Notice Concerning the Use of 100% Renewable Energy for the Operation of Nisseki Yokohama Building

Japan Excellent, Inc. (hereafter "JEI") announces that, starting from January 2021, all the electricity necessary for the operation of Nisseki Yokohama Building, a JEI property, will be sourced from renewable energy sources.

1. Overview

Starting from January 2021, all the electricity necessary for the operation of Nisseki Yokohama Building, a property owned by JEI, will be procured from renewable energy sources supplied by ENEOS Corporation.

This means that CO_2 emissions from electricity consumption of Nisseki Yokohama Building will be reduced to zero.

"100% renewable energy" refers to a clean and CO_2 emission-free energy system where all energy use is sourced from renewable energy sources such as solar, water, wind, geothermal, and biomass power, and does not use petroleum, coal or other fossil fuels.

Through this initiative, JEI will contribute to two of the UN Sustainable Development Goals: Goal 7 (Affordable and Clean Energy) and Goal 13 (Climate Action).

2. JEI's Future Initiatives

JEI upholds a basic policy to work to reduce the environmental burden and to cooperate/collaborate with stakeholders to realize a sustainable society. We will continue to advance initiatives for sustainability including environmental and energy-saving measures as well as improving the energy use efficiency of owned buildings.
