Revision to the Dividend Forecast for the Fiscal Year Ending March 31, 2027

Komori Corporation (hereinafter referred to as "KOMORI") has revised its forecast for the interim and year-end dividends for the fiscal year ending March 31, 2027, originally announced on May 14, 2026.
Details are described below.

1. Revision of dividend forecast

	Dividend per share (Yen)		
	2Q-end	Fiscal year end	Annual
Previous Forecast (Announced May 14, 2025)	35.00	40.00	75.00
Revised Forecast	50.00	50.00	100.00
(Reference) Results for the fiscal year ended March 31, 2026	35.00	35.00	70.00

2. Reason of revision

KOMORI recognizes the continuous and stable return of profits to our shareholders as one of our top priorities. During the 7th Medium-Term Management Plan period (fiscal years ending March 2025, to March 2027), KOMORI aims for a total return ratio of 50% and a minimum annual dividend of 40 yen.
In light of rising stock prices and the continued depreciation of the Japanese yen in the financial markets, net assets have exceeded the assumptions made at the outset of the Medium-Term Management Plan. Accordingly, KOMORI has revised its dividend forecast for the fiscal year ending March 31, 2027, increasing the interim dividend forecast by 15 yen from the previous forecast to 50 yen per share and the year-end dividend forecast by 10 yen to 50 yen per share. As a result, the annual dividend forecast is expected to be 100 yen per share.

Disclaimer: The dividend forecasts are based on information currently available to it as of the date of this document's release and, accordingly, involve risks and uncertainties that may cause actual results to differ materially from forecasts.
