Notice Regarding the Conclusion of a Strategic Business Alliance in the Construction DX Field and Progress of the Medium-Term Management Plan

World Corporation Inc. ("WC"), the Group's core operating company, has entered into a strategic business alliance agreement with Arent Inc. ("Arent") for the implementation of "PROCOLLA," Arent's AI-powered cloud-based process management system, at construction sites, as described below.
Although this matter does not fall under the timely disclosure standards, the Company has decided to disclose it on a voluntary basis because it represents an important initiative relating to the progress of the growth strategy under its Medium-Term Management Plan, "Change and Growth 2030," and may be of value to investors.

1. Background and Purpose of the Alliance

While maintaining its foundation in temporary staffing services for the construction industry, the Group is promoting expansion into the provision of high-value-added services through the integration of human resources and technology under its Medium-Term Management Plan, "Change and Growth 2030."
As digital transformation (DX) advances in the construction industry, the importance is increasing not only of introducing products, but also of establishing a framework that supports on-site adoption and more sophisticated utilization of those products.
The purpose of this alliance is to combine WC's construction workforce base of approximately 3,600 personnel with Arent's AI-powered cloud-based process management system, "PROCOLLA," in order to establish a framework that supports DX utilization tailored to practical operations at construction sites.

2. Details of the Business Alliance

WC and Arent will promote the following initiatives through this business alliance:
(1) WC's on-site onboarding personnel will provide operating instructions at construction sites, promote user adoption, and support ongoing operation and continued use.
(2) Arent will be responsible for development, provision, and training support for "PROCOLLA."

3. Strategic Positioning of the Alliance

This alliance is one of the initiatives to enhance the Construction Solutions Business as outlined in the Medium-Term Management Plan "Change and Growth 2030." In addition to the construction staffing business, it is intended to foster specialized personnel and strengthen the organizational structure for supporting the introduction, operation, and on-site adoption of construction DX products.
Furthermore, by establishing a mechanism to feed back operational know-how gained at construction sites to Arent's development team, the Company aims to continuously improve service quality and improve its revenue model and profitability.

4. Future Outlook

The impact of this matter on the Company's consolidated financial results for the fiscal year ending October 31, 2026, is expected to be immaterial.
Over the medium to long term, the Company expects that this alliance will lead to higher added value and

stronger profitability in the Construction Solutions Business.
