Synspective Partners with Airbus Defence and Space to Expand SAR Satellite Services in Europe

We are pleased to announce that we have entered into a radar satellite data framework agreement with Airbus Defence and Space (“Airbus”). This partnership marks a significant milestone in European-Japanese space cooperation, integrating Synspective’s high-frequency SAR data into Airbus’s Earth observation portfolio.

Under this agreement, Airbus will gain access to satellite capacity from Synspective’s expanding StriX constellation, complementing Airbus’s existing radar assets (TerraSAR-X, TanDEM-X, and PAZ) with enhanced revisit times and expanded coverage. Synspective’s inclined orbits significantly improve monitoring of equatorial regions, which are critical for maritime security, natural resource management, and global logistics.
