To achieve this vision, the Board of Directors, aiming to become a leading company in ESG (Environment, Social and Governance) management, promotes ESG initiatives by designating them as material items that underpin the Group’s management base and incorporating them into the Medium-Term Management Plan.

Upon resolution by the Board of Directors, the Group has identified the following material issues in promoting ESG management: “Creation of High-Quality Housing Stock”, “Contributing to a Sustainable Society”, “Diversity and Inclusion”, and has themes and KPIs for material issue initiatives.

The Group also analyzes medium- and long-term issues that affect the Company’s value creation with relation to sustainability, identify risk factors, position them as opportunities for future business development, and applies them to medium- and long-term planning of business strategies.

The Board of Directors established the ESG Promotion Committee, consisting of 2 or more outside committee members with expert knowledge and other members, to enhance the effectiveness of ESG efforts through means such as exchanging opinions on the progress of ESG management initiatives and issues. The details of discussions at the ESG Promotion Committee meetings are reported to and deliberated at the Board of Directors’ meetings.

Moreover, the ESG Management Promotion Headquarters, which was established in June 2020, acts as the responsible division in further promoting ESG management, based on discussions at the ESG Promotion Committee meetings and through the coordination within the Company and with Group companies both in Japan and overseas. Furthermore, the Group identified three key elements for promoting ESG management: participation of all employees, forward-thinking initiatives, and improvement of external evaluations. In addition, in order to “participation of all employees”, which is the most important point, the Group has established a platform for all employees to recognize, understand, and empathize with their actions, such as systematizing conventional dialogue and training as "ESG Basics", the basic activities that implement the creation of a foundation for ESG management.

In addition, the Group aims to help create a society that delivers maximizes customer value and contributes to SDGs by approaching social issues.

The Company has newly established career interviews with supervisors and members on a regular basis five times a year so that employees can draw up their own career visions and take on challenges to realize them. In addition, in order to support career autonomy, the Company offers Career Autonomous Courses to employees in their first and second years of employment and in their career course selection periods.

The Group also makes proactive investments in areas that are not necessarily related to technology developments such as the *Nattoku Kobo* Studio, which provides opportunities for hands-on experience related to the living environment, and collectively positions the outcome of these investments as management resources (intellectual capital).

<Protection of outputs>

Among such intellectual capital, technologies and designs are protected by patents and design registrations, while the Group’s expertise and data accumulated over the years, in addition to the opinions of our customers, are protected as trade secrets.

Moreover, when the outcome of these investments reach the commercialization stage, the Company carefully considers the names of the products and protects them with trademark rights as a symbol to provide customer satisfaction and security through the value chain.

In this way, the Company uses intellectual capital and protect each intellectual property right in a balanced

manner.

Furthermore, the handling of intellectual property rights shared with other companies is positioned as a tool for protecting intellectual property because it determines the direction of the business and prices with business partners.

The Company, attaching greater importance than ever to these activities, established the Intellectual Property Office in August 2021 as a dedicated organization to oversee intellectual property, and in addition to developing in-house human resources, has been proactively hiring specialists in intellectual property, including talent who had overseen intellectual property at other companies.

< Utilization and risk management for sustained growth >
