2. Reason for the revision to dividend forecasts

As stated in the "Notice Concerning Change to Dividend Policy (Increase in the Consolidated Dividend Payout Ratio)" announced today, the management of the Company has positioned efforts to return profits to shareholders through the medium- to long-term improvement of corporate value to be one of its key management issues. It will ensure a steady and sustainable stream of dividends while considering future business investment, enhancement of shareholders' equity, and other factors, adopting a standard of a consolidated dividend payout ratio of at least 40% or a DOE (consolidated dividend on equity ratio) of at least 3.5%, whichever is higher.

Based on the revisions to the consolidated financial forecasts for the second quarter (Interim Period) and the full fiscal year ending March 31, 2027 announced today, the Company has revised its interim and year-end dividend forecasts to ¥42.00 per share and ¥43.00 per share, respectively, resulting in a full-year dividend forecast of ¥85.00 per share.
