

A telecommunications subsidiary InfiniVAN signs new connectivity agreement with Cavite Economic Zone, one of the major industrial park in the Philippines, and formalizes partnership with Laguna Technopark to enhance supply reliability.

InfiniVAN, Inc. (InfiniVAN) and Cavite Economic Zone Employees Multi-Purpose Cooperative (CEZEMPC) formalized their partnership through a Memorandum of Agreement (MOA) signing ceremony held on January 15, 2025 — the first step towards advancing technological capabilities within the Cavite Economic Zone.

Furthermore, on January 22, we also formally entered into a partnership agreement through a MOA with Laguna Technopark Association, Inc. (LTAI), another major industrial estate, to further enhance supply reliability.

Cavite Economic Zone is a growing industrial park, located within a nearly 300-hectare property that has become home to hundreds of businesses and a thriving community. Its local cooperative, CEZEMPC, serves the Cavite Economic Zone community—fostering growth and development through collaborative initiatives and strategic partnerships.

During the ceremony, InfiniVAN President Shigeki Nakahara emphasized the company's dedication to excellence, stating, "As a Japanese company, we strive to provide high quality and reliable connectivity. The manufacturing industry is a crucial part of the Philippine economy, and we want to empower these businesses through our internet services."

The signing ceremony was attended by key representatives from both organizations: Levi Vizmanos, Acting Zone Administrator of CEZEMPC (third from the left), and Shigeki Nakahara, President of InfiniVAN (fourth from the left), were among those present.

The strategic collaboration between InfiniVAN and CEZEMPC aims to strengthen the technological infrastructure of the Cavite Economic Zone, creating a conducive environment for growth and innovation. This partnership represents a pivotal step in both organizations' commitment to supporting Filipino businesses and local communities through enhanced connectivity solutions.

This alliance extends beyond a conventional business agreement, embodying a shared vision for technological advancement and community development. The collaboration marks a significant milestone in both organizations' trajectories, promising to drive technological innovation and economic growth within the Cavite Economic Zone while contributing to the broader goal of digital transformation in the Philippines.

Laguna Technopark is a major industrial park near Metro Manila and one of the key targets for InfiniVAN's service provision. It is a thriving hub for businesses across diverse industries, including manufacturing, electronics, and technology. With its Dedicated Internet Access (DIA) and other fiber-optic solutions, InfiniVAN ensures enhanced speed, security, and reliability for businesses operating within Laguna Technopark.

Through formal partnership, InfiniVAN will be able to offer end-to-end solutions using its own network lines. By enhancing stability through initiatives like laying underground fiber, the company aims to contribute to smoothing out its customers' business operations.

InfiniVAN has previously served many resident companies yet faced constraints relying on other companies' last-mile connections. Moving forward, it will be able to offer its own last-mile connections, allowing for faster and more flexible communication services at more competitive rates. This is expected to enhance competitiveness further and improve customer satisfaction.
