*Source: Asset management company; based on disclosure materials from each residential-focused J-REIT as of September 17, 2026.
Note that the term “residential-focused J-REIT” refers to investment corporations listed on the Tokyo Stock Exchange’s Real Estate Investment Trust Market that primarily invest in residential properties and have a residential investment ratio of 90% or more in their portfolios.

Message from Top Management

ADR IRM

Advance Residence Investment Corporation (ADR) is an investment corporation that boasts one of the largest asset holdings among J-REITs specializing in residential properties. It is managed by ITOCHU REIT Management Co., Ltd. (IRM), the ITOCHU Group's asset management company. Upholding the basic policy of realizing stable, long-term profit sharing, ADR builds a well-balanced portfolio by diversifying across investment areas and housing types.

In the residential sector, which serves as the foundation for daily life and as vital infrastructure, ADR and IRM provide comfortable and safe rental housing by incorporating high-quality rental properties and carrying out appropriate maintenance and proactive renovations, thereby supporting rich, safe, and comfortable lives for their tenants.

Furthermore, to remain "an entity that provides all stakeholders with a lasting sense of security, trust, and hope," we cherish the spirit of *Sampo-Yoshi* ("good for the seller, good for the buyer, and good for society"), the ITOCHU Group's corporate mission. We strive to increase tenant satisfaction while sincerely responding to our unitholders' requests and expectations, aiming to enhance the value of our assets and deliver sustainable returns.

In addition to these business activities, we are actively promoting sustainability-related initiatives.

On the environmental front, ADR has been recognized for meeting CDP's high standards for addressing and disclosing climate change issues. In FY2025, ADR received an "A" score, the highest rating in CDP's Leadership level, for the second consecutive year, and was selected for the "A List." We will continue to step up our initiatives to reduce environmental impact and further enhance unitholder value.

On the social front, beyond ensuring safe and comfortable living environments for our tenants, we are enhancing resilience, promoting respect for human rights and diversity, and contributing to local communities. IRM also makes continuous efforts to create a workplace where diverse talent can make the most of their abilities and to support employees' health and growth.

On the governance front, we ensure sound and highly transparent operations and work to strengthen appropriate disclosure, risk management, and compliance.

This Sustainability Report has been prepared to provide our stakeholders with a clear overview of sustainability promotion at ADR and IRM. It summarizes our Sustainability Policy and promotion structure, as well as our specific initiatives, targets, and results in the environmental, social, and governance areas, external certifications we have received, and various other data. We hope this report will help you understand our approach and activities.

The environment surrounding the real estate market is expected to continue changing. ADR and IRM will respond to these changes flexibly and positively and pursue sustainable growth by reducing environmental impact, coexisting with society, and practicing sound and highly transparent governance.

We sincerely ask for your continued support and guidance.

Wataru Higuchi

Supported Initiatives / External Evaluations and Certifications

ADR IRM

ADR and IRM regard addressing social issues—such as climate change; the conservation of biodiversity and the natural environment; human rights; and diversity, equity, and inclusion (DEI)—as critical to achieving a sustainable society. Based on this commitment, we are working to sign and endorse the initiatives below and to promote, obtain, and improve external evaluations and certifications.
For an overview of each initiative and evaluation, please click on the logos and visit the respective websites.

Supported Initiatives

IRM **Japan Climate Initiative (JCI)** — Supported July 2019

IRM **Task Force on Climate-related Financial Disclosures (TCFD)** — Supported March 2020

IRM **GX Future Consortium** *1 — (**TCFD Consortium**) Membership in April 2020

ADR **SBTi (SBT Initiative)** — Acquired SBT certification in March 2023

IRM **Principles for Responsible Investment (PRI)** — Supported March 2024

IRM **Task Force on Nature-related Financial Disclosures (TNFD)** — April 2025 Joined the TNFD Forum

ADR **TNFD Adopter** — Became a TNFD Adopter in August 2025

*1 This platform was launched in April 2026 to promote the creation of a GX market and the development of related rules through public-private collaboration, with the GX Promotion Organization serving as the secretariat. It was established by reorganizing and expanding the former TCFD Consortium, which had been promoting climate-related disclosure.

*2 The “Great Place to Work” certification is awarded to companies whose employee survey results exceed a certain threshold, based on a survey conducted by Great Place to Work. To receive this certification, a “relationship of trust” between employees and leaders is essential; this relationship is built on three elements: “trust,” “respect,” and “fair treatment.” Furthermore, the top 100 companies among the certified firms are ranked as “Great Places to Work.”

Obtaining external evaluations/certifications

ADR **The 2025 CDP Climate Change questionnaire**
Leadership Level “A” Score
“A-List” Company—
Recognized for Two Consecutive Years

ADR **The 2025 CDP Climate Change Program Supplier Engagement Assessment**
Supplier Engagement Leader
Selected for the second consecutive year

ADR **MSCI ESG Ratings**
Received “A” rating in May 2025

ADR **DBJ GreenBuilding certification**
Number of certified

Sustainability Policy and Structure

IRM

Sustainability Policy

IRM considers efforts to achieve Net Zero by 2050 and to address climate change and social issues as important issues in our business activities, and have established the "Sustainability Policy" and will contribute to the realization of a sustainable society by implementing this policy in our asset management operations and overall business activities.

1 Efforts toward achievement of Net Zero by 2050

We will contribute to achieving Net Zero by 2050 and to mitigating climate change by reducing greenhouse gas emissions from the operation of our property holdings by installing energy efficient equipment and adopting renewable energy.

2 Consideration and conservation of the global environment

We will contribute to the preservation of the global environment by analyzing data on environmental impacts, understanding the impact of our business activities on the environment, and giving due consideration to ecosystems and biodiversity.

3 Resource conservation and waste reduction

Through collaboration with stakeholders, we will contribute to the achievement of a society that conserves and recycles resources by encouraging tenants to conserve electricity and water and to recycle waste.

4 Creating a Great Place to Work

We will promote the creation of a work environment that is healthy and comfortable so that individual executives and employees can fully demonstrate their abilities. We will also promote initiatives that take DEI and human rights into consideration and foster an organizational culture that recognizes and respects diversity.

5 Contribution to tenants and local communities

We will strive to offer high quality properties to tenants and contribute to local communities through collaboration with our employees and other stakeholders including property management companies.

6 Legal compliance and the establishment of an organizational structure

We will establish an appropriate organizational structure to ensure compliance with ESG-related laws and regulations to prevent risks.

7 Transparent disclosure

When disclosing our ESG-related policies and initiatives, we will take the perspective of unitholders and make disclosures easy to understand.

Promoting Sustainability

To realize our Sustainability Policy, IRM has set targets for material issues—priority challenges identified by IRM and ADR as requiring solutions—and is implementing a PDCA cycle to achieve those targets.

Sustainability Promotion Framework

In order to systematically pursue sustainability improvement activities, IRM have established the Sustainability Promotion Committee, which is chaired by the representative director, and the Sustainability Practical Committee, which is composed of employees responsible for actual operations in each department.

For more information, see 'Governance' on P.13.

ITOCHU Corporation's Sustainability Policy

ITOCHU Corporation, our main sponsor, has defined its direction on promoting sustainability in its Sustainability Policy and has formulated Sustainability Action Plans, which identify key sustainability challenges. ITOCHU Corporation pursues sustainability based on a PDCA cycle through such efforts as holding semi-annual review meetings.

Details can be found here.

Materiality and Targets

ADR IRM

ADR and IRM have identified the following ten materiality items as important issues to be solved as a priority in promoting sustainability and are executing the PDCA cycle to achieve our goals. Also, in September 2022, ADR established targets and KPIs to enhance the effectiveness of materiality. Since then, we have been conducting periodic reviews.

Materiality Identification Process

1 Identify

We have identified issues for consideration from wide range of issues concerning economy, environment and society by referring to guidelines from GRI Standards and external evaluations (GRESB, DJSI, MSCI ESG, etc.)

2 Prioritize

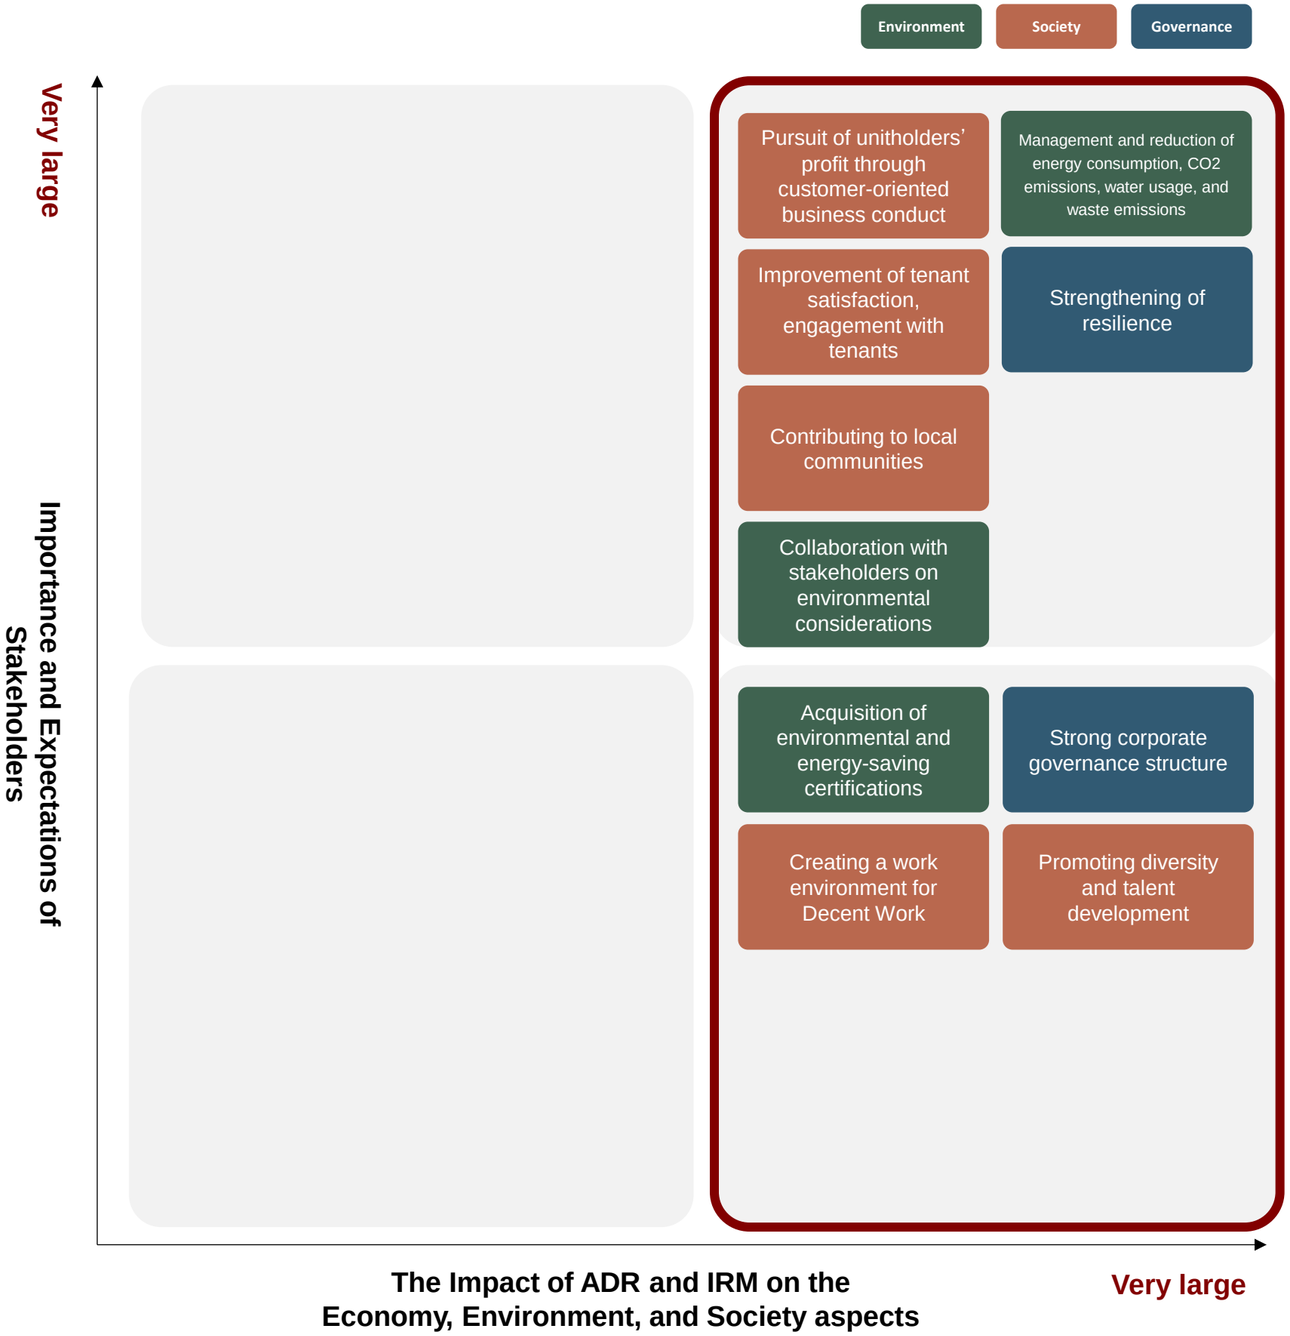

We determined ten issues to be material among the identified issues, for consideration by evaluating and ranking the potential impact on ADR and IRM and the level of stakeholder's concern regarding the issues.

3 Authorize

The ten issues that have been identified as material at our sustainability committee, have been authorized by our Representative Director as issues material to ADR's initiatives in promoting sustainability.

4 Review

In order to flexibly address to changing challenges, reflect stakeholders expectations and improve our disclosure transparency we will periodically review our materiality.

Materiality and Targets

ADR IRM

	Materiality (sustainability-related important issues)	Targets and KPIs	Subject	Latest Progress	Related SDGs	Page where it appears
Environment	Management and reduction of energy consumption, CO2 emissions, water usage, and waste emissions	**< Energy consumption >**20% reduction (intensity) by FY2030 to date (vs. FY2018)	ADR	Reduction of **14.0%** (intensity) vs. FY2018 *Actual results for FY2025	6 7 11 13	p.25 p.26
		< CO2 emissions (GHG) > **Scope1・2** : 51% reduction (total) by FY2030 to date (vs. FY2018) Net zero by FY2050 **Scope3** : Identification of corresponding categories and scope determination and calculation		**Scope1・2** emissions: **98.8%** (total)reduction *Actual results for FY2025 **Scope3** Identified corresponding categories and determined their scope Calculated FY2025 results		
		< Water usage > Do not increase intensity (common areas) by FY2030 to date (vs. FY2018)		Reduction of **20.3%** (intensity) vs. FY2018 *Actual results for FY2025		
		< Waste > Recycling rate 65% (emissions related to construction of exclusive use areas)		Recycling rate: **98.8%** *Actual results for FY2025

Note
- TCFD/TNFD analyses' respective estimates are based on ADR's past investment performance, climate scenarios provided by international institutions and other entities, parameters published by relevant government bodies and third-party organizations, and other available data, and do not represent the actual impacts on our business.
- Countermeasures anticipated based on scenario analysis are hypothetical assumptions for the purpose of impact assessment and do not represent our current plans or decisions to implement them. We will develop specific measures and adjust implementation schedules based on changes in circumstances.
- As a general rule, the figures presented in this report are based on data as of FY2024, with the financial figures representing the 28th and 29th terms.
- While we have considered the characteristics of each scenario and consulted with third-party organizations and other entities, we do not guarantee the accuracy, completeness, or comprehensiveness of this analysis.

Climate Change and Natural Capital Initiatives

IRM

Approach to Climate- and Nature-Related Issues

IRM believes that incorporating environmental, social, and governance (ESG) considerations into its business activities is essential for realizing a sustainable society and enhancing long-term shareholder value. Based on this belief, we established our “Sustainability Policy” in 2015 and have been implementing it ever since. This policy applies to IRM’s asset management operations and all of its business activities.

Addressing climate change and natural capital is one of the key priorities outlined in this policy. We strongly recognize that climate change has a significant impact on the natural environment, economic activities, and our own business operations; furthermore, we recognize that the health of natural capital—such as water, land, and biodiversity—on which our business activities depend and which we influence, serves as the foundation for corporate value and societal sustainability.

If climate change and the degradation or loss of the natural environment continue to progress, this could have financial implications for the entire value chain of the Investment Corporation and IRM. At the same time, we believe that proactively addressing these climate- and nature-related challenges will contribute to enhancing our competitiveness over the medium to long term. Addressing climate change and conserving natural capital are closely interrelated and inseparable challenges; it is therefore important to view them holistically and tackle them as a unified whole. Based on the 2050 Vision and 2030 Targets set forth in the “Kunming-Montreal Framework for Biodiversity,” the Investment Corporation and IRM aim to contribute to achieving “Nature Positive” by incorporating initiatives such as climate change countermeasures, efficient resource use, sustainable procurement, and consideration for biodiversity into their business activities, while also striving to strengthen their business foundation and sustainably enhance corporate value. Going forward, we will continue to accurately identify and analyze key climate- and nature-related issues and promote our sustainability initiatives through disclosure.

TNFD Forum Member

Integrated disclosure based on the TCFD and TNFD frameworks

To identify key climate-related and nature-related issues, IRM first endorsed the recommendations of the TCFD (Task Force on Climate-related Financial Disclosures) in March 2020 and has been assessing and disclosing climate-related risks and opportunities. Furthermore, in 2025, to deepen our analysis of nature-related issues, we expressed support for the TNFD (Taskforce on Nature-related Financial Disclosures) policies, and have been collecting information as a TNFD Forum member. Based on these initiatives, this report will disclose climate related and nature-related issues based on the four pillars of the TCFD and TNFD disclosure frameworks: **Governance**, **Strategy**, **Risk management**, and **Metrics and Targets**.

	Governance	Strategy	Risk management	Metrics and Targets
TCFD Disclosure	《 TCFD and TNFD Common Points 》 Management’s roles and oversight by the Boards of Directors of IRM and each investment corporation p.13	Classify changes in the external environment resulting from climate change into transitional and physical risks; assess risks and opportunities; identify factors with significant impact; and conduct scenario analysis. p.16	《 TCFD and TNFD Common Points 》 Risk identification and evaluation and integration with company-wide risk management p.13	《 TCFD and TNFD Common Points 》 We have established indicators and targets (KPIs) to promote solutions to climate-related issues and the conservation of the natural environment, with the goal of reducing our environmental impact. p.23
TNFD Disclosure		Adopting the “LEAP Approach” to identify risks and opportunities related to natural capital p.18		

Climate Change and Natural Capital Initiatives

IRM

Governance

Management's roles and oversight by the Boards of Directors of IRM and each investment corporation

- IRM has established the Sustainability Promotion Committee, which is chaired by the representative director, and the Sustainability Practical Committee, which is composed of employees responsible for actual operations in each department.
- The Sustainability Promotion Committee meets at least twice a year to implement a PDCA cycle with the aim of improving asset value over the medium to long term. The PDCA cycle consists of the following steps: formulate sustainability goals and initiatives, identify and evaluate climate related and nature-related risks and opportunities, analyze climate-related and nature-related risks and manage them company-wide, monitor environmental performance as well as the results of ESG evaluation by external organizations, verify the degree of achievement of goals, and reset goals for remaining and new challenges.
- Climate-related and nature-related goals are set by the representative director, who is the chief executive officer of sustainability, and the progress made toward goals and on initiatives is reported to the Board of Directors of IRM and each investment corporation at least once a year. The Sustainability Practical Committee is responsible for promoting various measures needed to achieve these goals.

Supervison	Boards of Directors of IRM and each investment corporation	Monitoring the progress of our sustainability initiatives through regular reporting.
Approve	Chief executive officer of sustainability (representative director, president & CEO)	Approval of policies, targets and plan Enhancing Sustainability Structure.
Discuss, report	Sustainability Promotion Committee	Discussion and reporting on policies, targets and plan Committee chair：Chief executive officer of sustainability (representative director, president & CEO) Members：Executive officers, general managers, compliance officer, general manager of the Compliance and Risk Management Department, general manager of the Internal Audit Office, General Manager of Sustainability Promotion Department
Plan, promote, implement	Sustainability officer (general manager of General Affairs and Management Division)	Collaborating with each general manager to oversee sustainability initiatives.
	Sustainability managers (general managers)	Collaborating with department heads to execute sustainability initiatives.
	Sustainability Practical Committee	Planning, promotion and implement of the practice Members：Sustainability Promotion Department, each department's sustainability personnel

Risk Management

Risk identification and evaluation and integration with company-wide risk management

- IRM has clearly defined its fundamental approach to risk management and its internal management framework. With the aim of contributing to the proper conduct of business operations and ensuring sound management, the company has established the "Risk Management Regulations" and "Risk Management Standards" as internal regulations. These regulations designate the President and Representative Director, who serves as the Chief Executive Officer (CEO), as the person with overall responsibility for risk management, and the heads of each department and office as the risk management officers for their respective departments.
- IRM identifies climate-related and nature-related risks as having significant financial and strategic implications for its business and manages them by integrating them into its company-wide risk management process.
- The Compliance and Risk Management Office conducts impact assessments as part of company-wide risk management by consolidating concerns and the status of control activities for each risk from executives and risk management officers. At the beginning of each fiscal year, the office identifies risks surrounding IRM. Following discussions involving management, including the President and Representative Director, it selects items requiring focused attention. It reports these items to the Compliance Committee and the Board of Directors, among others. Furthermore, as the fiscal year progresses, it monitors the status of control activities addressing.

Process Diagram for Managing Climate- and Nature-related Risks

Risk identification and evaluation Identify risks, gather information and evaluate their impact as company-wide risks	Sustainability Promotion Department Compliance and Risk Management Department Compliance Committee Board of Directors
Risk management and response Appropriately manage and deal with risks in business operation	Sustainability Promotion Department and other relevant departments
Monitoring and reporting Consider improvements as needed	Representative director, President & CEO Compliance Committee Board of Directors

Climate Change and Natural Capital Initiatives

ADR

Climate-related and Nature-related issues: Scenario outline

To identify climate- and nature-related issues, we first assessed how changes in climate and the natural environment could affect ADR's business environment.
To assess our resilience, we have adopted two extreme scenarios for ADR: one with maximum transition risks and the other with maximum physical risks. Specifically, in one of the scenarios, **social changes associated with achieving Nature Positive impact our business**, and in the other, **climate change and natural disasters caused by nature destruction impact our business**.
Please follow this link for details of the scenarios recommended by the TNFD.
For specific climate change scenarios, please see page 13.

Transition risks：Risks associated with the transition to a decarbonized society and a society in harmony with nature. Tighter environmental regulations, the introduction of carbon pricing, and growing demands from customers and investors may necessitate a reevaluation of business operations and products, additional investments, and increased costs.

Physical risks：Risks arising from climate change and changes in the natural environment. Floods, droughts, extreme weather events, ecosystem degradation, and water scarcity may lead to operational shutdowns, difficulties in procuring raw materials, and increased costs.

High

Transition risks (Market and non-market consistency)

Low

Gradual deterioration ← **Physical risks (ecosystem services deteriorate)** → **Rapid deterioration**

Nature degradation progresses gradually, with low physical risks and high transition risks.

Toward a nature-positive world, regulations and measures are strengthened, mitigating the impacts of climate change and other effects stemming from nature destruction.
A scenario where social changes associated with achieving Nature Positive impact our business

TCFD/1.5ºC Scenario
TNFD/Scenario A

Nature degradation progresses rapidly, with high physical risks and high transition risks.

Regulations and other policy measures are behind, even as the impacts of nature loss have grown severe. In the period ahead, both regulatory action and corporate voluntary efforts are likely to gain momentum.
A scenario where both nature degradation and regulatory compliance costs impact our business.

Nature degradation progresses gradually, with low physical and transition risks.

The existing regulations and measures are producing short-term benefits for nature, resulting in a lower priority for advancing nature conservation.
A scenario where the impacts of nature Destruction have not materialized and do not affect our business.

Nature degradation progresses rapidly, with high physical risks and low transition risks.

Regulations and measures for nature conservation are not advancing, and the impacts of nature destruction, including climate change, are worsening.
A scenario where climate change and natural disasters caused by nature destruction impact our business

TCFD/4ºC Scenario
TNFD/Scenario B

Climate Change and Natural Capital Initiatives

ADR

Climate-related and Nature-related issues: List of risks and opportunities

Based on the overview of the scenarios developed using the TCFD and TNFD analysis frameworks, we have identified the following climate-related and nature-related risks and opportunities. Please see the corresponding explanatory pages for the details of each analysis and identification procedure, and the analysis results for each scenario.

TCFD disclosure･･･Page 16
TNFD disclosure･･･Page 18

Category		Factor	Impact (Risk/opportunity)	Climate change		Natural capital	
				1.5℃	4℃	Scenario A	Scenario B
Transition risks	**Policies/ regulations**	Relevant regulatory enhancement to control carbon emissions	Operational costs increase due to carbon tax.	○	○	○	○
			Procurement costs for construction materials increase due to carbon tax.	○	○	-	-
			Property acquisition costs increase due to higher construction costs associated with energy code compliance.	○	○	○	○
		Waste management	Recycling costs increase due to social movements promoting reuse and recycling.	-	-	○	○
	Markets	Progress in climate-focused investments and financing	Fundraising costs increase due to delay in climate-proofing the company’s properties (not qualifying for reduced interest rates).	○	-	-	-
		Changes in tenant demands (Growing needs for climate-proof properties)	Income from leasing business declines due to delay in climate-proofing properties.	○	-	-	-
Physical risks	**Acute**	Intensified natural disasters and a higher risk of wind and flood hazards, including heavy rainfalls, typhoons, floods, landslides, ground instability, and high tides	Intensifying natural disasters damage properties and result in a loss of business opportunities.	○	○	○	○
	Chronic	Higher average temperatures and intensified natural disasters	Energy costs rise due to a higher average temperature.	○	○	○	○
			Casualty insurance premiums rise as natural disasters intensify.	○	○	○	○
Opportunities	**Resource optimization**	Stricter energy conservation regulations	Cut operational costs to reduce energy consumption.	○	○	○	○
		Compliance with stricter water consumption regulations	Enhance water efficiency of properties by deploying water-saving facilities (low-flow toilets and showers) actively and progressively to make properties appealing.	-	-	○	○
		Waste management	Continue waste sorting practices that maintain high recycling rates to help promote reuse and recycling for the entire society.	-	-	○	○
	Markets	Progress in climate-focused investments and financing	Implement climate measures to lower fundraising costs and attract investment (qualify for reduced interest rates).	○	-	-	-
		Changes in tenant demands (Higher needs for climate-proof properties)	Provide low-carbon facilities and services for tenants to increase rental income (high occupancy ratio, high rents).	○	-	-	-
	Products and services	Control of hazardous substances from construction work	Mitigate additional costs from stricter regulations by maintaining compliant construction practices, including proper hazardous material management.	-	-	○	○

＊For each risk and opportunity, items that do not materialize under the given scenario are marked with “-”.

TCFD Climate Change Response

ADR

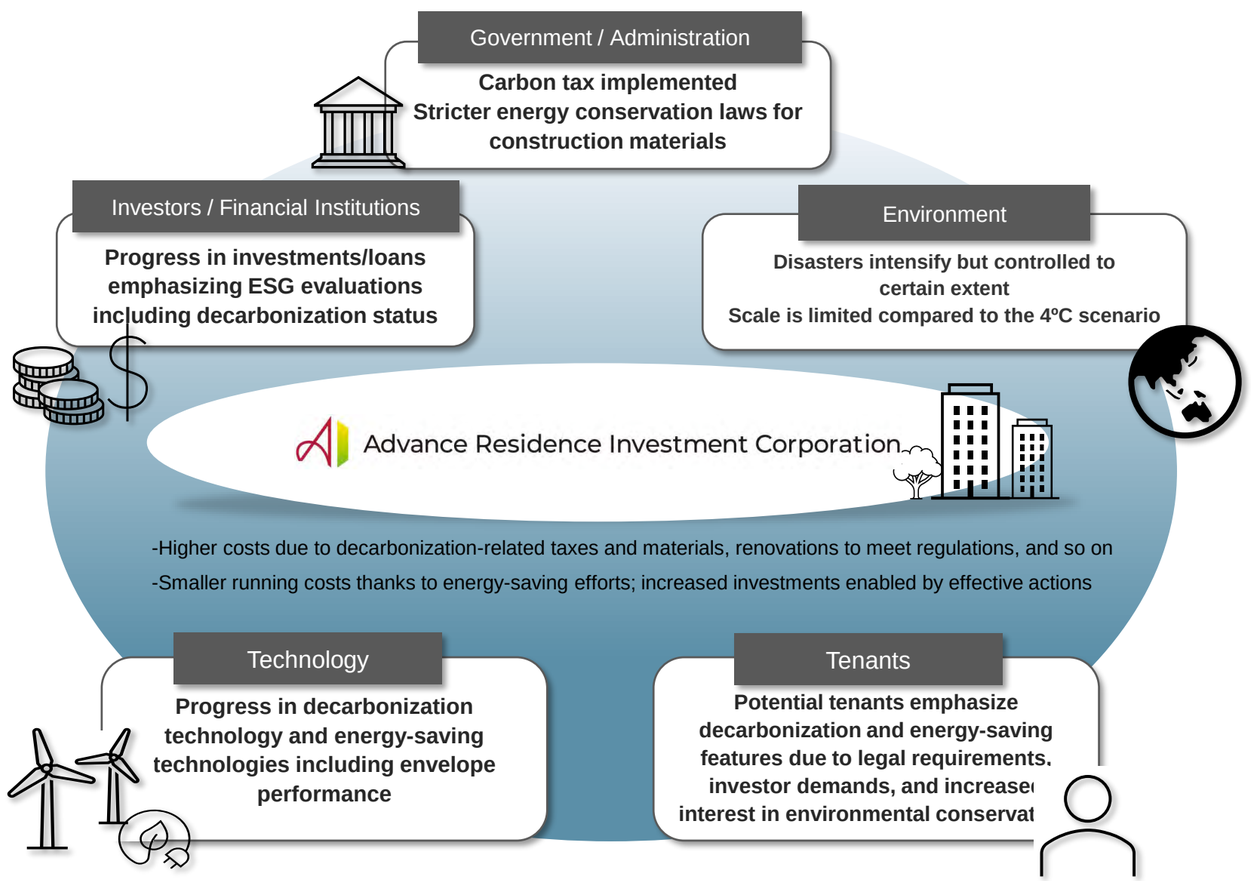

Strategy

Scenario Analysis

We classify various change factors in the external environment resulting from climate change into transition risks and physical risks and identify and evaluate them as risks and opportunities. We select any factors that have a material impact on our business and run scenario analysis. We mainly analyze and calculate transition risks related to “policies/regulations, markets, reputation,” and physical risks in the categories of “acute/chronical,” and opportunities related to “markets, energy sources, resource efficiency, products and services.” We aim to reduce our environmental impact while achieving a medium- and long-term growth by addressing climate change-related risks and enhancing our efforts to capture opportunities.
The following chart shows the images of the world surrounding our investment corporations in the climate change scenarios with 4-degree Celsius temperature rise and a 1.5-degree Celsius temperature rise as the background for risk and opportunity identification and evaluation.

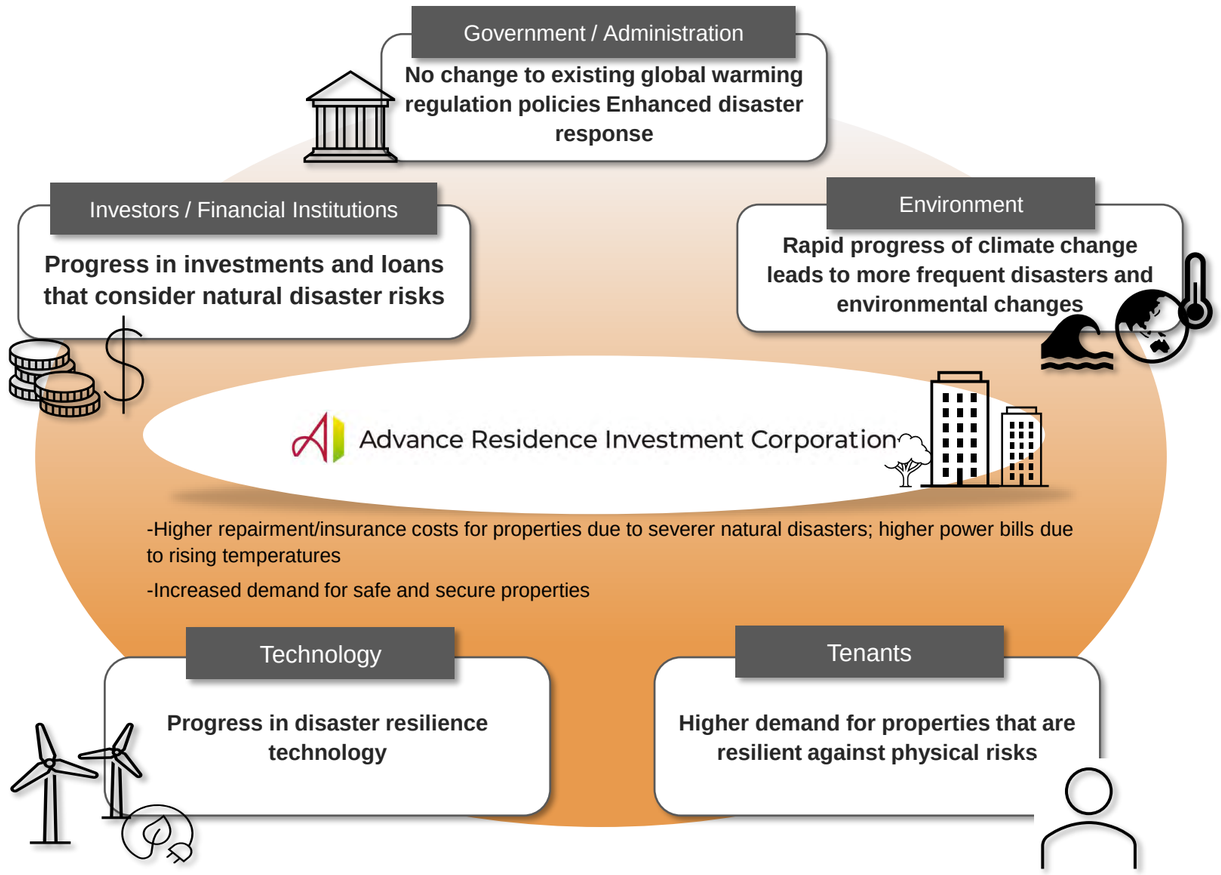

1.5℃

Scenario-based worldview
Entire society has shifted towards decarbonization and successfully controlled temperature rises; Progress in laws/regulations and technological innovation; Social changes that occur in the process of decarbonization Impact our business
The primary reference scenarios
IEA (International Energy Agency) NZE（Net Zero Emission by 2050 Scenario), APS（Announced Pledges Scenario)

4℃

Scenario-based worldview
Economic development has been prioritized, resulting in higher temperature rises and more serious impacts; Global warming causing more serious impacts than present such as severer wind and water damage and sea level rises; Natural catastrophes caused by climate change impact our business
The primary reference scenarios
IPCC（Intergovernmental Panel on Climate Change）SSP5- 8.5

TCFD Climate Change Response

ADR

Risk and opportunity identification and impact analysis

The following table shows climate risks for ADR identified based on the 1.5ºC and 4ºC scenarios as well as their financial impacts, countermeasures, and business opportunities.
The metrics and targets established to manage these risks and opportunities are explained on page 23, alongside findings from TNFD-based analysis.

Category		Factor	Impact (Risk/Opportunity)	Financial impact (millions of yen)		Priority for action		Countermeasures
				1.5℃	4℃	1.5℃	4℃	Overview
Transition risks	Policies/ regulations	Relevant regulatory enhancement to control carbon emissions	Operational costs increase due to carbon tax.	▲ 130	▲ 2	Medium	Low	■ Deploy LED lighting ■ Introduce renewable energies
			Procurement costs for construction materials increase due to carbon tax.	▲ 160	▲ 2	Medium	Low	■ Use subsidiaries and incentive systems
			Property acquisition costs increase due to higher construction costs for energy code compliance.	▲ 10	▲ 10	Low	Low	■ Highlight energy cost saving benefits during the leasing process
	Markets	Progress in climate-focused investments and financing	Fundraising costs increase due to delay in climate proofing the company's properties (not qualifying for reduced interest rates).	▲ 239	-	Medium	-	■ Continue acquiring environmental certificates (issue sustainability bonds) ■ Enhance information disclosure and engage investors
		Changes in tenant demands (Growing needs for climate-proof properties)	Income from leasing business declines due to delay in climate-proofing properties.	▲ 1,096	-	High	-	■ Continue acquiring environmental certificates ■ Anti-flood measures (install water stops, drainage pumps, water sensors, alarm devices) ■ Conduct disaster drills; secure disaster prevention goods
Physical risk	Acute	Intensified natural disasters and a higher risk of wind and flood hazards, including heavy rainfalls, typhoons, floods, and high tides	Intensifying natural disasters damage properties and result in a loss of business opportunities.	▲ 232	▲ 465	Medium	High	■ Anti-flood measures (install water stops, drainage pumps, water sensors, alarm devices) ■ Conduct disaster drills; secure disaster prevention goods ■ Reduce damage (lost rents) by purchasing fire insurance
	Chronic	Higher average temperatures and intensified natural disasters	Energy costs rise due to a higher average temperature.	▲ 4	▲ 10	Low	Low	■ Deploy LED lighting
			Casualty insurance premiums rise as natural disasters intensify.	▲ 6	▲ 13	Low	Low	■ Regularly review fire insurance coverage
Opportunities	Resource efficiency	Stricter energy conservation regulations	Cut operational costs to reduce energy consumption	11	11			
	Markets	Progress in climate-focused investments and financing	Implement climate measures to lower fundraising costs and attract investment (qualify for reduced interest rates).	239	-			
		Changes in tenant demands (Higher needs for climate-proof properties)	Provide low-carbon facilities and services for tenants to increase rental income (high occupancy ratio, high rents).	1,096	-			

* Costs are marked with ▲.
Of the risks and opportunities, items that do not materialize under the relevant scenario are marked with "-".
For risks envisaged under the 1.5℃and 4℃ scenarios, we indicate the priority for action as "high," "medium," or "low," taking into account the expected timing of occurrence and the business impact.

TNFD Natural Capital Initiatives

ADR

TNFD recommendations: General requirements

The following are the six general requirements from the TNFD recommendations, or basic principles and requirements for all organizations conducting disclosure based on them.

General requirements	Measures implemented
Application of materiality	Based on objective information from external tools regarding the business activities listed below, we identified the dependency and impact factors, risks, and opportunities for ADR as described in “The TNFD Analysis Process.” Considering both the impact of nature on ADR's business and the impact of ADR's business on nature from a double materiality perspective, we identified material nature-related issues based on their significance, frequency of occurrence, and likelihood of occurrence.
Scope of disclosure (Business activities subject to analysis)	Direct operations: real estate investment, building completion Upstream value chain: building construction Proceed to STEP1 for details
Location of nature-related issues	Since this analysis was conducted for all properties, we did not specify priority regions or properties. Proceed to STEP3 for details
Integration with other sustainability-related disclosures	For shared elements with the TCFD analysis and disclosure framework, we have integrated our disclosure.
Timeline	The analysis is conducted under 2030 scenarios assuming changes in nature.
Engaging stakeholders	ADR understands how our business activities impact the environment and society and commits to a sustainable society by fulfilling our corporate responsibilities. To that end, we have implemented initiatives to serve tenants and local communities as set forth in our Sustainability Policy. We also clarify our human rights guidelines by disseminating our Sustainability Procurement Policy and Sustainability Procurement Guideline, including prohibition of forced labor and child labor. We also conduct regular surveys to monitor compliance, promoting relevant initiatives throughout the supply chain.

TNFD analysis process

For TNFD analysis, we used the LEAP approach. It is a systematic procedure involving identifying the value chain, touch points with nature, and priority regions (Locate); evaluating the dependencies and impacts on nature in those points (Evaluate); identifying and assessing resulting risks and opportunities (Assess); and managing them and disclosing related findings (Prepare).

L Locate
Identify touch points between the organization’s activities and nature

E Evaluate
Identify and assess how the organization impacts and depends on the environment

A Assessment
Identify and assess environmental risks and opportunities for the organization

P Preparation
Explore, plan, and externally report measures to be implemented for environmental challenges (dependencies, impacts, risks, opportunities).

STEP 1 Identify business activities subject to analysis and disclosure	STEP 4 Identify specific dependencies and impacts on nature	STEP 5 Identify risks and opportunities (identification/ materiality assessment) Analyze financial impacts	STEP 6 Disclose analysis results
STEP 2 Review the degree to which business activities impact and depend on nature			STEP 7 Disclose metrics and targets
STEP 3 Review priority properties			

TNFD Natural Capital Initiatives

ADR

STEP1 Identify business activities subject to analysis and disclosure

ADR has identified the following target value chain components for this TNFD analysis and disclosure. We understand these are just a handful of business activities in the value chain, which actually contains many more, including tenants' actions downstream. However, to clarify natural capital challenges that ADR should prioritize, we have shortlisted those that are highly relevant and impactful for our business activities.

Value chain phase	Major category	Business activity
Direct operation	Real estate	Real estate investment *1
	Construction	Building completion *1, 2
Upstream	Construction	Building construction

*1 We classified our business activities using the International Standard Industrial Classification of All Economic Activities (ISIC). Under the ISIC, real estate investment is defined as "Real estate activities with own or leased property" and building completion is defined as "Building completion and finishing."
*2 This refers to tenant space restoration work, which is included in waste data aggregation for ADR's environmental performance management.

STEP2 Identify the level of dependency and impact in the value chain

To identify natural capital risks and opportunities, we first analyzed the degree to which the target business activities shortlisted in **STEP1** impact and depend on natural capital. For this analysis, we used ENCORE*3.
The results are shown in the heatmap below.
Real estate investment and building completion: Even if ecosystem services deteriorate, the direct impact on these operations will be limited. Meanwhile, the analysis showed that these activities are closely related to various types of natural capital, including water, soil, and air. We have identified some relationship with risks of natural disasters, including storms and floods (Impact level: L and M) Building construction: The analysis showed that building construction has significant impacts on nature, including water pollution, soil pollution and construction noise.

Legend	Very High	High	Medium	Low	Very Low
	VH	H	M	L	VL

【Dependency heatmap】

Value chain phase	Business activity	Provisioning services	Regulation and maintenance services													
		Water supply	Air filtration	Global climate regulation	Regional climate regulation	Noise reduction	Rainfall pattern stabilization	Soil and sediment retention	Solid waste remediation	Storm mitigation	Flood mitigation	Water flow regulation	Water purification	Dilution through atmosphere and ecosystems	Light pollution and visual obstruction	Visual amenity services
Direct operation	Real estate investment	VL	VL	VL	L	VL		M		L	VL	VL			VL	VH
	Building completion	L				VL	VL	M		M	M	M	M			
Upstream	Building construction		VL	M	L	VL	VH	H	VL	M	M	M	M	L	VL	

【Impact heatmap】

Value chain phase	Business activity	Changes in usage patterns for land/freshwater/ocean			Pollution			Resource use	Climate change	Alien species, others	
		Land use realm	Freshwater use realm	Marine use realm	Emission of non-GHG air pollutants	Release of toxic substances into water and soil	Generation and discharge of solid waste	Water consumption	GHG emission	Introduction of alien species	Disturbances such as noise and light
Direct operation	Real estate investment	L			VL	L	VL	L	VL		L
	Building completion				L	H	M	L	M	L	M
Upstream	Building construction	L	M	M	L	H	M	L	H	L	VH

*3 A digital tool co-developed by Global Canopy, the UNEP Finance Initiative: Innovating Financing for Sustainability (UNEP-FI), and the UN Environment Programme World Conservation Monitoring Centre (UNEP-WCMC). This tool is used to assess and disclose the degree to which each type of economic activity as classified under the ISIC impacts and depends on natural capital on a five-level scale, with VL indicating the lowest degree and VH the highest. (Website: https://encorenature.org/en)

TNFD Natural Capital Initiatives

ADR

STEP3 Identify the level of dependence and impact by property

In **STEP2**, we identified the dependencies and impacts that may concern our general business activities. In **STEP3**, we analyzed the degree to which all the properties impact and depend on natural capital to identify the areas and properties that we should prioritize. For this analysis, we used the environmental performance data for each property and an external tool called “WWF Risk Filter” *1.

The analysis showed that the flood risk may increase by 2030, but such trends were not significant for any property or area. The findings were mostly consistent with Japan’s overall trends - there were no areas or properties where the risk of natural disasters was considerably high or our business activities had a critical impact on nature. Therefore, in analyzing the risks and opportunities, we targeted all the properties because we were aware of potential risks and opportunities, including higher water risks due to climate change, future legal amendments, and supply chain impacts on biodiversity.

Assessment items: environmental performance data (energy, water, waste, GHG Scope1・2, and category 13 of Scope3), environmental certification status, greenery area, and ecosystem conditions (assessed using the WWF Risk Filter)

【Excerpt from analysis results （identified properties rated high in the comprehensive environmental impact assessment*2 based on environmental performance）】

No.	Property name	Comprehensive environmental impact assessment	Ecosystem conditions in areas with properties (2025)											Ecosystem conditions in areas with properties (2030)

*1 The WWF Risk Filter is a tool provided by the World Wide Fund for Nature (WWF) used by companies and financial institutions to assess environmental risks (particularly, biodiversity risks) and water risks and analyze various scenarios. The risk rating scale varies by target periods when the level of dependency and impact are measured. In screening for current risks, a five-level scale ranging from 1 to 5 applies, with 4.2 or higher ratings representing extremely high risks. Meanwhile, future risk screening for 2030 uses a six-level scale ranging from 1 to 6.
*2 The comprehensive environmental impact assessment covers the following four items for each property: water consumption, waste output, total emissions from Scope1・2, and emissions from category 13 of Scope3. Each is rated on a scale of 3 points, with a maximum total score of 12. The items were rated as follows based on the performance. All the properties were assessed on the applicable items (consumption or emissions), with the top 20% rated as 3 points and the bottom 20% as 1 point. The remaining middle of 60% was rated as 2 points.

STEP4 Identify dependencies and impacts

To clarify things to consider in identifying risks and opportunities, we explored dependencies and impacts that may concern our general business activities. Specifically, we assessed each stage of our direct operations - real estate investment and building completion - and the upstream building construction sector.
Examples:

- Visual amenity services: In the heatmap created in **STEP2**, this item was rated as “VH” (very high) because the appeal of properties depends on surrounding landscapes. However, we excluded this item from our risk/opportunity analysis. This is because many of our residential properties are conveniently located in city centers and near facilities like stations, and our target tenant demographics are unlikely to emphasize landscapes in selecting properties.
- Control of hazardous substances: We included this item in our risk/opportunity analysis. One reason is because although the item was rated as “L” (low) in the heatmap, we identified some relevance for our business activities. Restoration work is essential for our operations, and controlling the release of hazardous substances from construction materials and paint helps to prevent environmental pollution. In addition, delays in such initiatives may result in higher operational costs due to regulatory enhancement in the future.

TNFD Natural Capital Initiatives

ADR

STEP5 Identify risks and opportunities (identification/materiality assessment)

Based on the dependencies and impacts identified as possibly relevant to business activities in **STEP4**, we have thoroughly identified potential risks and opportunities for ADR. We considered the potential impacts on our direct operations, i.e., real estate investment and building completion, as well as construction in the upstream value chain.

≪Identifying risks and opportunities≫

Risks and opportunities in direct operations (real estate investment and building completion): We have identified how our daily investment activities affect natural capital, including water resource consumption, energy consumption, waste outputs, land use, and impacts on biodiversity. We have also itemized consequences such as increases in management costs and legal and regulatory risks. We also explored opportunities arising from measures to mitigate environmental impacts, including deploying energy conservation facilities, using renewable energies, and promoting greening initiatives.
Risks and opportunities in the upstream value chain (construction): As indicated in **STEP2**, construction work is believed to have significant impacts on natural capital, including those of material procurement, pollution from construction work, restrictions on land use, and effects on biodiversity. However, in identifying such risks and opportunities, we struggled to trace impacts on nature from construction work to ADR's activities. Therefore, instead of exhaustively assessing risks and opportunities from the upstream construction process, we shortlisted risks that may emerge from our real estate investment activities.

【Workflow for identifying risks and opportunities (excerpt from the list) 】

Category			Identified risks and opportunities (draft)
Risk	Physical	Acute	Intensifying natural disasters such as floods and storms result in increased property damage, leading to higher restoration costs, premiums, etc.
			Climate measures to prevent severe natural disasters result in a cost increase (damage prevention measures, including strategic placement of cubicles and flood prevention)
			As climate change alters the natural environment (through earthquake and rainfall effects), soil becomes unstable. Damage from landslides and similar events results in higher disaster response costs and increased premiums.
			Intensifying natural disasters such as floods and storms may disrupt construction processes, leading to higher costs from extended schedules and other factors.
			Soil instability from environmental changes (ground subsidence due to earthquakes and prolonged rainfall) may disrupt construction processes, leading to higher costs from extended schedules and other factors.
		Chronic	Deteriorated air quality results in reduced residential comfort and higher health risks, leading to a decline in property value and rental income.
			As the temperature rises, the use of air conditioning will increase, leading to higher energy consumption and utility bills.
			Soil instability from environmental changes may result in lower sales revenue due to reduced property values (rent reductions can be anticipated for such risky properties, and if we divest such properties, selling them at appraisal values below acquisition prices would adversely affect our profit) together with increased costs from property relocation.
			As climate change intensifies natural disasters, areas that were not previously covered by hazard maps are designated as at-risk zones. This would require us to implement t raditional measures such as water barriers and vertical evacuation systems for additional properties
	Transition	Policies and regulations	Upstream: Higher building construction costs (legal and regulatory enhancement: new constructions may not be permitted if a building does not conform to energy efficiency requirements, etc.)

≪Rating for materiality assessment≫

We rated the materiality of identified risks and opportunities based on their likelihood and the degree to which they might affect our business. In conducting the analysis, we found many commonalities and interrelated aspects between nature-related risks and opportunities and climate risks and opportunities. Therefore, we exhaustively analyzed nature-related risks and opportunities while ensuring consistency with the existing TCFD analysis.

【Rating framework for identifying important risks and opportunities (excerpt from the materiality assessment document)】

Descriptions of risks and opportunities		1. Materiality to our company			2. Materiality to stakeholders (investors)	Comprehensive assessment	
		1-1 Impact on business	1-2 Likelihood/ feasibility	Total (average)		Total	Rating*
Risks for real estate investment	Intensifying natural disasters such as floods and storms result in increased property damage, leading to higher restoration costs, premiums, etc.	3	3	3	3	6	A
Risks for real estate investment	Climate measures to prevent severe natural disasters result in a cost increase (damage prevention measures, including strategic placement of cubicles and flood prevention)	3	3	3	3	6	A
Risks for real estate investment	As climate change alters the natural environment (through earthquake and rainfall effects), soil becomes unstable. Damage from landslides and similar events results in higher disaster response costs and increased premiums.	3	1	2	2	4	C
Risks for building completion	Intensifying natural disasters such as floods and storms may disrupt construction processes, leading to higher costs from extended schedules and other factors.	1	3	2	1	3	D
Risks for real estate investment	Deteriorated air quality results in reduced residential comfort and higher health risks, leading to a decline in property value and rental income.	3	1	2	2	4	C

TNFD Natural Capital Initiatives

ADR

STEP6 Disclose analysis results

We qualitatively assessed the financial impacts of individual risks and opportunities based on the two projection models from the "Climate-related and Nature-related issues: Scenario outline" section: Scenario A (gradual nature deterioration) and Scenario B (rapid degradation of nature). In Scenario A, transition risks due to carbon tax and other regulatory enhancements for nature conservation became apparent. Meanwhile, Scenario B indicated that increasing physical risks - property damage and loss of rental income opportunities - from natural disasters, including heavy rainfalls, floods, and ground instability, would pose significant challenges. In addition, both scenarios revealed that stricter waste and water regulations would lead to risks and opportunities for our business activities. To address them, we will establish metrics and targets and continue monitoring progress and improving.

Scenario A	Scenario B
Nature degradation progresses gradually, with low physical risks and high transition risks. A scenario where social changes associated with achieving Nature Positive impact our business	**Nature degradation progresses rapidly, with high physical risks and low transition risks. A scenario where climate change and natural disasters caused by nature destruction impact our business**

Category		Factor	Impact (Risk/opportunity)	Scenario A	Scenario B	Measures
				Financial Impact		Overview
Transition risks	**Policies/ regulations**	Relevant regulatory enhancement to control carbon emissions	Operational costs increase due to carbon tax.	Medium	Low	■ Deploy LED lighting ■ Introduce renewable energies
			Property acquisition costs increase due to higher construction costs for energy code compliance.	Low	Low	■ Highlight energy cost saving benefits during the leasing process
		Waste management	Recycling costs increase due to social movements promoting reuse and recycling.	- (Measures already implemented)	- (Measures already implemented)	■ Maintain recycling ratios (select appropriate vendors)
Physical risks	**Acute**	Intensified natural disasters and a higher risk of wind and flood hazards, including heavy rainfalls, typhoons, floods, landslides, ground instability, and high tides	Intensifying natural disasters damage properties and result in a loss of business opportunities.	Medium	High	■ Flood controls (water barriers/drainage pumps/flood detection sensors/alarm systems) ■ Conduct emergency drills, secure emergency supplies ■ Mitigate damage (rent loss) through fire insurance coverage ■ Continue conducting proper due diligence when acquiring properties and select properties on stable soils
	Chronic	Higher average temperatures and intensified natural disasters	Energy costs rise due to a higher average temperature.	Low	Low	■ Deploy LED lighting
			Casualty insurance premiums rise as natural disasters intensify.	Low	Low	■ Regularly review fire insurance coverage
Oppor-tunities	**Resource optimization**	Stricter energy conservation regulations	Cut operational costs to reduce energy consumption.	Low	Low	
		Compliance with stricter water consumption regulations	Enhance water efficiency of properties by deploying water saving facilities (low-flow toilets and showers) actively and progressively to make the properties appealing.	Not measurable	Not measurable	
		Waste management	Continue waste sorting practices that maintain high recycling rates to help promote reuse and recycling for the entire society.	Not measurable	Not measurable	
	Products and services	Control of hazardous substances from construction work	Mitigate additional costs from stricter regulations by maintaining compliant construction practices, including proper hazardous materials management.	Not measurable	Not measurable	

*For items marked "Not measurable," although we identified them as qualitative opportunities, we decided not to quantify them due to the absence of supporting parameters and other factors.

	over ¥300M	over ¥100M and under ¥300M	under ¥100M
Financial Impact	High	Medium	Low

Climate Change and Natural Capital Initiatives

ADR

STEP7 Disclose metrics and targets

To promote climate-related issues and nature conservation and mitigate environmental impacts, we have established the following metrics and targets (KPIs) and implemented specific measures, including energy conservation, GHG emission control, and reinforced waste recycling initiatives. To achieve these objectives, we track progress and sustain improvement through regular monitoring and the PDCA framework as described in the “Governance” and “Risk Management” sections. For progress on metrics and targets, updates of relevant environmental performance, as well as specific initiatives, please see ADR’s official website .

Item	Targets, KPI
Energy consumption	20% reduction (intensity) by FY2030 (vs. FY2018)
CO2 emissions (GHG Scope1・2)	51% reduction (total) by FY2030 (vs. FY2018) Net zero by FY2050
Water usage	Do not increase intensity (common areas) by FY2030 to date (vs. FY2018)
Waste	Recycling rate 65% (Monitor leased space restoration work where the waste output can be tracked)
Acquisition of environmental and energy-saving certifications	Proportion of environmental and energy-saving certifications acquired by FY2030 30% or more (by total floor space)

Acquisition of SBT* Certification

ADR's target of reducing greenhouse gas (GHG) emissions by 51% (total amount) by FY2030 (compared to FY2018) was certified as a science-based target by the international initiative SBTi (Science Based Targets initiative) in March 2023.

*SBT (Science Based Targets: emission reduction targets based on scientific evidence) is GHG emission reduction targets set by companies that are consistent with the levels required by the Paris Agreement (which aims to limit the global temperature increase to well below 2˚C above pre-industrial levels and pursuing efforts to limit warming to 1.5˚C). The SBT Initiative is an international initiative of CDP, the United Nations Global Compact (UNGC), the World Resources Institute (WRI), and the World Wide Fund for Nature (WWF) to certify companies that set SBT.

Establishing an Environmental Management System

Based on its Sustainability Policy and related regulations, IRM operates a PDCA cycle through its environmental management system to manage, analyze, and improve environmental performance data for the properties held by the investment corporations it manages and for its own business activities, aiming to continuously reduce environmental impact and realize a sustainable society.

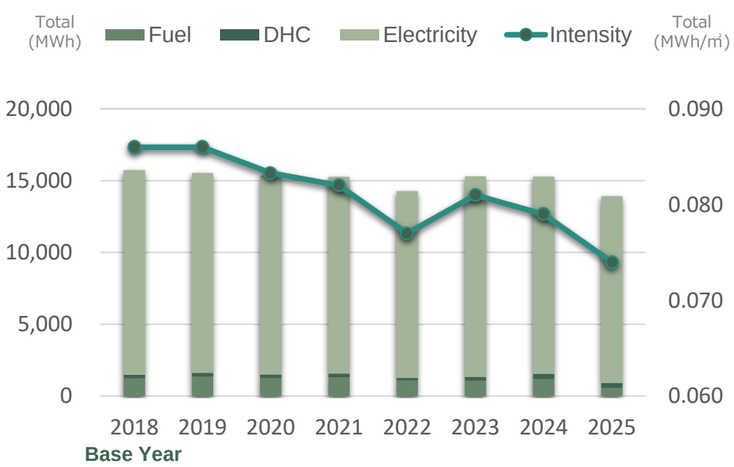

Environmental Performance Data

ADR

The graph below shows the evolution of environmental performance data in ADR up to FY2025. Detailed data can be found in the Data section of this report.

Energy consumption

Target 20% reduction (intensity) by FY2030 (vs. FY2018)

Intensity Change rate FY2025 Actual Results

-14.0%

VS. FY2018

CO2 emissions（GHG Scope1・2）

Target 51% reduction (total) by FY2030 (vs. FY2018) Net zero by FY2050

Total Volume Change Rate FY2025 Actual Results

-98.8%

VS. FY2018

Introduction of Renewable Energy through Procurement of Non-Fossil Certificates and J-Credits Derived from Renewable Heat

In FY2025, ADR achieved the 100-percent sourcing of energy used in the common spaces of its properties from renewable energy sources and a 100-percent offset of Scope2 GHG emissions through the following initiatives.

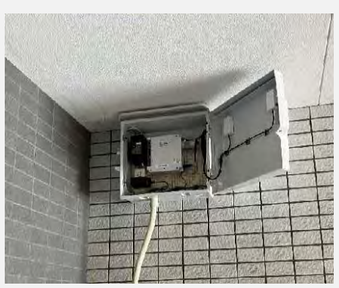

●Electricity: We procured FIT non-fossil certificates*1 with tracking through the Renewable Energy Value Trading Market, thereby effectively transitioning the electricity used in the common areas of our properties to renewable energy. Additionally, in the common areas of some properties, we are utilizing electricity with environmental value to achieve an effective transition to renewable energy.

●Heat: We procured J-Credits derived from renewable heat, effectively converting the thermal energy used in the property's common areas to renewable energy. Furthermore, starting in May 2025, we entered into an environmental value-added heat supply contract with a heat supplier for the entire building, effectively converting the building's total heat consumption to renewable energy. *2

*1 This refers to certificates that represent only the "non-fossil value" of electricity generated by "non-fossil power sources" (methods of electricity generation) that do not use fossil fuels such as oil or coal, issued under the Feed-in Tariff (FIT) system for renewable energy.
*2 Among the properties owned, only Pacific Royal Court Minato Mirai Ocean Tower utilizes thermal energy (as of fiscal year 2025).

Installation of electric energy measurement system

ADR has installed electric energy measurement systems in 269 properties (93.2% of the portfolio by total floor space) as of the end of July 2026, in order to improve the actual coverage rate of electricity consumption in our properties. By installing this system, it will be possible to measure the electricity consumption of the exclusive part. ADR encourages tenants to conserve usage through various enlightenment measures.

GHG Scope3 calculations are made to determine CO2 emissions throughout the supply chain and to promote efforts toward net zero emissions. (from FY2022)

GHG Emissions (Scope3)

Unit：t-CO2

	Category	FY2022	FY2023	FY2024	FY2025
1	Purchased goods and services	5,325	5,444	5,532	6,112
2	Capital goods	16,945	20,503	24,796	27,242
3	Fuel- and energy-related activities not included in Scope1 or Scope2	44	43	48	23
5	Waste generated in operations	2	2	1	2
13	Downstream leased assets（Target: Exclusive areas of owned properties）	24,992	26,116	36,369	35,582
	Total	47,307	52,108	66,746	68,961

* Calculated using the guidelines for the calculation of GHG emissions of an organization throughout the supply chain provided by the Ministry of the Environment of Japan.
* The categories not mentioned above either do not have any emission source or are calculated in Scope1 or 2.
* Based on data from FY2023, we have revised the calculation categories and coefficients and introduced a calculation method using estimated values. The data for FY2022 has been retroactively recalculated in accordance with the revised calculation method.
* In calculating Category 13 "Leased assets (subject: Exclusive use areas of owned properties)," for properties for which actual energy consumption in the exclusive use areas of owned properties cannot be determined.

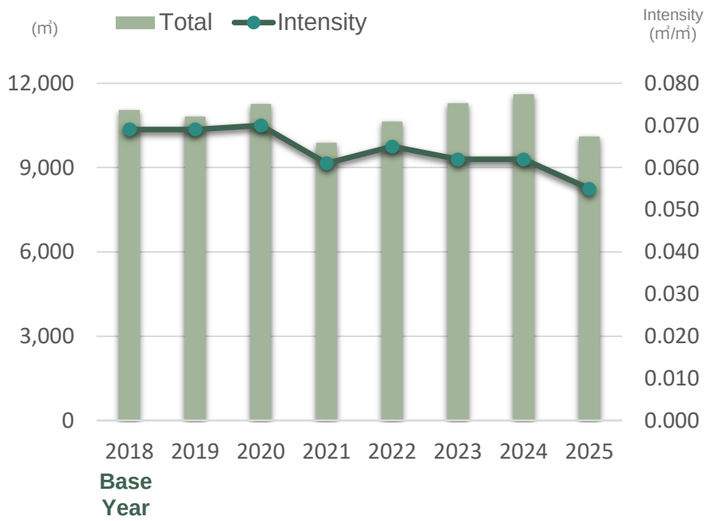

Environmental Performance Data

ADR

The graph below shows the evolution of environmental performance data in ADR up to FY2025. Detailed data can be found in the Data section of this report.

Waste

Target Recycling rate 65%
(emissions related to construction of exclusive use areas)

Recycling rate

98.8%

FY2025 actual results

Installation of water-saving equipment

ADR is working to reduce water consumption by installing water saving sanitary fixtures during renovation work in private areas.

Installation of automatic irrigation system

ADR is promoting water conservation efforts by installing automatic irrigation systems for plantings at some of its properties ADR is reducing wasteful water use by preventing excessive watering.

Install an irrigation device with an automatic watering timer on the faucet

Appropriate waste segregation and management in construction of exclusive areas

ADR strives to improve the recycling rate by implementing appropriate segregation and management of waste generated from restoration work.

Waste Reduction Initiatives

ADR also strives to reduce the amount of waste by carefully selecting the scope of work during restoration work and repairing rather than easily replacing items.

Certification and assessment in portfolios

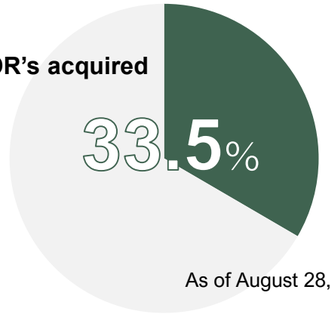

ADR

ADR is proactively seeking environmental certification, such as the Green Building Certification and energy efficiency ratings.

Target

Proportion of environmental and energy-saving certifications acquired by FY2030
30% or more (by total floor space)

DBJ Green Building certification*1

DBJ Green Building

1property

CASBEE Real Estate Assessment Certification *2

CASBEE®

29properties

BELS certification* 3

BELS

5properties

*1 DBJ Green Building Certification is a certificate developed by Development Bank of Japan Inc. (DBJ) to identify and certify realestate properties that satisfy various social needs includingenvironmental quality. Please refer to the following sites for details.
*2 CASBEE (Comprehensive Assessment System for Built Environment Efficiency) Real EstateAssessment and Certification is a method for assessing and rating the environmental performanceof buildings and sites. It is an evaluation system that aims to indicate the environmental performance of real estate in an easy-to-understand manner by focusing on evaluation items that are strongly related to the real estate evaluation. In order of rank from the highest to the lowest, the rating is assigned as 'S rank', 'A rank', 'B+ rank' or 'B rank'. This is a third-party certificationsystem operated by the Centre for the Promotion of Housing and Building SDGs, in which CASBEEassessment results are certified by a CASBEE assessment certification body.
*3 BELS (BELS Building Energy Efficiency Labeling System), which stands for Building-Housing Energy-efficiency Labeling System, isa system for evaluating and certifying the energy-saving performance (fuel consumption) of buildings.

ZEH-M

ZEH (Net Zero Energy House) refers to a home that aims to achieve a virtually net-zero annual primary energy balance by significantly enhancing the thermal insulation performance of the building envelope, realizing substantial energy savings while maintaining indoor environmental quality through the introduction of high-efficiency equipment systems, and installing renewable energy and other measures. ZEH-M ("ZEH Mansion") applies this concept to multi-family residential buildings.
Under the BELS rating system, ZEH-M is indicated in four levels: "ZEH-M" (highest rating), Nearly ZEH-M, ZEH-M Ready, and ZEH-M Oriented. RESIDIA Takadanobaba, which we own, has obtained "ZEH-M Oriented"*4.

*4 "ZEH-M Oriented" refers to a multi-family residential building that seeks to achieve substantial energy savings while maintaining indoor environmental quality by enhancing insulation performance and introducing high-efficiency equipment, and to reduce the building's annual primary energy consumption (excluding renewable energy and other measures) by at least 20% for the entire building, including common areas.

Environmentally Conscious Asset Management

ADR IRM

ADR and IRM manage assets while reducing the burden on the environment through measures such as energy and water conservation and investment in a wide variety of properties , etc.

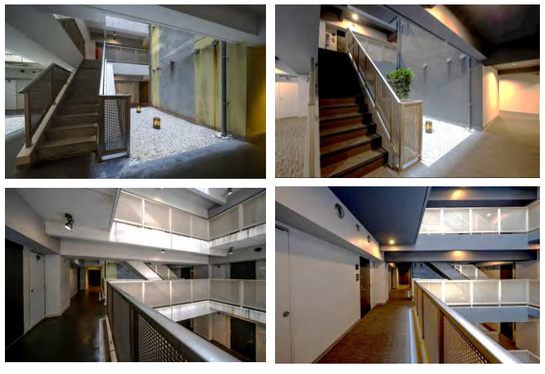

Optimal CAPEX Control for Large-Scale Repairs(Contribution to the environment by lengthening useful life)

IRM has an engineering function and efficiently controls CAPEX and repair work for all ADR-owned properties to maintain asset value and extend the useful life of buildings. By extending the useful life of buildings, IRM aims not only to increase unitholder value but also to reduce embodied and operational carbon emissions as a contribution to the environment. IRM also conducts technical building inspections, formulates and reviews long-term repair plans, and performs cost control.

Example: Large-scale repairs (exterior wall work) at RESIDIA Bunkyo-Yushima

Example: Large-scale repairs (common areas) at RESIDIA Nishijin

Before After

Promotion of LEDs

ADR is promoting the installation of LEDs in common areas of its properties in order to achieve its target of a 20% reduction in energy consumption (intensity) by FY2030 compared to FY2018.

Introducing Internal Carbon Pricing

ADR estimates the energy savings from environment-related construction (e.g., installation of LEDs) as a result of such construction. These are then converted into t-CO2 and multiplied by the assumed price of a carbon tax to quantitatively determine the cost reduction effect that would be achieved if a carbon tax were to be introduced in the future.

Application of heat-shielding paint to rooftop floor surfaces

ADR has applied heat-reflective paint to the rooftops of some of its properties, helping to suppress indoor temperature rises and thereby contributing to power savings and energy efficiency.

RESIDIA Shibaura

Encouraging Tenants to Conserve Energy Usage

ADR encourages tenants to save energy by displaying posters, distributing the information magazine “RESIDIA News” and Sustainability Guide, and using signage in common areas.

Introduction of Renewable Diesel, a Next-Generation Biofuel

To contribute to the realization of a decarbonized society, ADR has introduced Neste's next-generation biofuel “Renewable Diesel (RD)” for the emergency generator at its property. This RD is procured by ITOCHU Corporation, the sponsor group of ADR, and supplied by ITOCHU ENEX CO., LTD. This introduction is the first in Japan * and the first by a J-REIT to be used in emergency generators at condominiums.

Outline of RD Neste
Neste MY Renewable Diesel and Neste's Renewable Diesel are next-generation biofuels produced from renewable raw materials such as waste cooking oil and waste animal fat that do not compete with food production, through a hydrogenation refining process by Neste, a world-leading RD and sustainable aviation fuel (SAF) manufacturer (headquarters: Finland). It is possible to reduce GHG (greenhouse gas) emissions by up to 90% compared to petroleum-derived diesel oil based on life cycle assessment, and because it is not subject to energy consumption calculations under Japan's Act on the Rational Use of Energy and the Act on Promotion of Global Warming Countermeasure, it is possible to achieve a 100% reduction in GHG emissions compared to petroleum derived diesel oil. It also has excellent storage stability and is suitable for long-term storage and can be used as is in vehicles and heavy machinery that use diesel oil.

* As of November 2024. This is the first time in Japan that ITOCHU ENEX CO., LTD, the only distributor of Neste's RD in Japan, has supplied RD for emergency generators in all condominiums, including those for sale

Neste's RD

Emergency generator

For more information about RD, please refer to the following website (In Japanese). https://service.itcenex.com/lp/renewable_diesel/

Our Dedicated Engineering Team

IRM strongly recognizes the importance of maintaining and enhancing property value through large-scale renovation and value-enhancement projects as its managed assets age. In 2013, it became the first J-REIT asset management company to obtain registration as a Class 1 Architectural Firm. Since 2016, it has progressively expanded into management services for large-scale renovations and other projects, as well as planning and design services, thereby strengthening its engineering operations.
Within our Engineering Business Division, a specialized team led by certified architects leverages its accumulated know-how and expertise to manage a wide range of projects, from large-scale building renovations to tenant improvements. By providing attractive and enhanced living spaces, we aim to strengthen the competitiveness of our properties against others in the market. This ultimately leads to increased rents and yields, maximizing value for our investors.

Strengthening the market competitiveness of rental properties through renovation work → **Achieving rents that exceed those of nearby competitors** → **Maximizing unitholder value**

Introducing car sharing in parking lots of properties

As of the end of July 2026, 9 properties (3.1% of portfolio) have parking lots for car sharing.

Other Efforts

ADR is installing interlocking blocks as a measure to mitigate urban flooding and land subsidence.

RESIDIA TOWER
Kami-Ikebukuro

Environmentally Conscious Asset Management

ADR

Investments Towards Urban Revitalization

ADR invests in various types of properties, promoting the reduction of environmental burdens and contributing to the revitalization of towns and communities.

Investment in Mixed-Use/Multi-Use Properties

ADR invests in flexible/mixed use properties (as of the end of July 2026, 92 properties, 32% of the portfolio), thereby contributing in reducing environmental impact, revitalizing the area and providing convenient facilities to tenants and local residents. In addition, those flexible /mixed use properties have stores and squares open to public which contributes to the revitalization of the cities and the communities, by providing places for people gather.

- Properties close to train stations which promote the use of public transportations thereby reducing CO2 emissions : 93% (on acquisition price) of properties are located within 10 minutes walk from the nearest train station as of the end of July 2026.
- Investments in properties with amenities for daily life such as supermarkets and convenience stores.
- Properties with open space which are publicly accessible. (As of the end of July 2026, 7 properties (2.4% of portfolio))
- Universal design properties that are accessible to senior citizens.

Investments in properties developed as part of urban regeneration projects*, etc.

We invest in properties located in the district developed by Urban Revitalization Projects in support of the creation of a community for new production activities and lifestyles based on the initiative of local residents. Through investments in properties developed as part of urban regeneration projects, etc. we contribute to the revitalization of towns and communities and the enhancement of convenience to nearby residents.

(Example) Pianetta Shiodome
The aim of the district is not only creating an attractive landscape while achieving harmony and balance between Italian culture and traditional Japanese culture, but also creating a safe and secure community and enhancing and strengthening partnerships with the government for sustainable regional development. Furthermore, the district is characterized by its adoption of Italian urban revitalization concepts, not only in the superficial adoption of Italian cityscapes, but also in the urban renewal process itself.

Other urban redevelopment properties acquired by ADR.

RESIDIA Minami Senjyu

RESIDIA TOWER Kami-Ikebukuro

Pacific Royal Court Minato Mirai Ocean Tower

RESIDIA Tsutsujigaoka

Environmental risk assessment at acquisition

When acquiring properties, ADR obtains real estate appraisal reports, engineering reports, etc., in addition to on-site inspections and disclosed materials from the seller, and conducts surveys related to soil contamination and hazardous substances such as asbestos and PCBs.

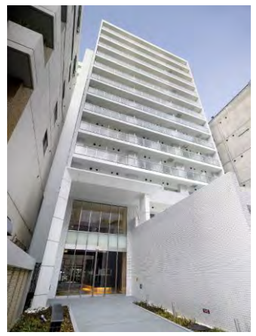

Brownfield* redevelopment

When soil contamination is confirmed, ADR maintains proper treatment and procedures in accordance with laws and regulations. ADR takes measures to prevent the spread of soil contamination and performs countermeasure construction (mining and removal of contaminated soil) as necessary.
*Land with confirmed soil contamination

Consideration for Biodiversity

ADR recognizes the importance of the various benefits provided by ecosystems, and is committed to taking biodiversity into consideration. In the RESIDIA Tower Kamiikebukuro, plants including a variety of native species that add color to the four seasons have been arranged to provide valuable green space for residents and the community, and part of the land is open to the public as public open space. In addition, ADR is promoting rooftop greening at some of the properties.

RESIDIA TOWER Kami-Ikebukuro

RESIDIA TOWER Nogizaka

Cooperation with stakeholders and the ITOCHU group

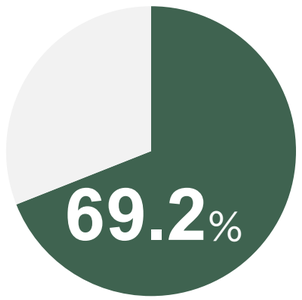

ADR IRM

Cooperation with Stakeholders

Green Lease Clause

ADR has lease clauses with tenants regarding the appropriate use of energy and water; as of the end of July 2026, ADR had such clauses in lease agreements for approximately 69.2% of its leased units. ADR also has green lease clauses in its management agreements with property management companies.

Percentage of green leases with tenants

As of the end of July 2026

Supply Chain Management

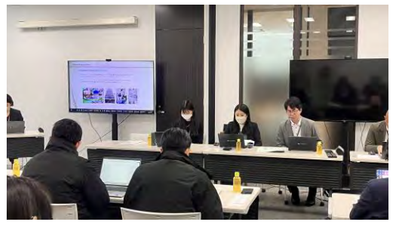

To realize the items listed in the Sustainability Policy, IRM collaborates with its suppliers and has in place a Sustainability Procurement Policy. Based on this policy, IRM has administered a questionnaire with questions related to sustainability initiatives to all property management companies and evaluates the results. This questionnaire is administered at the beginning of the partnership as well as once every year thereafter and, by doing so, strengthens the transactions with the suppliers. IRM also believes it is important that all suppliers understand and cooperate with the procurement policy and we again notified the Sustainability Procurement Guideline to the property management and building management companies who are our key business partners.

Property Management Company Selection Criteria and Evaluation Efforts

IRM has established criteria for the selection of property management companies to which it outsources the management of properties, and in principle evaluates all PM companies once a year. In addition to items related to building management capabilities, repair work capabilities, etc., the evaluation also takes into consideration environmental considerations in operations, occupational health and safety of employees, and understanding and cooperation with the sustainability policy set by the asset management company.

Sustainability Training for Restoration Contractors

In addition to its key suppliers (property management and building management companies), IRM recognizes contractors that carry out restoration work in vacated units as important engagement targets, and conducted sustainability training for these contractors to share how IRM and ADR are approaching sustainability initiatives. The training shared information on IRM's and ADR's sustainability initiatives, as well as the content of the Sustainability Procurement Guidelines, with the contractors to promote a shared understanding of efforts to reduce environmental impact.

Initiatives to Raise Sustainability Awareness Among IRM Staff and Executives

To enhance sustainability awareness, IRM conducts regular sustainability training (led by external experts and in-house) and events for its officers and employees. In fiscal year 2025, IRM continued its initiative from the previous year by inviting external instructors to conduct training for executives, deepening their knowledge of ESG. Additionally, IRM has previously held awareness events such as home energy-saving challenges and dinner discussions (company-sponsored) centered on SDGs.

Collaboration with the ITOCHU Group

At ADR, we are collaborating with the ITOCHU Group on the following environmental initiatives.

Property Development and Purchase
Proactive promotion of transactions including mixed/multi-purpose for Residential Property, etc. that can contribute to the environment and region. Acquisition of green building certifications.

Property Management
Contribution to the region through environmental consciousness such as energy-saving awareness campaigns and installation of AEDs.

Examples of Collaboration with the ITOCHU Group

Initiatives at Tokyo Student-House Musashi-Kosugi

In April 2024, ADR acquired Tokyo Student-House Musashi Kosugi, a property developed by one of the sponsor group companies, ITOCHU Property Development Corporation (now JREAST & ITOCHU REAL ESTATE DEVELOPMENT Co., Ltd.), which has acquired DBJ Green Building certification. Since its acquisition, ADR has continued to obtain the same environmental certification and has received the highest "5-star" rating.

Tokyo Student-House Musashi-Kosugi

Awareness of water and energy saving

In the common areas of Tokyo Student House Musashi Kosugi, we have posted signs to promote water and energy conservation.

Energy Saving Awareness

BCP Countermeasures

In addition to storing disaster supplies, manhole toilets and kamado benches have been installed on the premises, and disaster drills are regularly held with the participation of residents and local residents.

Initiatives for Tenants

ADR

ADR recognizes that enhancing the satisfaction of tenants leads to stable and improved earnings from the properties and therefore are implementing the following initiatives.

Tenant Satisfaction Surveys

ADR triennially conducts satisfaction surveys for tenants residing at RESIDIA branded properties.
In a survey conducted in fiscal year 2026, we received high ratings for cleanliness, aesthetics, and location.

	Date of the survey	No. of Respondents	Total No. of People Surveyed	Response Rate	Total No. of Leasable Units	Survey Coverage
1	Between Apr. to Jul. 2014	3,106	14,155	21.9	19,078	74.2
2	Between Sept. to Nov. 2017	3,945	16,445	24.0	20,842	79.0
3	Between Apr. to Jun. 2020	7,705	18,000	42.8	21,322	74.2
4	Between May. to Jun. 2023	5,533	18,821	29.4	21,836	86.2
5	Between May. to Jun. 2026	4,768	19,274	24.7	22,524	85.6

Implementation of measures based on the results of the satisfaction survey

In response to requests from tenants based on the results of tenant satisfaction surveys, ADR is working to improve tenant satisfaction by expanding the number of properties with shared mobility LUUP and increasing the number of parcel delivery boxes.

Installation of Share Mobility LUUP

Installation of additional parcel boxes

Tenant Services

ADR offers a variety of services toward tenants residing in ADR's properties to enhance tenant's satisfaction to improve tenant retention rate. Examples of the services include "RESIDIA Customer Support" which is a support desk exclusively for tenants and "Moving Style," offers discounts for tenants who are moving from one RESIDIA apartment to another.
* Please visit the RESIDIA website(Japanese only) for details.

Renovation to shared space

In order to accommodate diverse lifestyles, the common areas of the following two properties were renovated and offered to tenants as shared space.

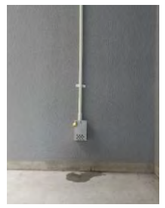

RESIDIA Kamata refurbished an unused meeting room into a share space

RESIDIA Nakano Fujimidai common room was renovated into a working space

Systematic implementation of building and equipment improvements

Based on the flood countermeasures plan formulated after analyzing the flood risk using hazard maps, ADR is installing flood barriers and flood sensors to encourage vertical evacuation in the event of a flood. ADR is also systematically updating and upgrading its emergency generators.

Installation of water stop

Installation of Flood sensor

Preparing in case of a disaster

In order to improve resilience, ADR has introduced a property condition management system and is working to minimize damage by strengthening cooperation with PMs in the event of a disaster. In addition, ADR also carries out disaster prevention stockpiling and disaster prevention training.

Emergency Maps and Emergency Kits

On common area walls of properties, ADR puts up emergency maps (as of the end of July 2026, 98% of the properties(282 out of 289)). indicating evacuation routes to evacuation sites which help to ensure safety during the occurrence of a disaster as well as to raise disaster prevention awareness. Also, in many of its "RESIDIA" branded residence, ADR distribute emergency kits free of charge to any tenant who wishes for such kits.

Emergency Maps

Emergency Kits

Installation of AED and donation vending machines

In many ADR's properties, AEDs are available for public use and vending machines that make charitable donation to a pediatric cancer treatment facility using part of the proceeds from the sales of its merchandise are installed (As of the end of July 2026, AED: 68units, donated vending machines: 19 units).

Installing AEDs

Donation capable vending machines

Flood risk

Inundation risk under the planned-scale scenario*1

By Flood Depth	Number of Properties	Acquisition Cost	Number of Rentable Units
～5m	6 properties	4.8 billion yen	291 units
～3m	46 properties	91.3 billion yen	4,437 units
～0.5m	14 properties	26.6 billion yen	1,264 units
Total	**66** properties	**1,229** billion yen	**5,992** units

Addressing economic losses → **May be covered by fire insurance**

Addressing electrical equipment specified in the Guidelines*2

Scope: **7** properties with cubicles on the 1st floor or below

→ Water stops and other flood countermeasures installed as needed

Ensuring tenant safety

Scope: Inundation of 2 m or more: **6** properties with residential units on the 1st floor

→ **Flood sensors** and other equipment installed to guide evacuation to upper floors

*1 Refers to the inundation depth, defined under the Flood Control Act and other laws, that serves as the basis for river improvement. (Applies to river flooding)
*2 Refers to the Guidelines on Flooding Countermeasures for Electrical Equipment in Buildings published by the Ministry of Land, Infrastructure, Transport and Tourism in June 2020.

Initiatives for Community Contribution

IRM

IRM actively implements social contribution activities, including employee-participatory activities, in addition to company initiatives.

Achievements in Providing Assistance to Students

IRM provides support to students by offering opportunities for many architecture and design students to engage in practical activities, with the aim of sparking their interest in IRM and the REIT industry. In the past, IRM held a competition for students to submit renovation ideas for “RESIDIA,” the rental housing properties it manages, and actually carried out a renovation based on the design of the winning entry. Furthermore, with the goals of contributing to the local community, creating new value for properties, and raising awareness and understanding of the REIT industry, IRM carried out an industry-academia collaboration project with the Department of Architecture and Design at Kyoritsu Women’s University—located near the IRM office—to develop renovation proposals for properties managed by IRM. The students compiled their design proposals after conducting on-site inspections of the properties, surveying the surrounding environment, and making interim presentations. They then delivered a final presentation to IRM executives, including the president, using perspective drawings and scale models.

FY2024: Collaboration with Kyoritsu Women’s University

Students from the university developed renovation designs for common areas, private units, and public open spaces in properties owned by ADR.

A scene from the Presentation

Example of presentation materials

Model of a proposed renovation for a public open space

FY2025: Collaboration with Kyoritsu Women’s University

Following the project carried out in fiscal year 2024, we implemented this second iteration of the project and developed renovation designs for rental apartments and office buildings managed by IRM.

Model of a proposed renovation

Volunteering at the “ITOCHU Baseball Class”

We continue to participate as volunteers in the “ITOCHU Baseball Class,” organized by our parent company, ITOCHU Corporation. This initiative has been ongoing since 2007 with the goals of putting “barrier-free hearts” into practice and fostering the next generation.

Held every February at Meiji Jingu Baseball Stadium, the event brings together children with disabilities and our employees to enjoy baseball together, with coaches from the Tokyo Yakult Swallows Baseball Academy serving as instructors. Volunteer employees from approximately 20 companies within the ITOCHU Group participate, bringing together a total of about 250 people, including the children and their families.
As a member of the ITOCHU Group, our company contributes to promoting social inclusion and supporting the children who will lead the next generation by actively participating in such community and social engagement activities.
For more details, please visit this page.

Participation in Famima Food Drive

In cooperation with FamilyMart Co Ltd, an ITOCHU Group company, employees participate in the Famima Food Drive as part of their social contribution activities and donate food products. Various food items, including instant foods and confectionery, are collected from employees each time.

*About ‘Famima Food Drive’... This is an initiative in which households bring in uneaten food to Family Mart shops and provide it to those in need through cooperating partners such as local authorities and NPOs. Through the Famima Food Drive initiative, uneaten food from the home is utilised, leading to a reduction in food loss. In addition, by using Family Mart shops nationwide as collection points, local residents can easily participate in social contribution activities.

＜Donation of food at FamilyMart Co., Ltd.＞

Participation in Eco-Cap Campaign

In an endorsement of the Eco-Cap Campaign, IRM collects caps from used PET bottles for recycling purposes. The collected bottle caps are sold to recyclers via the certified NPO, the Japan Committee for Vaccines for the World’s Children, and the proceeds are used to help children around the world suffering from diseases. The campaign also promotes the employment of people with disabilities who are tasked with separating the collected caps.

Periodic Cleaning of the Area Surrounding the Office

As members of the local community, IRM’s employees and executives continue to participate in the community-wide cleanup efforts in Chiyoda Ward, where the company’s office is located.

Disaster Support

In the event of a major natural disaster, we provide disaster relief by donating funds to help affected areas recover as quickly as possible. In addition, we are calling for employee volunteer activities and employee fund-raising.

Support Social Participation of People With Physical Disabilities

In 1987, ITOCHU Corporation, the parent company of IRM, founded a special subsidiary company ITOCHU Uneedus Co., Ltd. to provide motivational and rewarding work to people with physical and mental disabilities. IRM supports ITOCHU Uneedus by placing orders for its company’s business cards and envelopes.

Supporting ITOCHU Foundation

ITOCHU Foundation, founded in 1974 by ITOCHU Corporation, the parent company of IRM, has continued to promote social contribution activities aiming for the sound development of young people. Current projects include the Children's Literature Collection Grant and the Project for Promotion of E-book Libraries, which contribute to the healthy growth of children. IRM supports the Foundation through donations.

Human Rights Policy and the Promotion of Diversity

IRM

Human Rights Policy

IRM has established a Human Rights Policy to fulfill its responsibility of respecting the human rights of all people involved in its business operations. As part of implementing this policy, IRM is advancing initiatives such as positive action initiatives to support the active participation of women as a means of increasing diversity.

01. Support for international norms and guidelines

We support international norms on human rights, including the Universal Declaration of Human Rights, the Declaration on Basic Principles and Rights in Labor of the International Labor Organization (ILO), and the United Nations Global Compact. In addition, we respect human rights in accordance with the United Nations' Guiding Principles on Business and Human Rights.

02. Non-complicity in human rights violations

We endeavor not to violate human rights ourselves or be complicit in human rights violations by others.

03. Respect for freedom of association and collective bargaining rights

We respect the freedom of association and the right to collective bargaining in accordance with relevant laws and regulations, and we do not engage in illegal or improper discrimination in employment and occupation.

04. Elimination of forced labor

We strive to eliminate and prevent all forms of forced labor at IRM and in our supply chain.

05. Effective abolition of child labor

We support and practice the effective abolition of child labor from IRM and our supply chain. We do not hire children who are not above the legal minimum working age.

06. Elimination of discrimination in employment and occupation

We do not treat people differently or disadvantage them based on characteristics that are irrelevant to their capabilities or specific job requirements. Those characteristics include ethnicity, skin tone, gender, religion, political views, nationality (country of birth), social origin, age, disability, HIV infection/AIDS, trade union membership, and sexual orientation.

Promotion of diversity

IRM has established a DEI Policy that explains its approach to and efforts for promoting Diversity, Equity, and Inclusion (DEI) to take concrete actions for our sustainability initiatives stipulated in the Sustainability Policy and our approaches stipulated in the Human Rights Policy. We consider it necessary to respect DEI and to nurture an inclusive organizational culture to build a sustainable society and to raise investor value over the long time. Based on this view and with an awareness of structural barriers impeding DEI in institutions and corporate cultures, we promote initiatives such as ensuring diversity among the officers of IRM and other investment corporations and promoting diversity initiatives in our recruitment, retention, development, promotion, and other processes.

DEI promotion structure

With our Representative Director as the person with ultimate responsibility and the General Manager of General Affairs and Management Division as the chief executive, the Sustainability Promotion Committee sets targets and organizes structures for promoting DEI through meetings held at least twice a year. As a general rule, the Committee reflects the challenges or findings about the previous targets it has set in the following period's targets to create an on-going follow-up structure.

Advancing diversity and inclusion

IRM is committed to creating a workplace where a diverse workforce can leverage each other's strengths and where everyone can fully utilize their abilities. As part of our efforts to promote diversity, we implement positive action measures to support women's advancement and are continuously working to improve recruitment, training, promotion, and the creation of a supportive work environment.

Key Objectives and KPIs

Coverage: Full-time employees and contract employees

Target	Progress (FY2025)
Proportion of female employees: 30% or more	29.1%
Proportion of female managers: 30% or more	20.7%

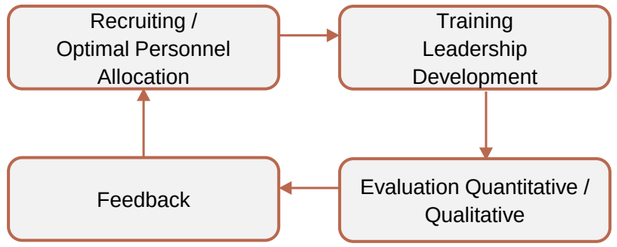

*As of the end of March 2026

Human Resource Strategy

IRM

Human Resource Strategy

Based on the awareness that the stable growth of each investment corporation and investment fund is dependent on our personnel, IRM is pursuing a human resource strategy with the aims of enabling people to unleash their full potential and of achieving overall human resource optimization. Specifically, IRM has established a personnel evaluation system that defines the perspectives as well as the competencies and skills required for each level of work. This system enables IRM to hire, train, assign, and promote highly competent personnel. To help employees realize their potential and develop their career, IRM has established a system through which they can indicate their career path intentions, leading to the optimal assignment of employees.

* Investment corporations are required to entrust their asset management operations to an asset management company that is a financial instruments business operator (investment management business).

Dual-Track Personnel System

IRM has implemented a dual-track human resources system. We have established a management track, which oversees the organization, and a specialist track, in which employees contribute to the company through their high level of expertise. By creating a system that allows employees to thrive in their respective roles, we ensure that performance is appropriately evaluated and that the contributions of high-performing employees are reflected in their compensation.

Employee Development

Career Development and Support

As part of its employee development efforts, IRM offers a variety of training programs and opportunities for skills and career development. In addition to implementing job rotation, the company has a career declaration system in which employees submit their future career aspirations once a year and discuss them with their supervisors. Furthermore, each new hire is assigned a mentor in addition to their direct supervisor, who is available to provide guidance on a wide range of topics, including work-related matters.

Performance appraisals and feedback process

IRM’s personnel evaluation system consists of “performance evaluation,” which evaluates the degree of achievement of the employee's business goals, and “behavioral evaluation,” which evaluates the performance required for each grade and position. IRM holds target management interviews three times a year at the beginning of the fiscal year (target setting), during the fiscal year (review), and at the end of the fiscal year (evaluation feedback) to establish a transparent target setting system with good communication between supervisors and subordinates, and an evaluation system to support employees in achieving their goals, expanding results, and growing. Fixed salaries and bonuses are determined based on evaluations, and bonuses are partially linked to the investment performance of each investment corporation and fund under management. In addition, through individual interviews, feedback on evaluations and dialogue on individual career development are provided to help formulate human resource strategies.

Support and financial aid for acquiring certifications

IRM has a system in place to subsidize the cost of acquiring qualifications in order to improve work performance and acquire specialized knowledge. (Examples of certifications eligible for financial aid: real estate transaction agent, ARES certified master, securities analyst, certified building administrator, First-Class Architect)

* The dual-track personnel system, career development, and performance evaluations and feedback apply only to regular employees, while the support and subsidy programs for obtaining professional certifications are available to both regular and contract employees.

Professional development and training programs

IRM has set up a wide range of training programs and self development support systems matched to job levels and other factors.

Examples of Training	Details
Manager training	Line Care Training（To promote primary prevention of mental health issues, acquire skills to understand the mechanisms behind mental health problems and prevent them, and understand key points for creating a healthy workplace.）
	Multifaceted Evaluation Training（The purpose of this tiered training program is to maximize the performance of each organization by identifying strengths and challenges through multifaceted evaluations, reviewing one's own actions, and formulating development plans.）
Training for new managers	Participants acquire knowledge and skills essential for leaders, such as management, trust building, team building, human resource development, and labor management. Utilizing an external organization, participants practice at their workplaces, reflect on their experiences, and receive advice from external lecturers to enhance their practical skills.
Next generation business leader training	Leadership training for mid-level employees to develop business acumen. Recognize the roles required of you as a core member of the organization, based on your strengths and weaknesses.
Fourth-year training	Training for fourth-year employees A training program designed to help young employees transition to mid-career positions by learning how to set goals, identify core issues, and design their own ideal career paths.
Second-year training	Training for Second-year employees Training that encourages participants to think independently about how they can contribute to their colleagues and workplace with a broad perspective. Participants learn to collaborate smoothly with people in different positions and improve the overall quality of their work.
Life Planning training	Training for Second-year employees Training that encourages participants to think independently about how they can contribute to their colleagues and workplace with a broad perspective. Participants learn to collaborate smoothly with people in different positions and improve the overall quality of their work.

For details on other training topics, please refer to the “Data” section of this report.

Training costs for employee

Promoting Health-Focused Management

IRM

Promoting Health-Focused Management

We established the Health Policy and declared our commitment to promoting health and productivity management initiatives to maintain and enhance the physical and mental health of our employees and their families.

Declaration of Health and Productivity Management

We believe that the physical and mental health of our employees and their families is the most important factor in realizing our corporate philosophy and management policies. We will continue to actively promote health management, emphasizing the creation of a comfortable work environment and the maintenance and promotion of employee health.

June 2026
ITOCHU REIT Management Co., Ltd.
Atsushi Sekiguchi

The following priority measures have been established to promote Health and Productivity Management that emphasizes the creation of a comfortable work environment and the promotion of employee health.

Priority Measures

01. Recognize health issues at the beginning of each fiscal year, set specific goals (plans and numerical targets) based on health issues, verify the results at the end of the fiscal year, and implement the "PDCA (Plan-Do-Check-Act) cycle of health management" to achieve further improvements in the new fiscal year.
02. Enhancement of work-life balance(harmony between work and life)
03. Ensure 100% of employees receive regular health checkups, encourage family members (dependents) to receive checkups, and prevent serious illnesses (improve the rate of retests and full examinations)
04. Mental health measures (implementation of stress checks, group analysis, and mental health training)
05. Measures to prevent overwork
06. Measures to prevent infectious diseases
07. Measures to prevent passive smoking
08. Promotion of communication to vitalize the workplace
09. Support for balancing work and medical treatment
10. Improvement of health literacy (setting up educational opportunities for managers or employees)
11. Efforts to maintain and promote women's health (addressing health issues specific to women)
12. Efforts to improve dietary habits and promote exercise opportunities
13. Initiatives to provide opportunities for specific health guidance

IRM has received recognition from external organizations for its initiatives in health management and has obtained relevant certifications. In March 2026, the company was certified as a “Health Management Excellence Corporation 2026 (Small and Medium-Sized Enterprises Category)” for the sixth consecutive year, and in September 2026, it received the “Gold Certification” as a Health Excellence Corporation for the fourth consecutive year.

Key Initiatives Related to Health Management

Promotion of health management and strengthening of prevention

IRM recognizes that regular health checkups are the first step in health promotion, and in addition to aiming to achieve 100% attendance at regular health checkups, IRM recommends that all persons with findings receive a medical examination and checkup at a hospital. 100% attendance rate for regular health checkups was achieved in FY2025. IRM also provides health literacy education opportunities by holding company-wide health seminars and self-care training programs for employees to promote their mental and physical health. Furthermore, to ensure that employees can receive vaccinations with peace of mind, IRM treats vaccination time as work time and provides a prescribed number of days off (with pay) for adverse reactions after vaccinations. In addition, employees are granted leave (with pay) to accompany their family members for vaccinations.

Mental Health Care Efforts

To prevent and detect mental health problems at an early stage, IRM has established a mental health development plan, conducts “stress checks” once a year, and utilizes the results of organizational diagnosis in its workplace development efforts.

Addressing Women's Specific Health Issues

IRM identifies efforts to maintain and promote women’s health (addressing health issues specific to women) as one of its priority measures to promote health management. As part of this policy, IRM has expressed its support for the Laurier in Workplace project operated by Laurier, a sanitary product brand of Kao Corporation. Launched by Kao Corporation, the project aims to make sanitary napkins available in corporate offices and other places to create a better work environment for women.
Please click here (in Japanese) for more information.

Laurier in Workplace 職場のロリエ Laurier ロリエ

Establishment of Health Committee

IRM has established a “Health Committee,” which meets once a month with an industrial physician to exchange opinions on the workplace environment and gain knowledge about health in order to prevent health problems and maintain and promote the health of executives and employees.

Periodic monitoring of employee satisfaction

To build a company where employees find their work rewarding, we conduct surveys of employees and others to gather their feedback, and we are implementing initiatives to improve the workplace environment and other areas. We have been recognized as a “Great Place to Work” by Great Place to Work for fiscal year 2026, following our recognition in fiscal years 2024 and 2025.

Great Place To Work. Certified SEP 2026-SEP 2027 JAPAN

Employee Engagement Survey Results

Coverage :
Officers (including executive officers) and regular employees

FY2025 Response rate：90.6% Satisfaction score：64 points

Key Objectives and KPIs

Coverage: Full-time employees and contract employees

Target	Progress (FY2025)
Proportion of male employees taking childcare leave : 100%	100.0%
Leave acquisition ratio : 70% or more	74.8%
Average monthly overtime : Less than 20 hours	20 hours 23 minutes

For data from previous fiscal years, please refer to the “Data” section of this report.

*As of the end of March 2026

Improving the workplace environment

IRM

At IRM, we are implementing the following initiatives to enhance our employee benefits programs and promote work-life balance.

Human Resources System

Childcare leave, shortened work hours for childcare, nursing leave

To assist employees in balancing work and childcare, we offer childcare leave that can be taken until the child reaches the age of two, and shortened work hours for childcare that can be taken until the child enters elementary school. In addition, we treat nursing leave taken to care of children up to the third grade of elementary school, as well as special paid leave for nursing care of children enrolled in elementary school.

Caregiver leave, shortened work hours for caregivers, caregiver absence

To assist employees in balancing work and caregiving, IRM offers caregiving leave, shortened work hours for caregivers, and caregiver absence.

Special leave system

IRM has a system that allows employees to take up to five days of leave per year, in addition to paid leave. This leave system can be used for participation in community contribution activities and social welfare activities, childcare support such as the birth of a spouse or other family member or participation in a child's school events, and healthcare purposes such as periodic health checkups and explanations of the results and secondary examinations.

Accumulated Paid Leave System

This program allows employees to bank up to 10 days of unused annual paid leave per year, up to a maximum of 60 days, which can be used when specific circumstances designated by the company arise (such as treatment or recovery from personal illness or injury, caring for a family member, or fertility treatment). It is designed to support employees so they can balance work with medical treatment, recovery, or caregiving with peace of mind.

Telecommuting and flextime systems

IRM has introduced telecommuting and flextime systems to realize diverse work styles and promote efficient operations.

Hourly paid leave

Each year, employees may take paid leave by the hour for up to five days' worth of hours (40 hours).

Long Service Award System

As a token of appreciation for long-term service, we have a long-service award program that provides bonus payments and refreshment leave for employees who have been with the company for 5, 10, 20, and 30 years.

Continued employment

IRM has set the retirement age at 60, but eligible employees may choose to be reemployed as a commissioned employee under a renewable annual contract.

Congratulatory and condolence money

IRM provides congratulatory benefits for employees' marriages and childbirths, and we also have a system of providing condolence money in preparation of loss of family members.

Employee Benefits

Employee investment unit ownership program

IRM has established an investment unit ownership program for investing in units of the investment corporation whose assets IRM manages (ADR). The aim is to further align the interests of our employees with those of the investment corporations' unitholders and to expand employee benefits.

Corporate Defined Contribution (DC) Pension Plan

We have implemented an employer-sponsored defined contribution pension plan to support our employees and executives in building their assets and planning for their future.

Company trips

To promote friendly relations among our employees, as a general rule IRM organizes annual company trips. The trips provide the opportunity for employees to get to know each other better while spending time together in a setting outside of the office. They also have a major positive impact on work as well.

Cafeteria-style benefits package

The cafeteria-style benefits package offers employees preferential rates for the unlimited use of a broad range of services provided by various partners, such as hotels, fitness clubs, and childcare providers. The objective is to support employees in balancing work and family life, and in improving their health.

Company gatherings

The organization of social gatherings, walking events and various communication events deepens the friendship between employees. By promoting good health and fostering communication between employees in various departments, company-wide morale is enhanced.

Foods provided for the purpose of refreshing

IRM provides health-conscious foods and ice cream free of charge to promote the health and refreshment of its executives and employees.

OFFICE DE YASAI

With the goal of promoting the health and well-being of our employees and enhancing their satisfaction, we have created an environment where they can easily enjoy healthy meals.

Employee Recognition Program

We have implemented an "Employee Recognition Program" to share and highlight the achievements and contributions of our executives and employees within the company. Through this program, we aim to clarify the behaviors and values that IRM prioritizes, while fostering an organizational culture in which executives and employees recognize and commend one another's efforts. This helps boost employee motivation and encourages proactive behavior in line with our code of conduct.

Office environment development

IRM has developed its office environment so that each and every officer and employee can work comfortably,

Governance

Governance Framework 39
Compliance 42
Risk Management 43

How Investment Trusts Work

Governance Framework

ADR IRM

Governance of investment companies

Under ADR's regulations, the number of Executive Officers must not exceed two, and the number of Supervisory Directors must not exceed three. However, the number of Supervisory Directors must be at least one more than that of Executive Officers. Our current organization consists of the General Unitholders' Meeting, Board of Directors, and Accounting Auditors.
Our Board of Directors consists of one Executive Officer and three Supervisory Directors. Under our Board Regulations, regular board meetings are held once a month as a general rule.

Investment companies' Executive Officers and Supervisory Directors

ADR selects officer candidates based on expertise, aptitude and qualifications, while making sure that they do not meet any of the disqualification grounds stipulated in investment and other relevant laws. The candidates are appointed with approval from the General Unitholders' Meeting held at least once every two years as per our regulations.

Title	Name	Reason for Appointment	Board of Directors Attendance (31st and 32nd Terms) *
Executive Director	Wataru Higuchi	He has been appointed as ADR's Executive Officer due to his combined expertise in accounting and law, which qualifies him to execute duties from a comprehensive perspective.	100% (15/15)
Supervisory Director	Satoru Kobayashi	He has been appointed as a Supervisory Director based on his qualifications as a legal expert to supervise Executive Officers' activities.	100% (15/15)
Supervisory Director	Hikari Komine	She has been appointed as a Supervisory Director based on her qualifications as an accounting expert to supervise Executive Officers' activities.	100% (15/15)

* Aiko Kanayama, the former executive director who stepped down on July 31, 2026, had a 100% attendance rate(15 out of 15) at board meetings during the 31st and 32nd fiscal years.

Regarding Executive Director

While executive officers at J-REITs are often concurrently serving as presidents of asset management companies or are appointed from sponsor companies, ADR appoints executive officers from outside the ITOCHU Group and selects individuals other than the president of IRM to further enhance independence and objectivity. Consequently, ADR's executive officers, like its supervisory directors, hold an independent position with no conflicts of interest with either IRM or the ITOCHU Group. This structure enables ADR to make decisions from a position that is even more independent of IRM.

Appointment of Female Executives in Funds

ADR is promoting a diverse board composition with the aim of strengthening its governance structure. As of October 30, 2026, the fund has three board members, one of whom is a woman (33.3%).

Target	Progress
Percentage of female board members at the fund: **25**%	33.3% Female Board Members

Officer's compensation or remuneration

Officer's compensation or remuneration

The compensation for directors of ADR shall be a maximum of 1 million yen per month per executive director and 500,000 yen per month per supervisory director in accordance with the Articles of Incorporation of the Investment Corporation, and shall be determined by the Board of Directors as an amount deemed reasonable in light of general price trends, wage trends, and other factors.

Title	Name	Total amount of compensation during the 31st FP (thousand yen)	Total amount of compensation during the 32nd FP (thousand yen)
Executive Director	Wataru Higuchi	2,700	2,700
Supervisory Director	Satoru Kobayashi	1,800	1,800
Supervisory Director	Hikari Komine	1,200	1,800

・Hikari Komine, a member of the board of directors, assumed her position on October 27, 2025.
・The compensation paid to former Executive Director Aiko Kanayama, who stepped down on July 31, 2026, was 1.8 million yen for the 31st fiscal year and 1.5 million yen for the 32nd fiscal year.

Compensation for Independent Auditor

The remuneration for the independent accounting auditor shall be up to 20 million yen for each fiscal period to be audited, an amount to be determined by the Board of Directors.

Title	Name	Total amount of compensation during the 31st FP (thousand yen)	Total amount of compensation during the 32nd FP (thousand yen)
Independent Auditor	Deloitte Touche Tohmatsu LLC	16,500*1	16,500*2

*1 The remuneration paid to Tohmatsu Limited Liability Audit Corporation for the fiscal year ending January 2026 includes 1,500 thousand yen in remuneration for services other than those specified in Article 2, Paragraph 1 of the Certified Public Accountants Act. In addition, remuneration paid to entities belonging to the same network as Tohmatsu Limited Liability Audit Corporation for services other than those specified in Article 2, Paragraph 1 of the Certified Public Accountants Act totaled 4,377 thousand yen.
*2 The remuneration paid to Deloitte Touche Tohmatsu LLC for the fiscal year ending July 2026 includes 1,500 thousand yen in remuneration for services other than those specified in Article 2, Paragraph 1 of the Certified Public Accountants Act. In addition, remuneration paid to entities belonging to the same network as Deloitte Touche Tohmatsu LLC for services other than those specified in Article 2, Paragraph 1 of the Certified Public Accountants Act totaled 4,542 thousand yen.

Please refer to ADR's Asset Management Report for details on executive compensation, etc. Click here view ADR's Asset Management Report.

Governance Framework

IRM

Investment Trust Management Structure

Investment corporations are required to entrust their asset management operations to an asset management company that is a financial instruments business operator (investment management business).

ADR entrusts its asset management operations to IRM, which performs these operations under the organizational structure shown on the right. IRM's operations are divided among the Residence Division, Private Capital Division, Engineering Division, Finance and Accounting Division, General Affairs and Management Division, Internal Audit Office, and Compliance and Risk Management Department, with ADR's asset management handled primarily by the Residence Division.
IRM has also established the Compliance Committee as a body to deliberate on or resolve matters related to compliance and the compliance structure; the Investment Committee* to deliberate on and resolve matters related to investment management; and the Sustainability Promotion Committee to formulate sustainability policies and targets, develop strategic plans and manage risks related to climate change and natural capital, and review the results of relevant measures. For the roles of each body, please refer to the "Risk Management Structure" on p.43.

*IRM has three investment committees. The Investment Committee (ADR) deliberates on and makes decisions regarding investment management matters for ADR. The Investment Committee (ADP) performs the same functions for Advance Private Investment Corporation (ADP), while the Investment Committee (Entrusted Private Funds) handles investment management matters for entrusted private funds.

Outsourcing of Asset Management Operations

IRM

ITOCHU REIT Management Co., Ltd.

IRM Organizational Chart

Governance Framework

ADR IRM

Governance of Asset Management Companies

IRM has established a corporate governance framework by clearly defining our commitment to our fiduciary duty, setting up compliance and investment committees, and other means. The framework enables us to ensure risk management and compliance in our operations, fairly handle transactions involving conflicts of interest, and work toward improving and further enhancing our corporate governance.

Basic Policy on Customer-Oriented Business Conduct

IRM places the highest priority on faithfully managing the funds entrusted to us by investors and have established the Basic Policy on Customer-Oriented Business Conduct and publish the appropriate management of conflicts of interest transactions, clarification of fees, and other relevant matters on the website. Please refer here for the Basic Policy on Customer-Oriented Business Conduct on the IRM website (in Japanese).

Disclosure

In order to ensure disclosure transparency, in addition to statutory disclosures, ADR will disclose information it deems useful and valuable on timely bases in an easy-to-understand form. Specifically, ADR will actively disclose information on its website in addition to disclosing on the Tokyo Stock Exchanges disclosure system (TDnet).

Results of Investor Relations Activities

Target	IR activities	FY2025
Individual investors	Earnings briefings and seminars	2 times
Institutional investors	Earnings briefings	2 times
	IR meetings (Japan)	98 companies
	IR meetings (overseas)	38 companies

Sponsor Investment in Same Boat

ITOCHU Corporation, a sponsor of IRM, holds a portion of ADR's investment units, thereby aligning the interests of ADR's unitholders with those of ITOCHU Corporation and aiming to enhance unitholder value over the medium to long term.

Introduction of an investment unit ownership system for employees of asset management companies

We have introduced an investment unit ownership system for asset management company employees at Advance Residence Investment Corporation, a listed investment corporation, with the aim of promoting alignment of interests between unitholders and our directors and employees, thereby contributing to the long-term enhancement of unitholder value. Additionally, IRM executive compensation is partially linked to the achievement of ESG-related initiatives.

Supervision by the Board of Directors and other bodies

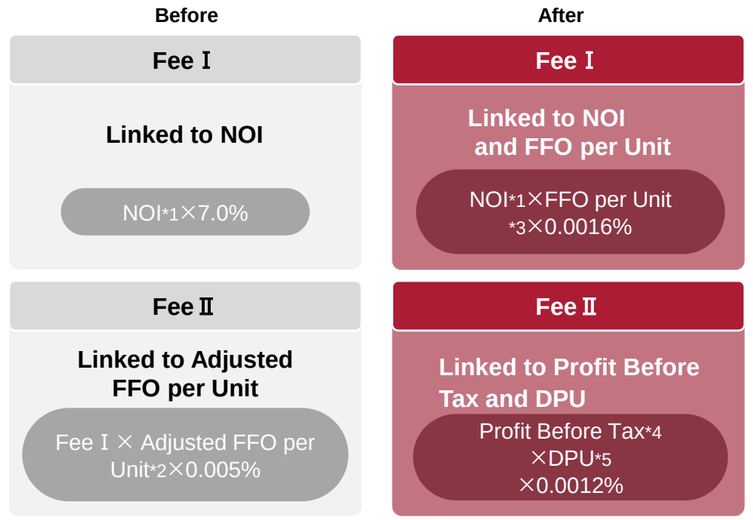

We regard compliance as one of our most important management issues, and we are addressing it as follows. The status of risk management and other information is reported to the Boards of Directors of IRM and each investment corporation as appropriate depending on the content. We formulate a compliance program each term to serve as a detailed plan of action for putting into practice the compliance manual, which is our code of conduct. The program is finalized after deliberation by the Compliance Committee and approval by the Board of Directors. The results of verification of the program's progress and other factors are reported to the Compliance Committee and the Board of Directors. In addition, the results of internal audits and the operational status of the whistleblowing system are also reported to the Compliance Committee and the Board of Directors. We also have a system in place in which the Compliance Committee and the Boards of Directors of IRM and each investment corporation can offer opinions and make other suggestions regarding the reported matters as needed to ensure that improvement efforts are effective. Furthermore, the Sustainability Promotion Committee identifies and evaluates climate-related risks and opportunities, formulates strategic plans for key challenges, and verifies the results of measures based on the Climate Change and Resilience Policy, after which it reports these matters to the CEO and to the Board of Directors.

Internal audit structure

IRM has an Internal Audit Office under the direct control of the president. Based on our Internal Audit Regulations, the Internal Audit Office conducts internal audits on the overall operations of all departments once a year to verify the status of their compliance with laws, regulations, the Articles of Incorporation, and internal regulations, as well as the procedures for executing duties and the validity of the work done. It also carries out unannounced inspections of information management and other operations several times a year. If problems are identified or requests for improvement are made in audits, the audited department is required to formulate a plan for improvement and have it approved by IRM's Board of Directors. Later, the Internal Audit Office conducts a follow-up audit and reports the progress made on improvement to the Board of Directors.

Management Fee Structure

The asset management fee shown on the table below paid from ADR to IRM took effect from February 1, 2026.

*1 NOI = the total of the Investment Corporation's real estate rental business income (if invested assets include equity interests in silent partnerships or real-estate-backed securities involving real estate, including the dividends relating to these invested assets or other forms of income) after subtracting the total of the real estate rental business expenses (excluding depreciation expenses and losses on the sale or retirement of non-current assets) for the relevant accounting term

*2 Adjusted FFO per Unit = the figure obtained by taking net income for the relevant accounting period before deduction of Fee II (prior to the change), adding depreciation, impairment losses, and amounts corresponding to losses on the sale of real estate and real-estate-backed securities, and subtracting gains on bargain purchase (negative goodwill) and amounts corresponding to gains on the sale of real estate and real-estate-backed securities, and then dividing that amount by the number of investment units issued as of the relevant fiscal period-end.

*3 FFO per Unit = The figure obtained by taking the net income for the relevant fiscal period before deducting Fee I (after the change) and Fee II (after the change), the amounts of non-deductible consumption tax and corporate income taxes, etc. related to the said asset management fees; adding depreciation expenses, impairment losses, amortization of goodwill, and amounts equivalent to losses on sales of real estate and real estate-related securities; subtracting amounts equivalent to negative goodwill gains and capital gains on sales of real estate and real estate-related securities; and dividing the result by the number of investment units outstanding as of the relevant fiscal closing date.

*4 Profit Before Tax = The figure obtained by taking the net income for the relevant fiscal period before deducting Fee I (after the change) and Fee II (after the change) , the amounts of non-deductible consumption tax and corporate income taxes, etc. related to the said asset management fees; adding impairment losses, amortization of goodwill, and amounts equivalent to losses on sales of real estate and real estate-related securities; subtracting amounts equivalent to negative goodwill gains and profits from sales of real estate and real estate-related securities.

*5 DPU = The figure obtained by taking the net income for the relevant fiscal period before deducting Fee I (after the change) and Fee II (after the change), the amounts of non-deductible consumption tax and corporate income taxes, etc. related to the said asset management fees; adding retained earnings brought forward from the previous period and reversal of voluntary reserves; subtracting the amount retained earnings carried forward to the next period and appropriation to voluntary reserves; and dividing the result by the number of investment units outstanding as of the relevant fiscal closing date.

Compliance

ADR IRM

IRM position compliance as one of our key management priorities and are promoting various initiatives.

Development of Internal Rules and Policies

At IRM, we have established the “Compliance Manual” as our code of conduct and have formulated the “Compliance Program” as a concrete action plan for its implementation. This program is formulated annually following deliberation by the Compliance Committee and approval by the Board of Directors, and progress toward its objectives is reported to the Compliance Committee and the Board of Directors.

Anti-corruption Policy

IRM recognizes that legal compliance is a given, and that we must ensure compliance to continue being an organization that is trusted by society. We have therefore established our Anti-Corruption Policy as part of our Compliance Manual. Our Anti-Corruption Policy stipulates that we will maintain sound relationships with our stakeholders and that we will not provide entertainment or gifts that may lead to the suspicion or distrust of society. As specific measures, IRM implements guidelines related to bribery and internal audits are conducted every year to confirm that expenses are not being misused every year. The ITOCHU Group has also established the ITOCHU Group Anti-Corruption Policy based on the Corporate Ethics Code of Conduct. It prohibits the provision of money and goods, entertainment, convenience and other profits to public officials and officers and employees of private entities, in Japan or overseas, for the purpose of gaining an illegal advantage.

01. We will not engage in or be complicit in any form of corruption, including embezzlement, fraud, money laundering, or the obstruction of justice.
02. We will not provide money, services, conveniences, or other benefits to civil servants or persons in similar positions in Japan or elsewhere for the purpose of obtaining illicit gains.
03. We will not provide money, services, convenience, or other benefits to the officers and employees of private-sector business partners for the purpose of obtaining illicit gains.
04. We will not request business partners and others to provide entertainment or gifts that go beyond personal benefits or common sense.

ITOCHU Group Policy

The ITOCHU Group ensures the implementation of compliance principles, that is, legal compliance, and recognizes that it must continue to be an organization with acceptable standards in a modern society. We have no tolerance for any gain obtained through illegal means. To address the risk of bribery and corruption, the ITOCHU Group has established rules that cover, among others, application and approval procedures and recording methods. These rules describe behaviors that are commonly found in scenarios where bribery or corruption take place and instruct the strict observance of those rules. The rules were established based on the Regulations Concerning the Prohibition of Giving Illicit Benefit, as well as four related guidelines about public officers, foreign public officers, business partners, and investments.

【 ITOCHU Group Anti-Corruption Policy 】

- No money, entertainment, gifts, or anything of value shall be given to any public or quasi public official inside or outside of Japan, to obtain illicit gains.
- No money, entertainment, gifts, or anything of value shall be given to any director, officer or employee of any private entity, to obtain illicit gains.

For more information on the ITOCHU Group Anti-Corruption Policy, please click here.

Whistleblowing system

IRM has set up whistleblowing contacts where all officers and employees can directly report misconduct (internal, at the parent company, and at an independent third-party). Under the whistleblowing system, IRM has established an appropriate handling mechanism, protect whistleblowers, and maintain the confidentiality of information. The system is designed to strengthen compliance management through the early detection and correction of improper acts, including bribery. The operational status of the whistleblowing system is reported to the Compliance Committee and the Board of Directors once a year if there is a case that should be reported. The Compliance Officer immediately investigates the facts when report or consultation concerning a fact that is the subject of a report is received, unless there is a valid reason not to investigate the subject matter. The results of the investigation are reported to the representative director, president & CEO and to the general manager of the General Affairs and Management Division, and corrective action and measures to prevent recurrence are decided through discussion. If an internal disciplinary action is deemed appropriate, IRM will impose an appropriate disciplinary action on the officers and employees involved in the subject case in accordance with the Company's internal rules such as the Employment Regulations. In addition, in compliance with the Whistleblower Protection Act, IRM prohibits disadvantageous treatment against whistleblowers.

Conducting education and compliance training for executives and employees

IRM continuously provides education and awareness-raising programs on compliance to ensure that each officer and employee understands the purpose of laws and regulations, social norms, business rules, and other standards and complies with them with an enhanced compliance mindset.

Coverage: All executives and employees (including contract employees and temporary employees)

Target	Progress (FY2025)
Conduct in-house compliance training, achieve 100% participation rate	Conducted in-house compliance training and confirmation test: 100%

*As of the end of March 2026

In addition, we hold compliance training sessions several times a year, including company-wide training for all executives and employees (including contract and temporary staff), orientation training for new hires, and department- and rank-specific training. To date, we have promptly addressed topics of high social importance—such as “compliance with laws and regulations,” “the internal whistleblower system,” and “information management”—and are continuously working to enhance executives’ and employees’ compliance knowledge and foster a culture of compliance.

Initiatives	Details
General training	In FY2025, we offered the following series of training sessions to all officers and employees (including temporary employees and others in addition to full-time employees): Information and personal information management systems, Dealing with anti-social forces, and Insider trading. We also conducted exams on compliance.
Training at the time of hire	In FY2025, for new hires (including mid-career hires, dispatched employees, and others), we provide training and review exams over a total of nine sessions on matters that they need to understand for their work at IRM.
Compliance training by ITOCHU Corporation	As part of group compliance, ITOCHU Corporation conducts on-site compliance training at IRM once a year, using actual compliance incidents of group companies as a part of the teaching materials. The aim is to raise compliance awareness and prevent compliance incidents including bribery from occurring.
Others	Compliance-related information (including matters linked to preventing corruption) such as internal rules and regulations, the revision of laws and regulations, and compliance incidents and efforts at other companies is provided as appropriate.

Case in IRM

- In FY2025 (April 2025 to March 2026), there were no incidents of compliance violations disciplinary action based on our Employment Regulations or Board of Directors Regulations.
- There have been no incidents of violations of our Anti-corruption Policy, nor were any officers or employees disciplined or dismissed for this reason.
- IRM has never paid any fines or settlements related to corruption.
- No payments of fines or settlements have been identified as ESG issues in our audited accounts.
- IRM complies with the Political Funds Control Act, the Public Offices Election Act, and other relevant laws and regulations, and has never paid any political contributions.

Risk Management

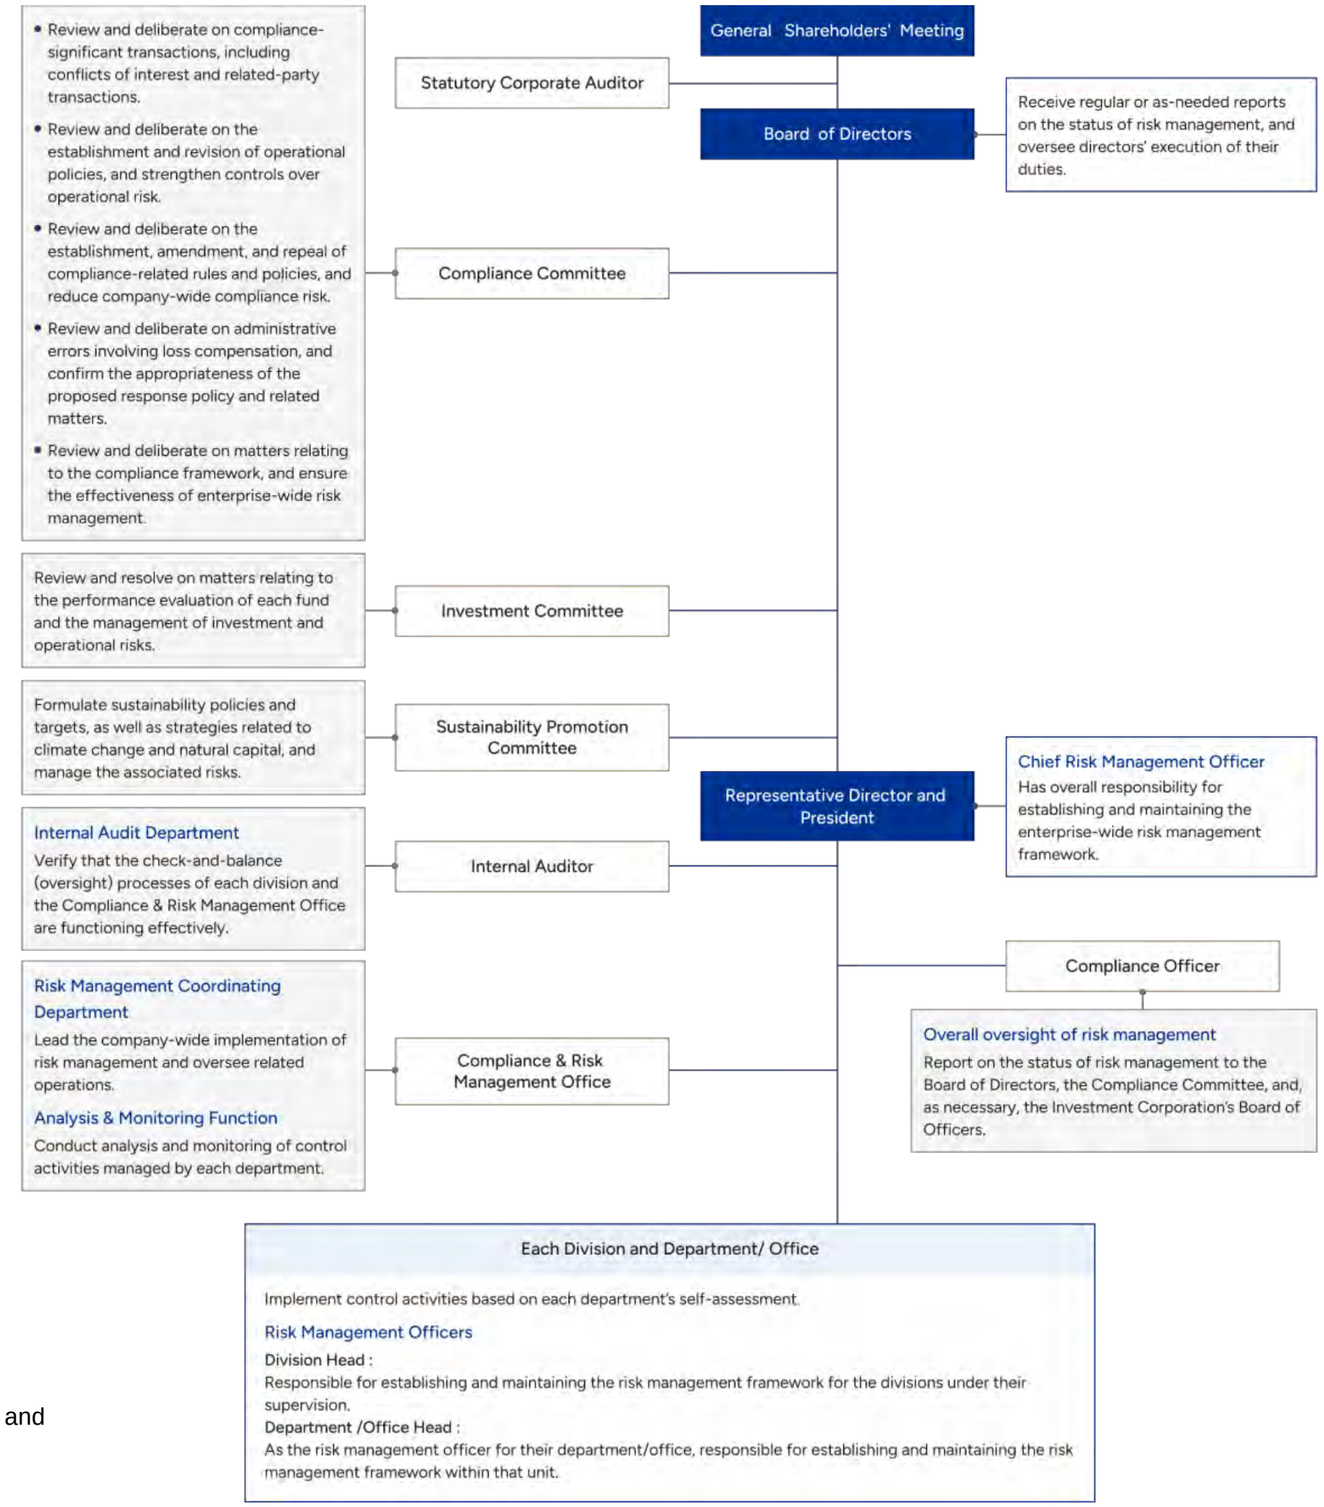

IRM

We position risk management as a foundation supporting business continuity and operational stability, and we work to reduce risks across the Company and strengthen our ability to respond.

Risk Management Framework

We have established internal rules titled the “Risk Management Regulations,” which clearly set out our basic approach to risk management and internal control framework, with the aim of contributing to appropriate business operations and ensuring sound management.
Under this regulations, the President and Representative Director, who is also the Chief Executive Officer (CEO), is designated as the person with overall responsibility for risk management, and each department/division head is designated as the person responsible for risk management within their respective area. Our risk management is based on control management conducted by each business unit in line with its own self-assessments. The Compliance & Risk Management Office is designated as the analysis and monitoring function, and the Internal Audit Office as the internal audit function. The Internal Audit Office confirms that the checks-and-balances processes of each business unit and the Compliance & Risk Management Office are functioning effectively.
In addition, the Compliance Officer oversees risk management overall, and each committee is involved in risk management within its area of expertise to ensure effectiveness and provide oversight.
For details on each specific role, please refer to the “Risk Management Organization Chart” shown on the right.

Risk Management Organizational Chart

Conducting Risk Assessments

Each year, IRM conducts a company-wide identification of risks surrounding the Company. Following discussions among management, including the President and Representative Director, we select the items that require focused attention and response, and report them—together with our response policies—to the Compliance Committee and the Board of Directors.
As the function responsible for overseeing risk management, the Compliance & Risk Management Office works in cooperation with the Compliance Officer and the Internal Audit Office to regularly monitor the status of control activities related to risk management. It regularly reports the results to management, the Compliance Committee, and the Board of Directors, and at the end of each fiscal year it also conducts an impact assessment and reports the results in the same manner.
Based on these reports, the Compliance Committee and the Board of Directors discuss response policies and areas for improvement regarding key risks for the following fiscal year and beyond.

Dealing with Antisocial Forces

IRM has established a basic policy regarding antisocial forces and takes a resolute stance against antisocial forces that threaten the order and safety of civil society. We sever all ties with such groups and strive to ensure the integrity and safety of our business operations.
For more details, please visit this page (In Japanese).

Risk Management

IRM

Contingency Standards

IRM has established Contingency Standards to establish a response framework that minimizes operational damage and ensures business continuity in the event of a disaster* affecting IRM's officers and employees or the operations IRM carries out as an asset manager (including concurrent businesses under the Financial Instruments and Exchange Act).

*Under the Contingency Standards, a disaster refers to a phenomenon caused by changes in natural phenomena, human-induced causes, or other causes, that results or may result in serious damage to IRM's operations and requires action.

Disasters Covered by the Contingency Standards

- Disasters affecting properties held by investment corporations and private funds whose asset management is entrusted to IRM
- Disasters affecting IRM's officers, employees, etc.
- Disasters affecting the building that IRM occupies and our premises
- Disasters affecting our facilities, systems, etc. that are necessary for IRM to operate its business
- Other disasters causing serious damage to IRM's operations

Disasters that cause or are likely to cause particularly serious damage and require an urgent, organized response through the establishment of an emergency response headquarters are defined as "disasters requiring company-wide response."

In the event of a disaster, we place the highest priority on the lives and physical safety of officers, employees, and related parties, and swiftly confirm safety, gather information, and provide information to related parties. In normal times, IRM maintains a fire prevention plan, a self-defense fire brigade, an emergency contact network, disaster supplies, and other measures, and clearly defines roles, such as initial firefighting, evacuation guidance, first aid, and communication with relevant organizations.

Once the emergency response headquarters is established, the secretariat and response teams are convened and share responsibilities, including confirming the safety of officers and employees, restoring systems, procuring supplies, providing first aid, communicating with relevant organizations, and assessing the condition of and restoring investment properties. Furthermore, when certain conditions are met, the Representative Director, President & CEO activates the BCP to ensure business continuity and recovery, and we will prioritize operations essential to business continuity, such as securing alternative office space, restoring systems, and protecting managed assets.

The Sustainability Promotion Department oversees the development of the response structure, disaster response, and recovery activities including the BCP, as set forth in these Standards and related manuals. Every year, IRM conducts drills followed by review sessions, identifies improvement measures based on the PDCA cycle in light of the results, and continuously develops and reviews its disaster response structure to enhance its effectiveness.

Basic Policy in the Event of a Disaster

01. We shall, in all circumstances, place the highest priority on the lives and physical safety of our officers, employees, and other personnel, as well as those of our business partners.
02. We shall strive to establish a system for promptly verifying and gathering information.
03. We shall provide the collected information to stakeholders promptly and accurately.

Obtaining Resilience Certification

Resilience Certification (Certification of Organizations Contributing to National Resilience) is a system established by the Cabinet Office's National Resilience Promotion Office. Based on the "Guidelines for the Certification of Organizations Contributing to National Resilience," the Resilience Japan Promotion Council, a general incorporated association, certifies companies that are actively engaged in business continuity initiatives as "Organizations Contributing to National Resilience." IRM has been continuously certified (renewed) since 2018 in recognition of its proactive efforts in business continuity.

BCP Countermeasures

IRM conducts annual BCP training as risk management for sustainable business growth.

Target	Progress（FY2025）
Conduct annual BCP training	1 implementation

Conducting BCP drills assuming large-scale disasters

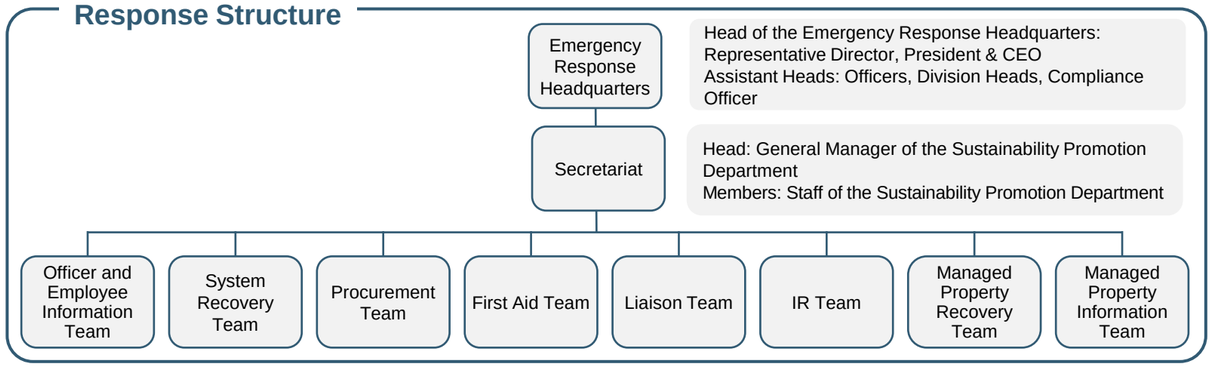

To enhance the effectiveness of our BCP, we strive to strengthen our emergency response capabilities through regular drills. In FY2025, we conducted a BCP drill simulating a major earthquake, during which each team within the emergency response headquarters identified and reviewed potential challenges. The primary objectives of this drill were to confirm the roles of the emergency response headquarters during an emergency, improve our response capabilities, and identify new challenges. Through such drills, we are further strengthening our ability to respond swiftly and appropriately in emergencies and striving to ensure business continuity.

The specific contents of training are as follows:

(1) Each team prepares an "issue review sheet" assuming the occurrence of a major earthquake
(2) Each team reports to the head and assistant heads of the emergency response headquarters
(3) The emergency response headquarters reviews the reports and provides feedback
(4) After the drill, the teams review their responses and any shortcomings in manuals and equipment, and revise the BCP, disaster response manuals, emergency supplies, remote work environments, etc. as necessary

Through these drills, IRM strives to reinforce its capabilities for prompt and precise emergency response and to ensure business continuity.

Response Structure

Ascertainment of someone's safety

At IRM, we have implemented an online system to confirm the safety of our executives and employees in the event of a disaster. In addition, we have established various communication channels and methods, and we conduct safety confirmation drills every month.

Securing Power Supply in the Event of a Disaster

We stockpile portable power stations in the office to secure power in the event of a disaster. In addition, to prepare for disasters that may strike while employees are at home—whether working remotely, on holidays, or at night—we lend all employees solar-powered portable batteries to keep at home.

Risk Management

IRM

Information Security

IRM shall take initiatives as follows in order to realize appropriate protection for all information assets of the Company to continuously and stably operate as an asset management company of a real estate investment corporation.

Basic Policy Regarding Information Security

1 Responsibility of management

The Company will endeavor to properly protect information assets in a systematic and continuous manner under initiative of management.

2 Establishment of an internal system

The Company shall set up an information management supervisory department to properly protect information assets. In addition, the internal audit department will appropriately conduct internal audits concerning information assets and report any inappropriate events to the Board of Directors as necessary.

3 Efforts by employees

Information assets are classified according to their degrees of importance and confidentiality, and we will work to protect information assets appropriately through a mechanism that can only be operated appropriately and based on necessity according to its purpose.

4 Compliance with laws, regulations and contractual requirements

The Company complies with laws, regulations, restrictions, norms and contractual obligations related to the protection of information assets.

5 Handling of violations and accidents

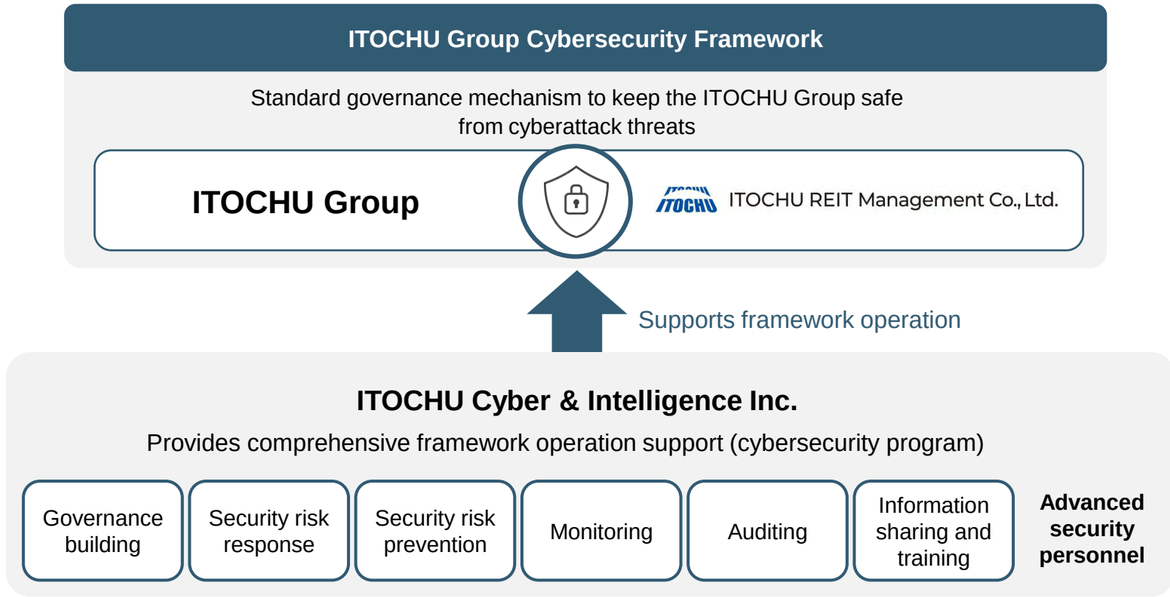

When outsourcing operations related to information assets, the Company will implement safety measures against various threats, prepare for recovery measures in case of failure, and establish a structure for reporting. The Company will also take appropriate measures against legal violations, contract violations, and accidents related to the protection of information assets and prevent any recurrence.

6 Cyber Security Measures

The Company will implement risk assessments using ITOCHU Group resources, and will take necessary measures, as well as implement preventative measures such as the introduction of anti-virus software, firewall settings, and regular system updates. In addition, we will conduct regular security training to improve security awareness and knowledge. In the event of a cyber security incident, the response will be led by management in order to minimize the impact.

ITOCHU Cybersecurity Framework

As a member of the ITOCHU Group, IRM complies with the ITOCHU Cybersecurity Framework, a governance mechanism established by ITOCHU Corporation to protect the Group from cybersecurity threats. IRM also works with ITOCHU Cyber & Intelligence Inc. (ICI), which supports the operation of the Framework, as needed to keep abreast of the latest threat trends. The Framework enables the entire Group, rather than individual companies alone, to respond quickly to emergencies such as cyberattacks.

ITOCHU Cyber & Intelligence Inc. is a cybersecurity company wholly owned by ITOCHU Corporation that serves the ITOCHU Group.

Information Security Management Structure

Information security at IRM is managed by the ICT promotion team of the Corporate Management Department in the General Affairs and Management Division. In addition, IRM has two Certified Information Systems Auditor (CISA) holders on staff. (As of October 30, 2026)

Preparing for Cyberattacks

IRM routinely shares information on security incidents at other companies internally to raise awareness among its officers and employees. In addition, to verify that its cybersecurity measures are effective and minimize damage, IRM regularly conducts spear-phishing email response drills for all officers and employees, as well as penetration tests and recovery tests.

Green Finance

ADR has established Green Finance Framework in 2019 and is implementing green finance with the aim of further promote ESG considerations in its asset management and enhance our financing base by broadening our investor universe, especially for investors interested in ESG investment.

Green Finance

ADR

Green finance refers to financing (i.e., issuance of bonds (green bonds) and/or procurement of loans (green loans)) for which use of proceeds is limited to environmentally-conscious projects. IRM intends to use the proceeds from green financing for implementing sustainability-promoting initiatives in line with its Basic Sustainability Policy, and will proactively recognize the required level of environmental, social, and governance (ESG) practices through a dialogue with investors and apply such knowledge to its asset management strategy.

Outline of Green Finance Framework

Green Finance Framework Evaluation

ADR received the “Green 1 (F)” rating, the highest rating in the JCR Green Finance Framework Evaluation by the Japan Credit Rating Agency, Ltd. (JCR), which assesses if a framework is in line with the requirements of the Green Bond Principles of the International Capital Market Association, the Green Bond Guidelines of the Ministry of the Environment of Japan, and the Green Loan Principles of the Loan Market Association and the Asia Pacific Loan Market Association.

*Please visit the Green 1 (F)” rating in the JCR Green Finance Framework Evaluation for details.

Purpose of Funds procured through Green Finance

Funds procured through Green Bonds or Green Loans are applied to the acquisition of the following Eligible Green Assets, refinancing of those funds or funding or refinancing renovation work.

Eligible Green Assets

● Eligible Criteria 1

Properties that have already acquired or are planning to acquire one of the following certifications from a third-party certification organization

①3, 4, or 5 stars in DBJ Green Building Certification
②B+, A, or S rank in CASBEE building and real estate certification (excluding local government version)
③ BELS (2016 criteria): 3, 4, or 5 stars (excluding existing non-compliant buildings)
BELS (2024 criteria):
Non-residential properties: Level 4, Level 5, or Level 6*1
Residential properties without renewable energy equipment: Level 3 or Level 4*2
Residential properties with renewable energy equipment: Level 3, Level 4, Level 5, or Level 6*2

*1 For new acquisitions of existing buildings built before 2016, the level must be 3 or higher and the building must not be non-compliant.
*2 For new acquisitions of existing buildings built before 2016, the level must be 2 or higher regardless of whether or not renewable energy is used.

● Eligible Criteria 2

Refurbishment work (with the aim of making beneficial improvements in terms of the environment, such as energy efficiency and water consumption performance) on real estate managed by ADR (with the expected effect of reducing usage by 30% compared to conventional levels).

Green Finance

ADR

Management of financing

Appropriate internal management will be carried out for funds procured through green finance and unallocated funds. If there are unallocated funds, they will be managed as cash or cash equivalents until they are allocated.

Even in cases where the Green Eligible Assets for which the funds raised by ADR have been allocated are sold, or where the Green Eligible Assets in question no longer meet the eligibility criteria for some reason, the total amount of the Acquisition Price of the properties that meet the eligibility criteria 1 and the total amount of the expenditure for the construction and renovation projects that meet the eligibility criteria 2, multiplied by the total assets LTV at the end of the most recent fiscal year, will be calculated as the “Green Eligible Debt Limit”, and the balance of the Green Finance will be managed so that it does not exceed the Green Eligible Debt Limit. multiplied by the LTV (total assets base) at the end of the most recent fiscal period, and the balance of green finance will be managed so that it does not exceed the maximum amount of green-qualified liabilities.

As of 28 August , 2026 (million yen)

A. Total Acquisition Price (Qualifying Criterion 1)	151,425
B. Total expenditure on facility renovation work (Qualifying Criteria 2)	0
C. Total Eligible Green Assets（A+B)	151,425
D. LTV*	49.8%
E. Maximum amount of Green Eligible Liabilities（C×D）	75,389

*The LTV is the ratio as of the end of July 2026.

Impact Reporting

The status of funds raised with green financing is updated annually and uploaded on the websites of ADR. Reporting on the effectiveness of environmental improvement (impact reporting) of green eligible assets is also uploaded on the ADR website on an annual basis.

*Waste recycling rate: Amount recycled / Total waste generated × 100

Aggregation Scope and Calculation Methods

1. Aggregation period
results are updated on an annual basis.
From FY2023: from January to December
Until FY2022: from April to March
* The aggregation period was revised in FY2023 and changed to a calendar year basis.

2. Scope of Aggregation
Only properties held for the full fiscal year are included in the scope of aggregation, excluding properties that were traded during the fiscal year.
Energy Consumption and Water Usage：As a general rule, the common areas managed by ADR will be included in the scope of aggregation.
Waste: As a general rule, the aggregation covers the amount of waste generated from restoration work in exclusive areas where data can be obtained.

3. Calculation method
・Strata-titled property: Calculate the ADR share ratio by multiplying the relevant data.
・Intensity: Total amount of each data / Target floor area (m²)
* Past performance data may be revised retroactively in accordance with the revision of calculation methods, etc.
*Figures are rounded to the nearest indicated digit.

Independent assurance statement (limited assurance)

Environmental performance data for FY2025, with a few exceptions, has been obtained from Sustainability Accounting Co., Ltd. as Independent assurance statement (limited assurance) in accordance with the International Standard for Assurance Engagements ISAE 3000 and ISAE 3410.

The figures in the assurance report include data on properties acquired and sold during the period, and therefore the figures differ from the actual figures shown on the left.

Employee Health and Safety

Category	FY2018	FY2019	FY2020	FY2021	FY2022	FY2023	FY2024	FY2025
Annual medical exam taken (%)	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Occupational accident frequency rate*3 (%)	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0

Coverage: Full-time employees and contract employees

*1 Number of employees as of March 31. Information is before the asset management company merger on June 1, 2022, and therefore does not include the number of employees of the former ITOCHU REIT Management Co., Ltd.
*2 Turnover is calculated by dividing the number of employees that left IRM during the fiscal year by the number of employees as of March 31.
Additionally, there were no workforce reductions due to corporate mergers or acquisitions involving restructuring, or for other reasons during the fiscal years listed above. Also, and the same applies to the merger between asset management companies on June 1, 2022.
*3 Occupational accident frequency rate is calculated as follows:
number of fatalities and injuries due to accidents ÷ cumulative work hours x 1 million hours.
For details, please refer to the following Ministry of Health, Labor and Welfare site (in Japanese).
*4 If acquired across fiscal years, it is calculated as acquired in the fiscal year in which the start date of the leave falls.
*5 As part of our efforts to enhance work-life balance, we are expanding the use of the following.
～FY2022 For Volunteers
FY2023 In addition to the above, childcare (from 4/1) and health care related (from 3/1) were added.

*As of March 31, 2026. Includes those who have passed the examinations and are not yet registered.

Human Resource Data

IRM

Professional development and training programs

Category	Details
New officer training	Responsibility and role recognition required of officers
ESG training for executives	Training for executives to deepen their knowledge on ESG issues
Manager training	Line Care Training（To promote primary prevention of mental health issues, acquire skills to understand the mechanisms behind mental health problems and prevent them, and understand key points for creating a healthy workplace.）
	Multifaceted Evaluation Training（The purpose of this tiered training program is to maximize the performance of each organization by identifying strengths and challenges through multifaceted evaluations, reviewing one's own actions, and formulating development plans.）
Training for new managers	Participants acquire knowledge and skills essential for leaders, such as management, trust building, team building, human resource development, and labor management. Utilizing an external organization, participants practice at their workplaces, reflect on their experiences, and receive advice from external lecturers to enhance their practical skills.
Future manager training	Management Training (Aiming to help participants understand their own strengths and weaknesses, as well as the management skills required of leaders, and to improve their own management skills and their ability to interact with supervisors and subordinates.)
Next generation business leader training	Leadership training for mid-level employees to develop business acumen. Recognize the roles required of you as a core member of the organization, based on your strengths and weaknesses.
Team building training	Reassess the roles expected of you as a team leader, learn key points for building a better team, and enhance your perspective and awareness regarding workplace teams.
Fourth-year training	Training for fourth-year employees A training program designed to help young employees transition to mid-career positions by learning how to set goals, identify core issues, and design their own ideal career paths.
Second-year training	Training for Second-year employees Training that encourages participants to think independently about how they can contribute to their colleagues and workplace with a broad perspective. Participants learn to collaborate smoothly with people in different positions and improve the overall quality of their work.
Instructor training	Training for appointees as instructors of new hires
New hire training	Basic training for new graduate hires (ITOCHU Group)
Bookkeeping training	Training on basic bookkeeping knowledge for new hires
Training on office machinery	Training for new hires and some junior employees
Compliance training and exams	Comprehensive compliance training
Crisis management public relations training	Training to strengthen media response skills in the event of a crisis.
Sustainability training	Company-wide training for all employees aimed at raising awareness of sustainability among staff
Life plan training	Life planning and career design training for employees aged 50 and over. Veteran employees take stock of their careers and skills and use their abilities to further their careers and plan for the future.
Cafeteria-style training	Training provided by the ITOCHU Group. Participants have a choice of approx. 200 courses.
Subscription-based training	A video learning platform offering specialized, curated business programs accessible anytime, anywhere. Learn at your own pace.
Company-wide online health program	To promote health management and mental well-being, we are conducting online stretching and yoga sessions with the aim of helping participants recognize stress, experience various coping methods, and find stress relief techniques that suit them.

Category	Details
Mentor system	System of support by senior employees (expenses borne by company)
Career path reporting system	System for employees to indicate career path intentions
Support for certification	System of financial aid toward the costs of acquiring certification to improve business execution skills and gain expertise
Language learning support	System of financial aid for part of the costs of language

*The above list includes both regular training programs and one-time training sessions conducted within a single fiscal year.
