Power up from 3G to 4G!

“GLOBAL WiFi®” offers data communication plans tailored to customers’ needs. However, with the recent increase in data transmission speeds and changes in the Internet usage environment, plans with faster transmission speeds and no capacity limits tend to be selected. The “Unlimited Plan” allows users to use the service without worrying about data capacity (remaining capacity) while traveling abroad, even when sharing

the service with multiple people such as friends and family.

With this expansion, the “Unlimited Plan” now covers 116 countries and regions. In Central Asia and the Middle East, where various cultures have come and gone and fostered unique attractions, we have made it possible for customers to use our service in more areas without worrying about data capacity. In addition, we have also begun providing 4G “Unlimited Plan” in Kazakhstan, where only 3G was previously available.

Please take advantage of our “Unlimited Plan” which allows you to use your data without worrying about data capacity, if you travel to the relevant areas.

“GLOBAL WiFi®” will continue to improve its services to provide a comfortable Internet environment around the world.
