Notice of Unauthorized data access at U.S. subsidiary

Nippon Den kai, Ltd. (“the Company”, TSE:5759) is reporting in August 2, 2024 (Japan time), its U.S. subsidiary, Den kai America Inc. was a victim of unauthorized access to its internal network by a third party, resulting in an information leak. The network connection of the devices that were accessed without authorization were promptly shut down, all systems are now operating normally. The Company has confirmed that there is no impact on the business continuity of the subsidiary.

The Company has identified that the unauthorized access was caused by a ransomware (ransom demand virus) attack. There is a possibility that information related to the Company group’s business partners may have been leaked, and the Company group are currently investigating the details.

We deeply apologize for any concern and inconvenience this may cause our customers and other concerned parties. The Company group is working to strengthen our security measures to prevent a future occurrence.

The potential impact of this incident on the Company group’s business results for the fiscal year ending March 31, 2025, is under review.
