Notice regarding Completion of Launch for Synspective's Eighth Small SAR Satellite in the StriX Series

We are pleased to announce the successful deployment of our eighth SAR satellite, StriX, the latest addition to its growing constellation. The "Eight Days A Week" mission has taken flight, enhancing the company's ability to deliver persistent Earth observation capabilities to customers worldwide.

The satellite was launched into orbit by Rocket Lab's Electron rocket from Launch Complex 1 on New Zealand's Mahia Peninsula on March 20, 18:10 (UTC). Over the coming months, Synspective will conduct testing and commissioning to verify the satellite's observation capabilities before entering service.

This has been incorporated into the full-year performance forecast for the fiscal year ending December 31, 2026, as disclosed on February 13, 2026. The company will promptly inform you of any matters requiring disclosure that may arise in the future.
