Notice Regarding the Acquisition of Certification of the Aluminum Stewardship Initiative (ASI)

Daiki Aluminium Industry Co., Ltd. (hereinafter, "the Company") has been a member of the international aluminium initiative "Aluminium Stewardship Initiative[*1]" (hereinafter, "ASI") since October 28, 2022, and has received a full certification of the ASI Performance Standard[*2] at Shiga Plant on October 9, 2024.

This certification validates the Company's compliance with the international standards set by ASI in terms of ESG performance and indicates its commitment to high-quality production management.

Since its founding in 1922, the Company has operated for more than 100 years. While making the most of the properties of aluminium, a metal material with excellent recyclability, the corporate group covers business domains from upstream (scrap collection) to midstream (aluminium alloy production) and downstream (aluminium die casting) of the recycling flow.

Under the strategic concept of "G&G (Global and Green)," in which business and the environment are considered concentrically in order to steadily expand this "G&G" concept, the Company is constantly having a foresight regarding world-class levels in quality, cost and service, and aiming for access to global activities.
With this acquisition of the ASI certification, as a member of ASI, the Company will support the initiative to promote global innovation in the aluminium industry.

The Company will continue to contribute to the development of society through the aluminium recycling and promote continuous improvement to preserve the global environment.

*1 Aluminium Stewardship Initiative (ASI)
An international initiative established in 2012 to maximize the contribution to society by ensuring the soundness of the entire value chain from the ESG perspective among aluminium producers, processing manufacturers, end users, etc.
> https://aluminium-stewardship.org/

* 2 Performance Standard
The ASI Performance Standard certifies a facility that satisfies the applicable requirements set by ASI.
ASI members are required to operate ESG risk assessment and management systems and to have at least one facility certified against the ASI Performance Standard within two years of joining ASI.
