2. Reason for revision

The Company recognizes that returning profits to shareholders is one of its most important management issues. Our basic policy for profit distribution is to actively pay dividends from retained earnings in line with business performance while securing the internal reserves necessary to strengthen our financial position and further expand our business.

As for the dividend forecast for the fiscal year ending December 31, 2024, we have revised the year-end dividend forecast from undecided to 8 yen per share, an increase of 2 yen from the previous year, for the purpose of proactive shareholder returns, based on a comprehensive assessment of the progress of our earnings forecast and internal reserves for future growth investments, including M&A and new business development.
