<The Principles>

4. In the formation of a sustainable society we will recognize the importance of cooperation with diverse stakeholders and will not only participate in its activities but will endeavor to take a proactive role.
5. We will not be limited to complying with environmental laws and regulations but will take active steps to reduce our own environmental footprint through resource and energy savings as well as encouraging our suppliers to do likewise.
6. We will recognize activities that will further profile sustainability as a business issue and will endeavor to disclose information on our activities.
