Launch of "exaBase Generative AI for Academy" for Educational Institutions

-Incorporating insights gained at institutions such as Kyoto University, Kobe University, and Fukushima University, this new service will reduce staff and faculty workload and provide assistance to students-

Exa Enterprise AI Inc. (Minato-ku, Tokyo; Representative Director: Takuma Oue; hereinafter “Exa Enterprise AI”), a group company of ExaWizards Inc., is pleased to announce the launch of "exaBase Generative AI for Academy," a version of its corporate-focused ChatGPT service "exaBase Generative AI" tailored towards educational institutions. Since its June 2023 launch, exaBase Generative AI has received acclaim from educational institutions such as Kyoto University, Kobe University, and Fukushima University. Incorporating feedback and insights from these institutions into exaBase Generative AI for Academy will allow us to provide a generative AI service that reduces faculty workload, assists with reskilling, and provides student learning assistance.

☑ exaBase Generative AI for Academy Features

1. User-Friendly Prompts for Faculty and Students

・Allows faculty to create syllabi, generate tailored assignments for each student, and search for teaching materials. It assists students with learning, job interview role-playing scenarios, summarizes lecture notes from photos, and more. Users can generate responses simply by entering the required information into templates.

・Future prompts will be developed based on customer feedback and provided as a paid service.

2. Secure Usage

・Equipped with features to ensure data security, including prohibitions against using data for learning purposes and keeping input data confined to domestic servers, making it safe for use at educational institutions.

3. High-Performance GPT-4o Available Domestically

・In collaboration with Microsoft Japan, we offer the high-performance GPT-4o, ensuring fast and accurate responses that enhance productivity in busy educational settings.

☑ Target Educational Institutions
The service is available for elementary schools, junior high schools, high schools, secondary schools, universities, and technical colleges.

☑ Background
Since its June 2023 launch, exaBase Generative AI has been used by 650 companies and over 60,000 users (as of the end of September 2024) and has expanded to educational institutions such as Kyoto University, Kobe University, and Fukushima University.

The educational sector faces challenges such as a decline in teacher candidates*, increased workload, and personnel shortages. Universities also require enhanced productivity due to the demand for various skills and the balance between research and education. Consequently, more educational institutions are utilizing generative AI to reduce their daily workload. For example, exaBase Generative AI has helped teachers save an average of 10 hours per month by generating lesson plans and materials, and an average of 6 hours per month by assisting with grading assignments and reports. We are launching exaBase Generative AI for Academy to alleviate faculty workload, improve class quality, and increase student satisfaction.

Exa Enterprise AI will continue to develop generative AI services by leveraging field knowledge.

*1 Ministry of Education, Culture, Sports, Science and Technology, "Implementation Status of Public School Teacher Employment Selection Examination for FY2024" and Jiji Press research.

☑ About exaBase Generative AI
exaBase Generative AI has been used by 650 companies and over 60,000 users since its paid service launch in June 2023. It addresses security and compliance issues for corporate use, allowing administrators to monitor usage and register prohibited words. Users can estimate productivity improvements from using generative AI and view these estimates as a graph. The service also supports the use of unique company data, allowing users and administrators to upload files specific to their company for discussion and content generation.
