## Toyoda Gosei Enhances Its Technical Development Capacity in India *Expansion of airbag development center*

Kiyosu, Japan, December 28, 2023: Toyoda Gosei Co., Ltd. has relocated and enlarged its existing engineering and sales office to the new Toyoda Gosei Technical Center India, a branch office of Toyoda Gosei Minda India, in Manesar, Haryana. With this enhancement of technical development capacity, Toyoda Gosei will better meet growing demands for safety systems and increase its business in the rapidly growing Indian automotive market.

Toyoda Gosei is optimizing its development and production network in India as a key market, where automobile production continues to rise. With a growing awareness of automobile safety, more automobiles are being equipped with airbags to protect vehicle occupants during traffic accidents. By enhancing its technical development capacity, Toyoda Gosei will be able to respond more quickly to the product development needs of automakers in India. Together with the introduction of airbag assessment equipment and facilities, the company plans to double its number of engineers in the coming years. Strengthened technical capability in the expanding Indian market will also lead to Toyoda Gosei' global business growth.

Toyoda Gosei seeks to grow sales in India, centered on its mainstay safety systems, both to existing and future customers.
