Business Report

(From January 1, 2018 to December 31, 2018)

1. Business Progress and Achievement of the Corporate Group

(1) Business activities and results

The market of silicon wafers for semiconductors in the consolidated fiscal year under review saw continued strong demand for all diameters.

Demand for 300 mm wafer was driven by memory for data centers and high-end logic devices, along with growth in data traffic.

For small-diameter wafers of 200 mm or less, solid demand continued, driven especially by automotive devices.

In this environment, in line with the policies of the SUMCO Vision, the SUMCO Group sought to maintain our strong presence among customers through technology development responding to their needs for leading-edge, distinctive products, while endeavoring also to improve our profitability by optimizing pricing. In addition, in response to customer requests for additional supply, we took measures to raise our productivity.

As announced November 28, 2018, we reached agreement with Osaka Titanium Technologies Co., Ltd. on early termination of a long-term contract for the purchase of polycrystalline silicon as of March 31, 2019. This agreement will significantly improve cash flow by shortening the time needed for reducing polycrystalline silicon inventories to proper levels, while enabling more leeway and flexibility in procurement of higher-quality polycrystalline silicon.

As a result of the above, for the consolidated fiscal year under review, the SUMCO Group posted net sales of 325,059 million yen, operating income of 85,165 million yen, ordinary income of 83,068 million yen, and net income attributable to owners of the Parent of 58,580 million yen.

<SUMCO Vision>

1. World's Best in Technology
2. Deficit-Resistant Even during Economic Downturns
3. Empower Employee Awareness of Profit
4. Competitiveness in Overseas Markets

(2) Status of capital investments

Capital investment for the SUMCO Group executed during the consolidated fiscal year under review totaled 59,283 million yen.

The principal items are attributed to investments in a capacity expansion of 300 mm high-precision wafers for cutting edge semiconductors.

(3) Status of financing

During the consolidated fiscal year under review, the SUMCO Group raised a total of 20,000 million yen through long-term debt from multiple financial institutions as the Group's necessary funds.

(4) Issues to be dealt with

As for current demand for semiconductor wafers, the momentum of customer requests for enormous additional supply has subsided. In the medium term, however, demand is projected to increase steadily.

In this environment, the SUMCO Group will continue striving to maintain our strong presence

among customers through technology development responding to their needs for leading-edge, distinctive products, and improve profitability through increased productivity, optimized pricing, and cost reduction, continuously in line with the policies of the SUMCO Vision.

Regarding capital investments, to fulfill our responsibility of supplying 300 mm high-precision wafers for cutting edge semiconductors, for which the Company has a large market share, we will increase our production capacity by 110,000 wafers a month as we announced in August 2017. We will implement capital investments as appropriate in line with the Company's share, in a disciplined manner, while fulfilling our responsibility to customers as a supplier and taking into consideration supply and demand forecasts of the wafer market on each occasion and the lead-time required to newly install and increase production facilities.

With regard to polycrystalline silicon, which is the main raw material of silicon wafers, due to abrupt changes in the market, a disparity existed between the demand forecasts upon entering into long-term purchase contracts and the current consumption forecasts. Consequently, we are now holding excess inventories. The inventory balance peaked at the end of fiscal year 2016 and has begun to decline, and it is expected to recover to an appropriate level in the medium to long term.

Although inventories of polycrystalline silicon declined, we accumulated strategic inventories of other primary and secondary materials, in line with our business continuity plan (BCP). As a result, the balance of "raw materials and supplies" has increased 0.3 billion yen from the end of the previous fiscal year to 153.1 billion yen.
