NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Notes to Going Concern Assumption

Not applicable

Notes to Significant Fundamental Matters in Preparing the Consolidated Financial Statements

1. Scope of Consolidation

(1) Number of consolidated majority-owned subsidiaries and other subsidiaries: 34

(2) Names of principal consolidated subsidiaries:
Ishikawa Sanken Co., Ltd., Yamagata Sanken Co., Ltd., Kashima Sanken Co., Ltd., Fukushima Sanken Co., Ltd., Sanken Optoproducts Co., Ltd., Sanken Densetsu Co., Ltd., Allegro Microsystems, Inc., Allegro MicroSystems, LLC, Polar Semiconductor, LLC, Korea Sanken Co., Ltd., P.T. Sanken Indonesia, Sanken Electric Singapore Pte. Ltd., Sanken L.D. Electric (Jiang Yin) Co., Ltd., Sanken Electric Hong Kong Co., Ltd., Sanken Electric Korea Co., Ltd., Taiwan Sanken Electric Co., Ltd., Sanken Electric (Shanghai) Co., Ltd., Dalian Sanken Electric Co., Ltd., etc.

2. Application of equity method

Not applicable

3. Fiscal term of consolidated majority-owned subsidiaries

The fiscal year ends on December 31 for the following consolidated subsidiaries:
Sanken L. D. Electric (Jiangyin) Co., Ltd.
Sanken Electric (Shanghai) Co., Ltd.
Dalian Sanken Electric Co., Ltd.
Dalian Sanken Trade Co., Ltd.
Allegro (Shanghai) Micro Electronics Commercial & Trading Co., Ltd
The financial statements of each company were prepared based on provisionary account settlement as of the consolidated fiscal year end.

4. Matters relating to Accounting Policies

(1) Standards and methods of valuing the significant assets

(i) Securities

Other securities

Securities with market value

Market value method based on the market price as of the end of the consolidated fiscal term. (Differences in valuation are included directly in net assets and costs of sold securities are calculated using the moving-average method.)

Securities without market value

Stated at cost using the moving-average method

(ii) Derivative transactions

Market value method

(iii) Inventories

Inventory held for the purpose of ordinary sales

Stated mainly at cost using the moving-average method
(The carrying amounts in the accompanying consolidated balance sheets are stated after reducing the book value according to the decreased profitability.)

(2) Depreciation methods for significant depreciable assets

(i) Tangible fixed assets (excluding lease assets)

Mainly adopts the straight-line method.

Useful lives of main asset are as follows:

Buildings and structures	8 to 60 years
Machinery and transportation equipment	3 to 12 years

(ii) Intangible assets (excluding lease assets)

Straight-line method

As for software (for in-house use), the straight-line method is used with a useful life of 5 or 10 years.

(iii) Lease assets

Lease assets arising from finance lease transactions in which ownerships is transferred

Depreciation shall be computed mainly by the same method applicable to the Company's fixed assets.

Lease assets arising from finance lease transactions in which ownership is not transferred

Depreciation shall be computed by the straight-line method based on the assumptions that the useful life equals the lease term and the residual value equals zero.

(3) Standards of accounting for significant allowances and accruals

(i) Allowance for doubtful receivables

Estimated uncollectible amounts are calculated using historical data for trade receivables and individually considering the probability of collection for doubtful receivables.

(ii) Accrued retirement benefits for directors and statutory auditors

Accrued retirement benefits for directors and statutory auditors at the end of fiscal term are calculated based on the internal rules of some consolidated majority-owned domestic subsidiaries.

(iii) Provision for performance-linked directors' compensations

Provision for performance-linked directors' compensations is calculated based on an estimated amount for payment as of the end of fiscal year under review.

(iv) Provision for share-based compensation

Provision for share-based compensation is calculated based on estimates of share benefit obligations as of the end of fiscal year under review in accordance with the Share Delivery Regulations.

(v) Provision for business structure reform

Provision for business structure reform is calculated in an amount reasonably estimated as a result of the events before the fiscal year under review.

(4) Other significant matters for the preparation of the consolidated financial statements

(i) Accounting method for deferred assets

Bond issuance cost is expensed as incurred.

(ii) Accounting method for retirement benefits

Method for attributing retirement benefit estimates to periods

When calculating retirement benefit obligations, the benefit formula basis serves as the main basis for attributing the retirement benefit estimates to the periods of up to the end of the current consolidated fiscal year.

Method for allocating net unrecognized actuarial gain or loss and past service cost

Net unrecognized actuarial gain or loss is amortized in the year following the year in which the gain or loss is recognized primarily by the declining-balance method over various periods (10 years through 18 years).

Prior service cost is amortized in the year following the year in which the gain or loss is recognized primarily by the declining-balance method over various periods (10 years through 20 years) which do not exceed the average remaining service period of employees.

Adoption of the simple method at small businesses, etc.

Some consolidated subsidiaries adopt the simple method under which an amount of payment required for retirement benefits for personal reasons at the end of fiscal term is used as retirement benefit obligations when calculating net defined benefit liability and retirement benefit costs,.

(iii) Accounting method for consumption tax

The tax exclusion method is adopted for consumption tax and local consumption tax.

(iv) Foreign currency translation

All monetary assets and liabilities in denominated in foreign currencies are converted into Japanese yen at the exchange rates prevailing as of the consolidated fiscal term end, and the resulting gain or loss is credited or charged to income.

The Majority-owned overseas consolidated subsidiaries' assets and liabilities are translated into Japanese yen at the exchange rate prevailing as of the end of the consolidated fiscal term. Revenues and expenses are translated into Japanese yen at the average exchange rate during the consolidated fiscal term, and translation differences are included in the translation adjustment account and no-controlling interests of net assets.

(v) Consolidated tax payment system

The Company adopts the consolidated tax payment system.

Notes to the Consolidated Balance Sheet

(1) Assets offered as collateral and collateralized liabilities

1) Assets offered as collateral

Buildings	45 million yen
Other intangible assets	7 million yen
Total	52 million yen

2) Collateralized liabilities

Short-term bank loans	45 million yen
Total	45 million yen

(2) Accumulated depreciation of tangible fixed assets 156,183 million yen

Notes to the Consolidated Statement of Changes in Net Assets

(1) Shares issued and outstanding (shares)

Type of share	Balance at beginning of current consolidated year	Increase	Decrease	Balance at end of current consolidated year
Common stock	25,098,060	—	—	25,098,060

(2) Treasury Stock (shares)

Type of share	Balance at beginning of current consolidated year	Increase	Decrease	Balance at end of current consolidated year
Common stock	865,315	75,099	111	940,303

(Notes)1. Treasury stock as of the end of the current consolidated fiscal year includes 72,800 shares of company stock held in a trust account for the stock delivery trust for the Directors etc.

2. The increase in treasury stock of 75,099 shares was due to an increase of 72,800 shares through market purchases for the stock delivery trust for the Directors etc. and an increase of 2,299 shares due to the purchase of less-than-a-full-unit shares.

3. The decrease of 111 shares was due to a transfer of less-than-a-full-unit shares in response to a demand for sale.

(3) Dividends

(i) Amount to be paid

The amount of dividends to be paid for the current fiscal year is treated as if the amount was determined in advance at the end of the previous fiscal year.

Resolution	Class of share	Total amount (million yen)	Dividend per share (yen)	Record date	Effective date
Shareholders' Meeting held on June 21, 2019	Common stock	363	15.00	March 31, 2019	June 24, 2019
Board of Directors' Meeting held on November 6, 2019	Common stock	363	15.00	September 30, 2019	December 5, 2019

(ii) Dividends of which the record dates fall in the current fiscal year but the effective dates fall after the end of the current fiscal year

Resolution	Class of share	Total amount (million yen)	Dividend per share (yen)	Record date	Effective date
Shareholders' Meeting held on June 26, 2020	Common stock	363	15.00	March 31, 2020	June 29, 2020

(4) Stock Acquisition Rights
Not applicable

Notes to Financial Instruments

(1) Matters concerning the current situation of financial instruments

The Company Group raises funds necessary for capital investments, R&D, etc. by bond issues and bank loans. It manages temporary surplus funds through highly secured financial instruments, and also raises short-term operating funds by issuing commercial papers and bank loans. The Company Group follows a policy of using derivatives to hedge foreign currency exchange fluctuation risks and of avoiding any speculative dealings.

Customer credit risks related with notes receivable and accounts receivable ― trade are reduced through measures taken in accordance with provisions of credit management regulations. Receivables denominated in foreign currencies are exposed to foreign currency exchange fluctuation risks. The Company Group hedges this risk mainly through the use of forward exchange contracts against positions after netting payables denominated in foreign currencies, in principle.

Investment securities are mainly the shares of corporations with which the Company Group has business relationships and therefore are exposed to the risk of market price fluctuations. The Company Group regularly monitors the fair value and financial positions, etc. of the issuing entities (business partners) and continuously reviews the holding status in consideration of its relationships with business partners.

Short-term bank loans and commercial papers are fundraising instruments that mainly pertain to operating funds, while long-term bank loans, bonds, and lease obligations under finance lease transactions are fundraising instruments necessary mainly for the purpose of capital investment. Some of them are on floating interest rates and therefore exposed to the risk of interest rate fluctuation. When borrowing a bank loan on a floating interest rate, the Company Group reduces the risk by limiting the loan term within three years in principle, monitoring the remaining term until the interest rate renewal date, monitoring the interest rate fluctuation trend, and responding in consideration of the balances between short-term loans and long-term loans or between fixed interest rates and floating interest rates.

With respect to derivative transactions, the financial division of the Company conducts transaction contracts, checks balances, and handles the accounting. A monthly report on the status of derivative transactions is prepared and submitted to the management meeting.

(2) Matters concerning the fair value of financial instruments

The amount posted on the consolidated balance sheet, the fair value, and the differences between the two were as follows, as of March 31, 2020 (consolidated closing date for the current fiscal year). However, financial instruments for which the fair value is deemed to be extremely difficult to determine are not included in the following table. (See Note 2)

(Millions of yen)

	Amount posted on consolidated balance sheet (*1)	Fair value (*1)	Difference
(1) Cash and deposits	40,779	40,779	―
(2) Notes and accounts receivable ― trade	31,888	31,888	―
(3) Investment securities			
Other securities	516	516	―
(4) Notes and accounts payable ― trade	(17,774)	(17,774)	―
(5) Short-term bank loans	(27,619)	(27,619)	―
(6) Commercial paper	(10,000)	(10,000)	―
(7) Bonds payable	(35,000)	(34,817)	-183
(8) Long-term bank loans (Including current portion long-term loans payable)	(11,776)	(11,924)	147
(9) Lease obligations	(84)	(83)	-1
(10) Derivative transactions (*2)	(104)	(104)	―

*1: Amounts posted in liabilities are indicated in ( ).

*2: Derivative transactions are indicated in net amounts after offsetting the receivables and payables.

Note 1: Calculation method for the fair value of financial instruments, and matters concerning securities and derivative transactions

(1) Cash and deposits; and (2) Notes and accounts receivable — trade
The fair value is approximately equal to the book value because both are settled in the short term. Therefore, the fair value is based on the book value.

(3) Investment securities
The fair value of stocks is based on the prices on the stock exchange.

(4) Notes and accounts payable — trade; (5) Short-term bank loans; and (6) Commercial paper
The fair value is approximately equal to the book value because both are settled in the short term. Therefore, the fair value is based on the book value.

(7) Bonds payable
The fair value of bonds issued by the Company is based on market prices.

(8) Long-term bank loans
With floating interest rate, the fair value of long-term bank loans is deemed to reflect market interest rates in the short term and is therefore deemed to be very similar to the book value. Accordingly, it is stated at book value. With fixed interest rate, the fair value of long-term bank loans is based on the present value of the total principal and interest discounted by the interest rate, assuming that the Company newly takes out the same bank loans.

(9) Lease obligations
The fair value of lease obligations is based on present value discounted by the interest rate, assuming that the Company newly initiates the same lease transaction.

(10) Derivative transactions

(i) Not subject to hedge accounting
The fair value of a derivative transaction not subject to hedge accounting is based on the price etc. presented by correspondent financial institutions.

(ii) Subject to hedge accounting
Not applicable.

Note 2: The fair value of unlisted stocks (376 million yen on the consolidated balance sheet) is considered to be extremely difficult to calculate, as there are no market prices and no valuations of future cash flows. Therefore, these stocks are not included in "(3) Investment securities; Other securities."

Notes to lease properties

NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS

Notes to Going Concern Assumption

Not applicable

Notes to significant accounting policies

1. Standards and methods of valuing the assets

(1) Securities

Stocks of subsidiaries and affiliates……Stated at cost using the moving-average method

Other securities

Securities with market value ……Market value method based on the closing market price as of the end of the fiscal term

Differences in valuation are included directly in net assets and costs of sold securities are calculated using the moving-average method.

Securities without market value ……Stated at cost using the moving-average method

(2) Derivative transactions

Market value method

(3) Inventories

Inventories held for the purpose of ordinary sales

Stated mainly at cost using the moving-average method

(The carrying amounts in the accompanying non-consolidated balance sheets are stated after reducing the book value according to the decreased profitability.)

2. Depreciation methods for fixed assets

(1) Tangible fixed assets

(excluding lease assets)……Straight-line method

(2) Intangible assets

(excluding lease assets)……Straight-line method

As for software (for in-house use), the straight-line method is used with a useful life of 5 or 10 years.

(3) Lease assets ……Lease assets arising from finance lease transactions in which ownership is not transferred

Depreciation shall be computed by the straight-line method based on the assumptions that the useful life equals the lease term and the residual value equals zero.

3. Standards of accounting for allowances and accruals

(1) Allowance for doubtful receivables

Estimated uncollectible amounts are calculated using historical data for trade receivables and individually considering the probability of collection for doubtful receivables.

(2) Accrued retirement benefits

Accrued employees' retirement benefits are calculated based on estimates of retirement benefit obligations and pension assets as of the end of the fiscal term.

(i) Method for attributing retirement benefit estimates to periods

When calculating retirement benefit obligations, the benefit formula basis serves as the main basis for attributing retirement benefit estimates to the periods of up to the end of the current fiscal. If pension assets to be recognized as of the end of the fiscal term exceed the amount of difference between retirement benefit obligations and net unrecognized actuarial gain or loss, the difference is recorded as prepaid pension cost in Investments and other assets.

(ii) Method for allocating net unrecognized actuarial gain or loss and past service cost

Net unrecognized actuarial gain or loss is amortized in the year following the year in which the gain or loss is recognized primarily by the declining-balance method over 14 years which is not more than the average remaining service term of employees.

Prior service cost is amortized in the year following the year in which the gain or loss is recognized primarily by the declining-balance method over 14 years which is not more than the average remaining service term of employees.

(3) Provision for performance-linked directors' compensations

Provision for performance-linked directors' compensations is calculated based on an estimated amount for payment as of the end of fiscal year under review.

(4) Provision for share-based compensation

Provision for share-based compensation is calculated based on estimates of share benefit obligations as of the end of fiscal year under review in accordance with the Share Delivery Regulations.

(5) Provision for loss on business of subsidiaries and affiliates

Provision for loss on business of subsidiaries and affiliates is calculated based on estimates of losses to be borne in consideration of the financial conditions of subsidiaries and affiliates.

4. Other significant matters constituting basis for the preparation of the financial statements

(1) Accounting for retirement benefits

The accounting methods adopted for net unrecognized actuarial gain or loss and unrecognized past service cost relating to retirement benefits in the non-consolidated financial statements differ from those adopted in the consolidated financial statements.

(2) Accounting method for deferred assets

Bond issuance cost is expensed as incurred.

(3) Accounting method for consumption taxes

The tax exclusion method is adopted for consumption tax and local consumption tax.
