Synspective Partners with Geospatial Intelligence Pty Ltd to Expand SAR Satellite Services in Australia

We are pleased to announce a strategic distribution partnership with Geospatial Intelligence Pty Ltd, one of Australia's foremost providers of geospatial data and analytics solutions. With this agreement, Geospatial Intelligence Pty Ltd becomes an official distributor of Synspective's advanced SAR data products and services across Australia.

Through this collaboration, Australian organizations across government, resource management, disaster response, infrastructure, and research sectors will gain access to high-resolution, high-frequency, all-weather satellite imagery, enabling new levels of situational awareness and operational insight, regardless of the time of day or meteorological conditions. Australia's diverse environment and susceptibility to natural hazards underscore the need for robust, always-on monitoring solutions. Synspective's SAR technology empowers stakeholders to make faster, better-informed decisions for flood and bushfire response, environmental conservation, and sustainable development, even in the continent's most remote areas.
This alliance marks a significant milestone in Synspective's Asia-Pacific growth journey and exemplifies the shared commitment of both companies to shaping the future of geospatial intelligence.
