InfiniVAN, a Philippine subsidiary of our company, Launches New Cable Landing Station Project in Baler, Eastern Philippines, in Partnership with TAISEI CORPORATION

On May 9, 2025, InfiniVAN, Inc. (“InfiniVAN”), a subsidiary of our company engaged in the telecommunications business in the Philippines, launched a new cable landing station construction project in Baler, located on the eastern coast of the Philippines. In connection with this initiative, a signing ceremony was held in Manila ahead of the final agreement with TAISEI PHILIPPINE CONSTRUCTION, INC., which will be undertaking certain preparatory works for the project.

To meet the rapidly growing demand for internet traffic, InfiniVAN is actively developing a robust telecommunications infrastructure in the Philippines.

The new landing station in Baler is positioned to further accelerate InfiniVAN’s nationwide expansion and establish a robust foundation for open-access (carrier-neutral) communications infrastructure. The Baler station offers the following geographic and strategic advantages:

- Located on the eastern coast of Luzon, northern Philippines, it enables open-access landing for international submarine cables. Discussions with prospective customers are already underway.
- Offers a direct route that avoids the “Nine-Dash Line” in the South China Sea, allowing easier access from Japan, the United States, and other Pacific regions.
- Strengthens the resilience of the Philippines’ telecommunications infrastructure, contributing to a more robust and geopolitically secure national network.
- Plans are also being considered for future co-development of an adjacent AI data center at the site.
