Notice Concerning Revisions to Full-Year Financial Results Forecasts

Timee, Inc. (the "Company") hereby announces that in light of the most recent operating trends, a decision was passed at the meeting of the Board of Directors held on September 11, 2025, to revise the financial results forecasts for the fiscal year ending October 31, 2025 (November 1, 2024 through October 31, 2025), disclosed with the announcement of the financial results for the fiscal year ended October 31, 2024 as described below.

2. Reason for revision

Regarding the forecast for net sales, the Company has decided to lower both the upper and lower ends of the previously announced forecast range. This is due to the expectation that revenue contribution from certain projects in the logistics industry will not fully materialize until the next fiscal year or later. In addition, cost-containment trends are continuing, mainly in the food and retail industries, with no clear outlook for recovery.

On the other hand, regarding the forecasts for operating profit, ordinary profit, and profit, expenses, primarily advertising expenses, are expected to be lower than initial forecast. This is the result of continued disciplined cost management. Consequently, operating profit, ordinary profit, profit, and basic earnings per share are all expected to exceed the previously announced forecasts.
