Investment in Green Bonds Issued by Kanagawa Prefecture

CREATE SD HOLDINGS CO., LTD. hereby announces that CREATE SD CO., LTD., its core operating company, has decided to invest in green bonds issued by Kanagawa Prefecture (hereinafter, the “Bonds”).

Green bonds are bonds issued with proceeds earmarked exclusively for green projects that provide environmental benefits. The framework for the Bonds was revised in August 2026. Rating and Investment Information, Inc. (R&I) has confirmed its alignment with the Green Bond Principles 2025 established by the International Capital Market Association (ICMA) and the Ministry of the Environment’s Green Bond and Sustainability Linked Bond Guidelines (2024 edition), and a second-party opinion has been obtained.

In February 2020, Kanagawa Prefecture formulated the Kanagawa Prefecture Flood Disaster Preparedness Strategy to address flood disasters caused by heavy rainfall, typhoons, and other events associated with climate change. In September of the same year, it established a Green Bond Framework to support implementation of the strategy. In March 2023 and March 2026, the prefecture revised the strategy to further strengthen its measures in light of changes since its formulation, including increasingly severe disasters, the enactment of the Embankment Regulation Act, COVID-19, and advances in disaster response through digitalization and other developments. These revisions were accompanied by revisions to the framework and an expansion of eligible projects. The proceeds from the issuance of the Bonds are scheduled to be allocated to the following projects under the Kanagawa Prefecture Flood Disaster Preparedness Strategy.

Category	Project details
Rivers (flooding)	➤ Development of detention basins and improvement of bottleneck points and other locations in watercourses ➤ Enhancement and strengthening of disaster preparedness measures for rivers
Debris flows, landslides, etc.	➤ Development of sediment disaster preparedness facilities ➤ Development and reinforcement of forest control facilities and forest road facilities
Rivers and storm surges	➤ Development and reinforcement of agricultural irrigation and drainage facilities, etc.
Storm surges and high waves	➤ Development of coastal conservation facilities, etc. ➤ Reinforcement of disaster preparedness functions at fishing ports and harbor facilities, etc.
Impacts on urban infrastructure (transportation) and daily life	➤ Enhancement and strengthening of disaster preparedness measures for roads - Works to mitigate landslides and rockfalls along roads, undergrounding of power lines, and conversion of road lighting to LEDs

As a company founded in Kanagawa Prefecture, we will contribute to the realization of “a sustainable Kanagawa that protects the lives of its residents” and continue to advance initiatives that support the achievement of the SDGs, thereby contributing to a sustainable society.
