SG Holdings Implements "exaBase IR Assistant"

-Establishing a system that uses advanced technology to focus on IR activities-

Exa Enterprise AI Inc. (Minato-ku, Tokyo; Representative Director: Takuma Oue; hereinafter “Exa Enterprise AI“), a group company of ExaWizards Inc., is pleased to announce that SG Holdings Co., Ltd. (hereinafter “SG Holdings“) has begun using "exaBase IR Assistant." SG Holdings will utilize domain-specific AI for information disclosures to digitally transform their employees' work and establish a system for high-value information disclosures.

Exa Enterprise AI aims to unlock human potential and contribute to the realization of a society where people can face new challenges by providing AI services and products for productivity improvement in Japanese companies and organizations.

☑ Background

SG Holdings is a holding company of a comprehensive customer-oriented logistics group that engages with shareholders and investors to deepen mutual understanding and create initiatives aimed at medium- to long-term improvement of corporate value. In addition to financial results briefings, SG Holdings conducts small, individual meetings for domestic and foreign institutional investors, participates in IR conferences, etc.

SG Holdings was considering using a domain-specific AI to maximize limited resources and enhance IR for meetings that target institutional investors and analysts. They have introduced "exaBase IR Assistant," a domain-specific AI service for IR, to transform business processes and allocate resources to higher-value-added tasks to efficiently create meeting minutes and streamline the process of preparing Q&A.

☑ Implementing exaBase IR Assistant

Since the release of the product version in October 2023, exaBase IR Assistant has been introduced to many Tokyo Stock Exchange-listed companies, including JR East Japan, Murata Manufacturing, Toyoda Gosei, Nagoya Railroad, GENDA, Tokai Tokyo Financial Holdings, Tokyu Corporation, Hikari Food Service, Seibu Holdings, Topcon, Kyocera, and Sumitomo Forestry, multiple major financial institutions, comprehensive trading companies, telecommunications companies, semiconductor companies, etc. It is used in many organizations responsible for general meetings of shareholders, such as IR, general affairs, legal affairs, management planning, and accounting.

☑ About exaBase IR Assistant

exaBase IR Assistant is a service that uses AI to generate meeting minutes from audio and video data and to automatically generate common questions and answers from company-specific information such as IR documents, financial results briefings, general meetings of shareholders, related explanations, and press conferences. In the future, Exa Enterprise AI will collaborate with external information sources and release new features for exaBase IR Assistant to support the information disclosure practices of listed companies through "IR Tech."
