Notice of Obtaining Permit for New Water treatment facility (Miyakoda Techno Plant)

With respect to the new Water treatment facility announced in the "Notice Concerning Issuance of New Shares and Offering of Shares (Supplementary Materials)" on January 7 2022, MIDAC, a consolidated subsidiary, was issued the Industrial Waste treatment Business License and the Specially Controlled Industrial Waste treatment Business License (addition of facilities to be used for business) on March 13, 2026, and we are pleased to announce the following.

1.Summary

As announced in the "Notice Concerning Issuance of New Shares and Offering of Shares (Supplementary Materials)" on January 7 2022, MIDAC, a consolidated subsidiary, planned to establish a new Water treatment facility in order to increase treatment capacity of the existing Water treatment facility and respond to the aging of the water treatment facility. Subsequently, with the receipt of the installation permit from Hamamatsu City, Shizuoka Prefecture, on July 24 2024, construction work has proceeded to date.

With the completion of this construction project, we submitted an application for pre-use inspection of the industrial waste treatment facilities in accordance with the provisions of Article 15-2, Paragraph 5 of the Waste treatment and Public Cleansing Law (including the cases where it is applied mutatis mutandis pursuant to Article 15-2-6, Paragraph 2 of the Law). We received a notification of pre-use inspection confirmation of the industrial waste treatment facilities from Hamamatsu City as of February 16, 2026. Following administrative review, an industrial waste treatment business permit was issued on March 13, 2026. The issuance of the permit has made it possible for us to start our business, so we are currently in the process of preparing for the start of operations at the facility in April 2026.

In addition, our facility plans to add "oxidation-reduction" as a new treatment method. Regarding this, it is scheduled to be added to the permit upon completing the necessary procedures.

2.Outline of Facilities (Water treatment facility)

(1) Name of facility	Miyakoda Techno Plant
(2) Address	No. 104-10, 1-chome, Shinmiyakoda Hamana-ku, Hamamatsu, Shizuoka
(3) Type of facility	Intermediate treatment Facilities (Water treatment)
(4) Type of industrial waste	[Industrial Waste] Waste acid*1, waste alkali*1, sludge*1, waste oil [Specially controlled industrial waste]

	Corrosive waste acid, corrosive waste alkali, specified hazardous sludge*2, specified hazardous waste acid*3, specified hazardous waste alkali*2 ※1 Includes industrial waste from mercury-using products and particulates containing mercury ※2 Specific hazards... mercury, cadmium, lead, hexavalent chromium, arsenic, cyanide, selenium ※3 Specific hazards... mercury, cadmium, lead, hexavalent chromium, arsenic, selenium
(5) Type of facility and treatment capability	Dewatering facility 191.47 m3/day (24h) 432 m3/day (24h) Neutralization facility, decomposition facility for cyanide compounds 280 m3/day (24h) Neutralization facilities 320 m3/day (24h) Oil and water separation facility 120 m3/day (24h) 180 m3/day (24h)
(6) Date of License (Addition of Facilities to Be Used for Business)	February 17, 2026
(7) Scheduled start of operation	April, 2026

3.Impact on results for the fiscal year under review

The impact of this matter on consolidated results for the fiscal year under review will be reflected in the forecast for the Year ended March 31, 2027.
