It is a system that comprehensively evaluates for the quality of a building, evaluation features such as interior comfort and scenic aesthetics, in consideration of environment

practices that include using materials and equipment that save energy or achieve smaller environmental loads. CASBEE Certification for Real Estate is a system in which a third-party organization certifies the accuracy of the assessment of buildings evaluated by CASBEE-Real Estate through an assessment of contents. It scores buildings under each of the evaluation items in five categories, comprising “1. Energy & Greenhouse Gases”, “2. Water”, “3. Use of Resources & Safety”, “4. FRC continues to work on environmental protection initiatives and the reduction of environmental load by adopting energy-saving and energy-efficient measures at its existing portfolio properties. We will deeply collaborate with the PM (property manager) company in daily operations and proceed with correspondence to contribute to promoting city creation and revitalization of regional economies in the Fukuoka/Kyushu region as Japan’s first region-specific REIT.
