Notice Regarding Change of Business Segments

gremz, Inc. (the "Company") hereby announces that it resolved at a meeting of the Board of Directors held on May 15, 2025 to change the Company's business segments starting from the first quarter of the fiscal year ending March 31, 2026.

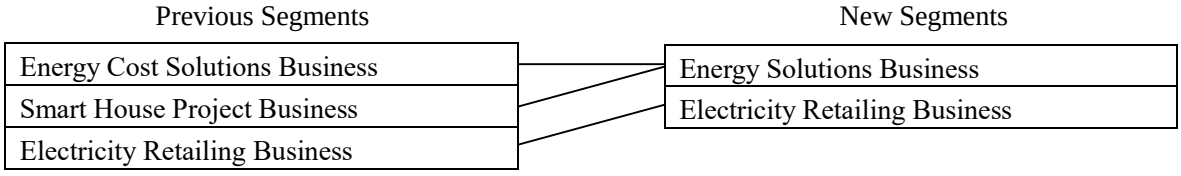

Details

1. Reason for change

The Company had three business segments: the Energy Cost Solutions Business (ECS Business), the Smart House Project Business (SHP Business), and the Electricity Retailing Business (ER Business). The ECS Business proposes ways for business clients to reduce energy costs. In the Smart House Project Business, the Company sells household photovoltaic systems and storage batteries to general consumers and develops renewable energy, while in the Electricity Retailing Business, the Company provides a power supply service to customers.

In order to use human capital in the Energy Cost Solutions Business and the Smart House Project Business more efficiently, the Company is now integrating these two segments to form the Energy Solutions Business and adopting a two-segment structure consisting of the Energy Solutions Business and the Electricity Retailing Business. The Energy Solutions Business is a non-recurring revenue business centered on the sale of appliances, while the Electricity Retailing Business generates recurring revenue through the retailing of electricity.

2. Details of change

3. Timing of the change

The Company is shifting to the new segments from the first quarter of the fiscal year ending March 31, 2026.
