HENNGE K.K.
(Securities Code: 4475, TSE Growth)

Notice Regarding the New Service Plans for HENNGE One

HENNGE K.K. (hereinafter the "Company") hereby announces that the Company will comprehensively renew service plans for HENNGE One, effective October 1, 2026, with the aim of further enhancing the value of HENNGE One, the Company's cloud security service.

Please refer to the attached press release.

The impact of this matter on the Company's consolidated financial results is expected to be insignificant. However, the Company believes it will contribute to enhancing its performance and corporate value over the medium to long term. Should any matters requiring disclosure arise in the future, announcements will be made accordingly.

Our Group will continue to pursue "Liberation of Technology" as our corporate philosophy. While striving to enhance the value of our services, we will contribute to society by supporting the business growth of more customers and, at the same time, remain fully committed to enhancing our corporate value over the mid to long term.

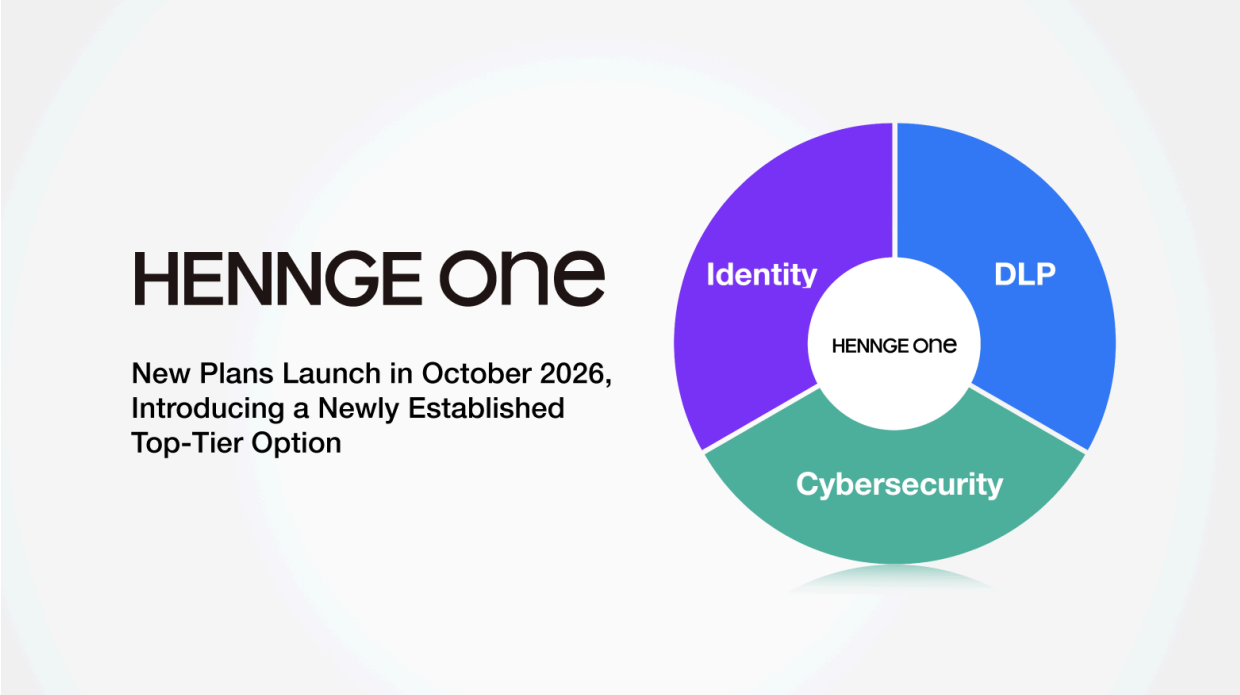
  — Portfolio expands with next-generation VPN-less networking, advanced password management, and integrated EDR/MDR capabilities

HENNGE One to Launch New Service Plans in October 2026, Introducing a Flagship Top-Tier Option

— Portfolio expands with next-generation VPN-less networking, advanced password management, and integrated EDR/MDR capabilities



HENNGE K.K. (Headquarters: Shibuya-ku, Tokyo; Representative Director and CEO: Kazuhiro Ogura) today announced a comprehensive revamp of its "HENNGE One" cloud security service plans, effective October 1, 2026. This initiative delivers enhanced value through a new flagship Suite plan that consolidates all services, including EDR/MDR and Zero Trust-aligned network security. To strengthen the security foundation across all tiers, HENNGE will also progressively introduce new capabilities, including a password manager, domain protection, and advanced defenses against targeted attacks.

Comprehensive Defense for a Safer Business Environment

Corporate security risks are escalating in frequency and complexity, driven by sophisticated targeted attacks, domain-spoofing emails, and vulnerabilities in traditional VPNs.
To address these evolving threats, HENNGE One is updating its plan structure to provide streamlined access to its latest security innovations. Moving beyond standard identity authentication and email protection, the revamp extends security coverage across the broader enterprise landscape, encompassing both networks and endpoints.

Introducing the "Ultra" Plan to Maximize Value
HENNGE One currently offers three editions: "Identity Edition" for ID and access management, "DLP Edition" for information leakage prevention, and "Cybersecurity Edition" for cyber defense. The updated lineup introduces a new top-tier plan for each edition, along with the comprehensive "Ultra" plan for the HENNGE One Suite, which encompasses all editions.

- **Overview of the HENNGE One Suite Ultra Plan**
  The Ultra plan is the most comprehensive offering in the HENNGE One lineup, granting access to the full suite of services.

  In addition to "**HENNGE Endpoint & Managed Security**," which provides robust ransomware protection through high-performance EDR (Endpoint Detection and Response) and managed support service, the Ultra incorporates the following three new services:

  1. **HENNGE Mesh Network**: Connects internal and external devices and resources via direct, encrypted communications, addressing the core vulnerabilities of legacy VPNs.
  2. **HENNGE Password Manager**: Secures credentials for SaaS and internal systems that do not support Single Sign-On (SSO).
  3. **HENNGE Domain Protection**: Optimizes domain security configurations through automated visualization of DMARC reports.

Additionally, HENNGE One will introduce new top-tier plans for each individual edition (Identity, DLP, and Cybersecurity) featuring services like HENNGE Mesh Network.

Added Value for Existing Plans
Existing plans will also be enhanced with new functional offerings:

- HENNGE One Suite: Pro/Basic Plan
Password Manager and Domain Protection will be added to the Pro Plan, while Domain Protection will be included in the Basic Plan. "**HENNGE Tadrill**" will also become available for both plans.

- HENNGE One Identity Edition: IdP Pro Plan
Password Manager will be available.

- HENNGE One DLP Edition: DLP Plan
Domain Protection will be available for a single target domain.

Schedule and Transition Details

For contracts starting on or after October 1, 2026, services will transition to the new plans. For customers who are already under contract or currently using HENNGE One services, the transition to the new plans will apply to renewals with a contract start date on or after April 1, 2027.
In each plan, new services such as Mesh Network, Password Manager, and Domain Protection will be introduced sequentially from October 2026 onwards.

About HENNGE One
HENNGE One is a cloud security service with the largest market share in Japan* that helps businesses boost productivity. While leveraging new technologies like SaaS is vital for productivity gains, businesses face challenges such as implementing zero-trust security.
To address these challenges, HENNGE One offers three editions: the Identity Edition, which centralizes and protects multiple system IDs for secure and efficient work; the DLP Edition, which prevents accidental leaks of scattered organizational information; and the Cybersecurity Edition, which safeguards companies from cyber-attacks through a comprehensive approach spanning technology, people, and processes.

It achieves zero-trust security through a holistic security service, which reduces the burden of implementation and operation, thereby fulfilling the liberation of technology.

About HENNGE K.K.
HENNGE K.K. is a SaaS company guided by the management philosophy of “liberation of technology to change the world,” dedicated to bridging the gap between advanced technologies and practical application. It develops and sells distinctive services: a cloud security service with the largest market share in Japan, HENNGE One, which offers comprehensive security, including single sign-on (SSO), access management, email security, and secure file sharing, alongside device management and protection based on zero trust principles; a cloud email distribution service, Customers Mail Cloud. Established in November 1996, HENNGE was listed on the Tokyo Stock Exchange (TSE) Mothers (now Growth) in October 2019.
The company name “HENNGE” is a portmanteau of the Japanese word for transformation, ‘HENNKA,’ and ‘CHALLENGE,’ signifying its commitment to embracing every change as an opportunity.

Company name: HENNGE K.K. (securities code: 4475)
Address: Daiwa Shibuya Square, 16-28 Nampeidaicho, Shibuya-ku, Tokyo
Representative: Kazuhiro Ogura (Representative Director, President and CEO)
