Notice of Increase in Non-Operating Income (Foreign Exchange Gain)

In the second quarter of the fiscal year ended January 2025 (interim period) (February 1, 2024 to July 31, 2024), the following increase in non-operating income (foreign exchange gains) will be reported.

Notation

1. Increase in non-operating income (foreign exchange gain)

   In the first quarter of the fiscal year ended January 2025, foreign exchange gains of ¥459 million were recorded as non-operating revenues. However, foreign exchange gains of ¥817 million were recorded in the second quarter of the fiscal year ended January 2025 (interim) due to fluctuations in foreign exchange rates. This increase in foreign exchange gains was mainly due to valuation gains arising from the valuation of foreign currency-denominated receivables and payables held by our Group as of the end of the interim period (the end of July 2024) at the exchange rate on the same date.

2. Effect on income

   Please refer to "Consolidated Financial Results for the Second Quarter of the Fiscal Year Ending January 2025 (Interim) [Japanese GAAP]" announced today (September 12, 2024) for the effect of this increase in non-operating income (foreign exchange gain).
