July 31, 2024

MANI, INC.

Director, President & Representative Executive Officer Masahiko Saito

Notice Regarding Conclusion of PPA (Power Purchase Agreement) ～*Promoting Environmentally Friendly Manufacturing with the New Smart Factory*～

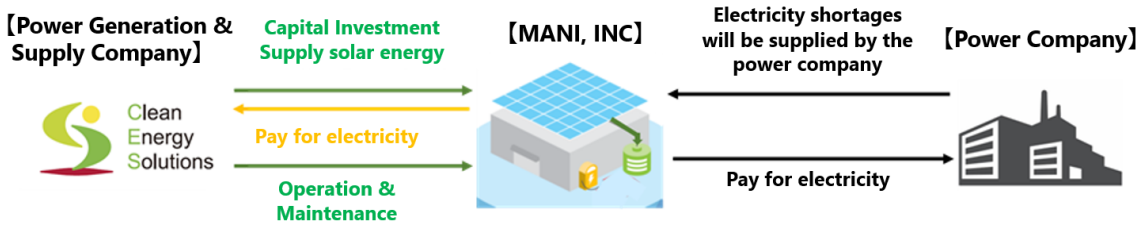

MANI, INC. (Director, President and Representative Executive Officer: Masahiko Saito, hereinafter "MANI") and Clean Energy Solutions, Inc. (Representative President: Jun Otsuka, hereinafter "CES"), which is a subsidiary of Tochigi Bank, Ltd., has concluded a PPA (Power Purchase Agreement) for MANI's Smart Factory, scheduled for completion at the end of January 2025 (Hanaoka Factory: Takanezawa Town). This agreement has been concluded, as part of MANI's efforts to decarbonize the region.

The annual power generation at the Smart Factory under this contract will be approximately 734,528 kWh, resulting in an annual reduction of approximately 324 tons of CO_2 emissions. In addition, a similar contract was concluded at the Kiyohara Head Office in September 2023, and the solar power generation system based on this contract started to operate from June 2024. The annual power generation at the Kiyohara Head Office will be approximately 153,080 kWh, which is expected to reduce CO2 emissions by approximately 67 tons per year.

MANI will continue to promote community collaboration and environmental impact reduction in order to achieve both sustainable growth and a sustainable society.

※Annual power generation and CO2 emissions are estimates and may change depending on weather and other conditions.

【Business Scheme of PPA】

※PPA: Abbreviation for Power Purchase Agreement. A system whereby a company that owns and manages solar power generation equipment (PPA provider) installs solar power generation

systems on a site, roof, or other space provided by the facility owner, and provides the power generated by the systems to the users of the facility for a fee.

The Smart Factory under construction, where solar power generation is planned to be installed (Hanaoka Factory: Takanezawa Town).

The Kiyohara Head Office, which began operating solar power generation from June 2024
