Capital Investment to Strengthen Production and Supply Capacity for Low-Dielectric Resin Materials

July 29, 2026

DKS Co. Ltd. (Head office: Kyoto, President & CEO: YAMAJI Naoki), hereby announces its decision to make capital investments to strengthen its production and supply capacity in response to growing demand for low-dielectric resin materials for high-end servers.

In recent years, driven by the expansion of the data center and high-speed communications infrastructure markets, the demand for low-dielectric resin materials has been strong. To meet these market and customer needs and to ensure a stable supply, the Company will implement capital investments to expand its production capacity.

The investment is planned for manufacturing bases both domestically and overseas, with a total investment of approximately ¥10 billion. Operations are scheduled to commence from fiscal year 2027 onward. Further details will be announced at an appropriate time.

The Company achieved the initial financial targets outlined in the Medium-Term Management Plan "SMART 2030" ahead of schedule in the previous fiscal year, and is currently reviewing new growth targets. Going forward, the Company will continue to position the Electronics & IT field as a key growth area, aiming to expand its business and enhance corporate value.
