non-consolidated subsidiaries or affiliates not accounted for using the equity method

Kabutocho Heiwa Bldg. No. 3 Co., Ltd.

(2) Reason for exclusion from application of equity method accounting

A non-consolidated subsidiary or affiliate not accounted for using the equity method is excluded from the scope of application of equity method accounting due to the minimal effect that the exclusion has on the consolidated financial statements, taking into account its relatively low net income/loss (corresponding to the equity owned by the Company), retained earnings (corresponding to the equity owned by the Company), etc., and its relative immateriality as a whole in the context of the consolidated financial statements.

3. Matters pertaining to accounting policies:

(1) Method and basis of valuation of assets:

1) Marketable securities and other investments-

Held-to-maturity bonds: Held-to-maturity bonds are valued at cost, with cost being determined using the amortized cost method (straight-line method).

Other marketable securities and investments:

a. Securities with market quotations:

Market value method based on the market price as of the settlement date of the consolidated fiscal term. (Differences in valuation are included directly in net assets and costs of securities sold are calculated using the moving-average method.)

b. Securities without market quotations:

Securities without market quotations are mainly valued at cost, determined using the moving-average method.

2) Inventory -

Inventories are valued at cost, determined by the specific identification method. (The value on the consolidated balance sheet is appraised by the write-down of the book value of inventories based on the deterioration of profitability.)

(2) Depreciation method for fixed assets:

1) Tangible fixed assets (excluding lease assets) -

Depreciation of tangible fixed assets is computed using the declining balance method, except for the Tokyo Stock Exchange Building and two other buildings, buildings (excluding attached facilities) acquired on or after April 1, 1998, and attached facilities and structures acquired on or after April 1, 2016, all of which are computed using the straight-line method. Depreciation of consolidated subsidiary's tangible fixed assets is computed using the straight-line method. The principal useful lives of tangible fixed assets are as follows.

Buildings and structures	8-50 years
Machinery, equipment, and vehicles	6-10 years
Tools, furniture and fixtures	5-15 years

2) Intangible fixed assets (excluding lease assets) -

Amortization of intangible fixed assets is computed using the straight-line method. The cost of software for internal use is amortized using the straight-line method based on the expected useful life of the software (five years).

3) Lease assets -

Lease assets are depreciated using the straight-line method over the lease period.

(3) Method of accounting of deferred assets:

Bond-issuing expenses are amortized using the straight-line method over the period until bond redemption.

(4) Principles for providing accruals and reserves:

1) Allowance for doubtful accounts -

An allowance for doubtful accounts is provided to cover losses on bad debt at an amount estimated based on historical write-off ratio plus any amounts deemed necessary to cover possible losses on an individual accounts basis.

2) Accrued bonuses for directors -

The accrual for bonuses to directors is calculated based on the estimated payment basis.

3) Accrued bonuses -

The accrual for bonuses to employees is calculated based on the estimated payment basis.

(5) Method of important hedge accounting:

1) Method of hedge accounting -

The special treatment applies to interest rate swaps because they meet the requirements.

2) Hedging instruments and hedged items -

Hedging instruments: interest rate swaps

Hedged items: interest rates of loans payable

3) Policy of hedging transactions -

Interest rate swap transactions are conducted to reduce the exposure to fluctuations in the interest rates of loans payable.

4) Method for assessing the hedge effectiveness -

The assessment of hedge effectiveness on the closing date is omitted because interest rate swaps meet the requirements for receiving special treatment.

(6) Other basic matters for the preparation of consolidated financial statements:

1) Accounting for retirement benefit -

Net defined benefit liability is calculated at an amount equal to the projected benefit obligation as of the end of the current consolidated fiscal year minus the fair value of pension assets. Net defined benefit liability is not calculated at any consolidated subsidiary that has a defined contribution retirement plan.

2) Accounting for consumption taxes -

Profit and loss accounts are stated net of consumption tax. Where consumption taxes paid are not fully credited against consumption taxes received, the non-credited portion is charged as an expense in the consolidated period under review in which the consumption taxes are paid.

[Additional information]

(Changes in the Purpose of Asset-holding)

Land and buildings and structures of ¥264 million, items previously recorded in fixed assets, are transferred to real estate for sale at the end of the consolidated fiscal year under review due to a change in the purpose of asset-holding.

[Notes to the consolidated balance sheet]

1. Accumulated depreciation of tangible fixed assets ¥84,285 million

2. Guarantees due from the Company

   The Company-guaranteed loans owed by employees to financial institutions are as follows:

Housing loans for employees of Heiwa Real Estate Co., Ltd.	¥312 million

3. Revaluation of land

   Pursuant to the Act on Revaluation of Land (Act No. 34 of March 31, 1998) and the Act for Partial Revision of the Act on Revaluation of Land (Act No. 19 of March 31, 2001), the Company revaluated its land held for business. Corporation taxes equivalent to net unrealized gains are reported as "deferred tax liabilities concerning revaluation" in liabilities, and the net unrealized gains, the net of deferred taxes, are reported as "land revaluation surplus" in net assets.

   (Method of revaluation)

   Fair values are determined by applying appropriate adjustments to values computed by the method published by the Commissioner of the National Tax Agency for the calculation of land values that serve as the basis for taxable amounts of land-holding tax set forth in Article 16 of the Land-holding Tax Act as set forth in Article 2, Item 4 of the Order for Enforcement of Act on Revaluation of Land (Cabinet Order No. 119 of March 31, 1998).

   (Date of the revaluation) March 31, 2001

   (Difference between fair values at the fiscal year-end and book values after the revaluation of the land revaluated)

   As the fair values of the revalued land exceed the book values of the land after the revaluation at the end of current consolidated fiscal year, the difference between them is not stated.

[Notes to the consolidated statements of changes in net assets]

1. Shares issued

Common shares	40,059,996 shares

2. Treasury stock

Common shares	174,783 shares

3. Distribution of surplus

(1) Payments of dividends

1) The following was resolved and approved at the Ordinary General Shareholders' Meeting held on June 27, 2017.

Distribution of common shares

・Total amount of distribution	¥518 million
・Distribution per share	¥13
・Record date	March 31, 2017
・Effective date	June 28, 2017

2) The following was resolved and approved at the Board of Directors' meeting held on October 31, 2017.

Distribution of common shares

・Total amount of distribution	¥678 million
・Distribution per share	¥17
・Record date	September 30, 2017
・Effective date	December 1, 2017

(2) Dividends with a record date falling in the current consolidated fiscal year and an effective date falling in the following consolidated fiscal year

We will propose the following agenda for the Ordinary General Shareholders' Meeting to be held on June 26, 2018.

Distribution of common shares

・Total amount of distribution	¥797 million
・Source of distribution	Retained earnings
・Distribution per share	¥20
・Record date	March 31, 2018
・Effective date	June 27, 2018

[Notes to financial instruments]

1. Financial instruments

   The Group limits fund management to short-term deposits, etc. and procures funds by borrowing money from banks and other financial institutions.

   Among investment securities, the fair value of listed securities is assessed on a quarterly basis.

   Loans payable are used for working capital (chiefly for short-term purposes) and funds for capital investments (for long-term purposes). The Company fixes interest expenses by applying interest rate swap transactions to a portion of the long-term loans payable with interest rate volatility risk.

2. Fair value, etc. of financial instruments

   The balance sheet amount, the fair value, and the difference between the two were as follows as of March 31, 2018 (settlement date of the current consolidated fiscal year):

(In millions of yen)

	Consolidated balance sheet amount (*)	Market value (*)	Difference
(1) Cash and deposits	12,884	12,884	–
(2) Accounts receivable – trade	956	956	–
(3) Marketable securities	409	409	(0)
(4) Investment securities	29,427	29,431	4
(5) Notes payable and accounts payable – trade	(1,698)	(1,698)	–
(6) Bonds	(24,939)	(25,276)	(336)
(7) Short-term loans payable	(2,250)	(2,250)	–
(8) Long-term loans payable	(128,597)	(131,611)	(3,014)
(9) Derivative transactions	–	–	–

(*) Figures in parentheses are presented in Liabilities.

(Notes)

1. Method for calculating the fair value of financial instruments, and matters related to marketable securities and derivative transactions

   (1) Cash and deposits and (2) Accounts receivable – trade

   Because their market value is almost equal to their book value due to settlement in short periods, they are posted at their book value.

   (3) Marketable securities and (4) Investment securities

   The market value of a share, etc. is based on a price on an exchange, while that of a bond is either based on a price on an exchange or a price quoted by a financial institution, etc.

   (5) Notes payable and accounts payable – trade

Because their market value is almost equal to their book value due to settlement in short periods, they are posted at their book value.

(6) Bonds

The market value of bonds is posted at the present value of the bonds and is equal to the total of capital and interests discounted by the remaining terms and interest rates adjusted for credit risk.

(7) Short-term loans payable

Because their market value is almost equal to their book value due to settlement in short periods, they are posted at their book value.

(8) Long-term loans payable

The market value of long-term loans payable is calculated by discounting the total principal and interest by the assumed interest rate for a new borrowing under the same terms and conditions. Long-term loans payable with floating rates are subject to exceptional treatment for interest-rate swaps (Refer to (9) below). Accordingly, they are calculated by discounting the total of principal and interest accounted for as a unit with the interest-rate swap by an assumed interest rate reasonably estimated for a borrowing under the same terms and conditions.

(9) Derivative transactions

A derivative transaction subject to exceptional treatment for interest-rate swaps is accounted for as a unit together with long-term loans payable subject to hedge. For this reason, the market value of such a transaction is included in the fair value of the long-term loans payable (Refer to (8) above).

2. The market value of unlisted investment securities, etc. (amount on consolidated balance sheet: ¥5,122 million) is considered to be quite difficult to calculate, as there are no market prices and no valuations of future cash flows. For this reason, they are not included in (4) Investment securities.
3. The market value of operating investments (amount on consolidated balance sheet: ¥426 million) is considered to be quite difficult to calculate, as there are no market prices. For this reason, they are not subject to the disclosure of market value.
4. Long-term deposits received and landlord deposits (amount on consolidated balance sheet: ¥20,637 million) have no market prices, and their cash flows are considered quite difficult to reasonably estimate due to the difficulty in calculating substantial lease periods from the start of occupation by lessees to the dates of evacuation. For this reason, they are not subject to the disclosure of market value.

[Notes to lease properties, etc.]

1. Lease properties, etc.

The Company and some subsidiaries own lease office buildings, lease commercial facilities, and lease housing, etc. in Tokyo and other areas.

2. Market value of lease properties, etc.

・Amount on the consolidated balance sheet	¥230,671 million
・Market value	¥316,327 million

(Notes)

1. The consolidated balance sheet amount is equal to the acquisition cost minus the accumulated depreciation and accumulated impairment loss.
2. The market value of principal properties, at the end of current consolidated fiscal year are based on the standards of real property appraisal by independent real property appraisers, and those of other real estate units at the end of this term are calculated by the Company based on the Real Estate Appraisal Standard (including that adjusted using indexes, etc.)

[Per share data]

Net assets per share	¥2,630.07
Net income per share	¥132.57

[Subsequent events]

Acquisition of own shares

The Company decided at the Board of Directors meeting held on April 26, 2018 that the Company would acquire its own shares in accordance with the provisions of Article 156 that are applied by the deemed replacement of terms pursuant to the provisions of Article 165, Paragraph 3 of the Companies Act.

1. Reason for the acquisition of own shares

To ensure more efficient use of capital and reward shareholders.

2. Terms and conditions for the acquisition

(1) Class of shares to be acquired: common stock of the Company

(2) Total number of shares to be acquired: 1.2 million shares (upper limit)
(Ratio to the number of outstanding shares (excluding treasury shares)): 3.01%)

(3) Aggregate amount of acquisition cost: ¥3.0 billion (upper limit)

(4) Period of acquisition: From April 27, 2018 to October 31, 2018

[Other notes]

Impairment loss

Location	Principal use	Category	Impairment loss
Higashiosaka-city, Osaka	Store	Land	¥233 million
Other	Other	Land	¥16 million

The Group recorded impairment loss on the above asset groups in this consolidated fiscal year. In calculating impairment loss, the Group bundles assets based on the minimum unit generating cash flows in a manner largely independent of cash flows provided by other assets or asset groups.

The book values of real properties, etc. for lease with declines in profitability were written down to a recoverable amount. The Group recorded the amount written off as impairment loss in extraordinary loss (¥249 million) in the current consolidated fiscal year.

The recoverable amounts of the above asset groups are determined by net sales values and calculated by the Company based on salable values and other criteria, etc. considered to reflect market prices appropriately.

NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS

[Matters pertaining to significant accounting policies]

1. Method and basis of valuation of assets:

(1) Method and basis of valuation of marketable securities and other investments -

1) Held-to-maturity bonds: Held-to-maturity bonds are valued at cost, with cost being determined using the amortized cost method (straight-line method).

2) Stocks of subsidiaries and affiliates:

Securities without market quotations are valued at cost, determined using the moving-average method.

3) Other marketable securities and investments:

a. Securities with market quotations:

Market value method based on the market price as of the settlement date of the consolidated fiscal term. (Differences in valuation are included directly in net assets and costs of securities sold are calculated using the moving-average method.)

b. Securities without market quotations:

Securities without market quotations are valued at cost, determined using the moving-average method.

(2) Method and basis of valuation of inventory -

Inventories are valued at cost, determined using the specific identification method.
(The value on the non-consolidated balance sheet is appraised by the write-down of the book value of inventories based on the deterioration of profitability.)

2. Depreciation method for significant fixed assets:

(1) Tangible fixed assets -

Depreciation of tangible fixed assets is computed using the declining balance method, except for the Tokyo Stock Exchange Building and two other buildings, buildings (excluding attached facilities) acquired on or after April 1, 1998, and attached facilities and structures acquired on or after April 1, 2016, all of which are computed using the straight-line method.
Depreciation of subsidiary's tangible fixed assets is computed using the straight-line method.
The principal useful lives of tangible fixed assets are as follows.

Buildings and structures	8-50 years
Machinery, equipment, and vehicles	6-10 years
Tools, furniture and fixtures	5-15 years

(2) Intangible fixed assets -

Amortization of intangible fixed assets is computed using the straight-line method. The cost of software for internal use is amortized using the straight-line method based on the expected useful life of the software (five years).

3. Method of accounting of deferred assets:

Bond-issuing expenses are amortized by the straight-line method over the period until bond redemption.

4. Principles for providing accruals and reserves:

(1) Allowance for doubtful accounts -

An allowance for doubtful accounts is provided to cover losses on bad debt at an amount estimated based on historical write-off ratio plus any amounts deemed necessary to cover possible losses on an individual accounts basis.

(2) Accrued bonuses for directors -

The accrual for bonuses to directors is calculated based on the estimated payment basis.

(3) Accrued bonuses -

The accrual for bonuses to employees is calculated based on the estimated payment basis.

(4) Accrued severance indemnities for employees -

Accrued severance indemnities for employees are calculated at an amount equal to the projected benefit obligation minus the fair value of pension assets.

5. Method of important hedge accounting:

(1) Method of hedge accounting -

The special treatment applies to interest rate swaps because they meet the requirements.

(2) Hedging instruments and hedged items -

Hedging instruments: interest rate swaps

Hedged items: interest rates of loans payable

(3) Policy of hedging transactions -

Interest rate swap transactions are conducted to reduce the exposure to fluctuations in the interest rates of loans payable.

(4) Method for assessing the hedge effectiveness -

The assessment of hedge effectiveness on the closing date is omitted because interest rate swaps meet the requirements for receiving special treatment.

6. Other basic matters for the preparation of non-consolidated financial statements:

Accounting for consumption taxes -

Profit and loss accounts are stated net of consumption tax. Where consumption taxes paid are not fully credited against consumption taxes received, the non-credited portion is charged as an expense in the period in which the consumption taxes are paid.

[Additional information]

(Changes in the Purpose of Asset-holding)

Land and buildings of ¥264 million, items previously recorded in fixed assets, are transferred to real estate for sale at the end of the fiscal year under review due to a change in the purpose of asset-holding.

[Notes to the non-consolidated balance sheet]

1. Accumulated depreciation of tangible fixed assets ¥78,190 million
2. Guarantees due from the Company

   The Company-guaranteed loans owed by employees to financial institutions are as follows:

Housing loans for employees of Heiwa Real Estate Co., Ltd.	¥312 million

3. Assets or debts due from or to subsidiaries and affiliates

Assets	¥33 million
Debts	¥2,218 million

4. Revaluation of land

   Pursuant to the Act on Revaluation of Land (Act No. 34 of March 31, 1998) and the Act for Partial Revision of the Act on Revaluation of Land (Act No. 19 of March 31, 2001), the Company revaluated its land held for business. Corporation taxes equivalent to net unrealized gains are reported as "deferred tax liabilities concerning revaluation" in liabilities, and the net unrealized gains, the net of deferred taxes, are reported as "land revaluation surplus" in net assets.

   (Method of revaluation)

   Fair values are determined by applying appropriate adjustments to values computed by the method published by the Commissioner of the National Tax Agency for the calculation of land values that serve as the basis for taxable amounts of land-holding tax set forth in Article 16 of the Land-holding Tax Act as set forth in Article 2, Item 4 of the Order for Enforcement of Act on Revaluation of Land (Cabinet Order No. 119 of March 31, 1998).

   (Date of the revaluation) March 31, 2001

   (Difference between fair values at the fiscal year-end and book values after the revaluation of the land revaluated)

   As the fair values of the revalued land exceed the book values of the land after the revaluation at the end of current fiscal year, the difference between them is not stated.

[Notes to the non-consolidated statement of profit and loss]
