Simple Auto-Battle RPG for Smartphones 'Ragnarok: Adventures' Release in Japan Confirmed! Pre-registration Now Open!

GungHo Online Entertainment, Inc. (Headquarters: Chiyoda-ku, Tokyo; Representative Director, President and CEO: Kazuya Sakai; hereinafter "GungHo") today announced that it will launch the smartphone auto-battle RPG "Ragnarok: Adventures" in Japan

"Ragnarok: Adventures" (commonly known as "Ragu-Ado") is an auto-battle RPG based on the "Ragnarok Online" (commonly known as "RO") series, which is popular with many users around the world. It is distributed overseas under titles such as "Ragnarok Idle Adventure Plus." Pre-registration for the service in Japan has begun today.

The traditional "Ragnarok" series titles released in Japan have primarily been MMORPGs featuring immersive gameplay on horizontal screens and real-time communication. In contrast, the greatest features of this title, "Ragu-Ado," are its alignment with modern lifestyles and the diverse needs of game users, including a "vertical screen that can be easily played with one hand at any time" and a "casual idle system where characters continue to grow even when the game is not running." As such, it serves as a new "gateway to RO," not only for fans of the traditional "RO" series but also for light users who want to enjoy games in their spare time.

While it is casual to play, it retains the deep RPG elements unique to "RO," such as the series' signature pop characters, diverse jobs and skills, and highly customizable character development through stat allocation. Furthermore, the game is packed with content that can be enjoyed in both solo and multiplayer modes, including "strategic battles" where you form the optimal team by combining equipment and skills with various NPC companions, "guild content" where you challenge challenges in cooperation with other players, and "town building" in your own town.

We at GungHo will strive to create high-quality game contents that can be fully enjoyed by game users around the world and expand our business globally, under the philosophy of "pursuing business operations to take on challenges and create new products."
