Notice Regarding Workforce Rationalization at Consolidated Subsidiary

Dynamic Map Platform North America Inc., a consolidated subsidiary of the Company, has decided to implement workforce rationalization. We hereby announce the following details.

1. Reason for Workforce Rationalization

At Dynamic Map Platform North America, Inc., the initial build-out of high-precision 3D data in the North American region has largely been completed. Based on this situation, we have decided to implement workforce reductions to optimize personnel numbers and review the data-production structure with the aim of improving operational efficiency.

2. Details of Rationalization

(1) Affected Employees: Employees of Dynamic Map Platform North America Inc.
(2) Number of Employees: 22
(3) Date of Separation: February 28, 2026 (plan)

3. Future Outlook

As a result of this measure, we expect a personnel cost reduction of approximately 315 million yen in the fiscal year ending March 2027.

Although no lump-sum retirement payments are planned in connection with this workforce reduction, the Company will incur costs related to outplacement (re-employment support) services. As the number of users has not yet been finalized, the financial impact is still undetermined; however, even at maximum, the cost is expected to remain below 13 million yen, and the overall impact will be minor.

The impact on the Company’s consolidated financial results for the fiscal year ending March 2026 is also expected to be minimal.

If any matters arise in the future that are deemed to have a significant impact—such as additional related

costs—we will disclose them promptly.
