Notice Regarding Execution of Business Alliance with NAPIR Co., Ltd. (Alliance to Build an Energy Platform Centered on EMS)

Remixpoint, inc. (the "Company") hereby announces that its Board of Directors, at a meeting held on August 17, 2026, resolved to enter into a business alliance (hereinafter the "Business Alliance") with NAPIR Co., Ltd. (Head office: Chuo-ku, Tokyo; Representative Director: Zhiwei Wan; hereinafter "NAPIR"), with a view toward a potential capital alliance in the future. The details are as follows.

1. Reason for the business alliance

The Company Group is developing a comprehensive energy business, which includes the electric power retail business, the grid-scale battery storage business, procurement of FIP power sources, and the sale of customer battery storage. Currently, the Company is expanding its business foundation related to numerous distributed energy resources, including a sales pipeline of approximately 1,000 low-voltage grid-scale battery storage systems currently under application. To translate this business foundation into sustainable revenue growth, the Company believes it is vital to construct a business model that generates continuous revenue through post-installation remote control, operations and maintenance (O&M), and market trading, in addition to revenue generated from equipment sales and self-owned assets. The Company Group positions its evolution into an "energy platformer" that comprehensively provides these functions as a key growth strategy.

NAPIR possesses advanced technological capabilities in the development of Energy Management Systems (EMS) and has previously engaged in the joint development of EMS for battery storage with the Company Group. As a result of this collaboration, the high-voltage EMS provided by the Company has acquired JC-STAR certification, and the Company Group utilizes it as the system foundation for its grid-scale battery storage and customer battery storage businesses.

The Business Alliance aims to further develop this joint development relationship and accelerate the building of an energy platform that comprehensively supports the process from battery storage installation to operations and market trading. This will be achieved by integrating cloud infrastructure, remote control, market operations, and O&M functions, with EMS as the core.

Initially, through the Business Alliance, the companies aim to quickly generate and materialize business synergies. Furthermore, to build a stronger partnership, the two companies will proceed with discussions with a view toward a potential capital alliance in the future.

2. Details of the business alliance

(1) The high-voltage EMS jointly developed by the Company and NAPIR will be positioned as the core platform, and its installation and rollout to grid-scale battery storage and customer battery storage will be promoted.

(2) By combining the Company Group's capabilities in design, construction, and sales with NAPIR's EMS, cloud, and remote-control technologies, the companies aim to build a system integration (SI) service that comprehensively provides services from battery storage installation to operations, maintenance, and market trading.

(3) The companies will promote the joint development of low-voltage and home-use EMS, aiming to achieve the integrated management of distributed energy resources and future expansion into market operations.

3. Overview of the alliance partner (As of March 31, 2026)

(1) Name	NAPIR Co., Ltd.	
(2) Location	2-15-2 Ginza, Chuo-ku, Tokyo	
(3) Title and name of representative	Zhiwei Wan, Representative Director	
(4) Description of business	- System engineering service business - System contract development service business - Cloud-based development, provision, maintenance, and operation service business - Energy management cloud service business	
(5) Share capital	40 million yen	
(6) Date of establishment	January 18, 2017	
(7) Number of issued shares	500 shares	
(8) Fiscal year-end	March 31	
(9) Major shareholder and shareholding ratio	Zhiwei Wan	100%
(10) Relationship between the listed company and the said company	Capital relationship	None
	Personnel relationship	None
	Business relationship	The company engages in the joint development of EMS for battery storage with the Company Group.
	Status as a related party	None
(11) Operating results and financial position of the said company for the last three years	Regarding the operating results and financial position for the last three years, as the said company is an unlisted company that does not publicly disclose its financial information, and as these details include confidential business information, they are undisclosed at the request of the said company.	

4. Schedule

(1) Date of Board of Directors' resolution	August 17, 2026
(2) Execution date of the business alliance agreement	August 17, 2026
(3) Commencement date of the Business Alliance	August 17, 2026

5. Future outlook

Through the Business Alliance, the Company Group will accelerate the building of an energy platform that integrates the sale, holding, control, and operation of battery storage, centered on EMS technology. By utilizing NAPIR's EMS technology, cloud architecture design, and operational know-how, the Company aims to expand continuous revenue opportunities through post-installation system usage and operation support, in addition to flow-type revenue such as equipment sales. By doing so, the Company aims to strengthen its earnings base by accumulating recurring revenue.

The impact of the Business Alliance on the Company's consolidated financial results for the fiscal year ending March 31, 2027, is expected to be minor. However, over the medium to long term, the Company believes that expanding battery storage projects utilizing EMS, advancing SI functions, and rolling out solutions for external operators will contribute to strengthening the earnings base and enhancing corporate value.

Going forward, utilizing the jointly developed EMS as a foundation, the Company will advance its rollout to grid-scale battery storage, customer battery storage, and distributed energy resources, thereby striving to expand the energy platform business.

If any matters arise that require disclosure, the Company will promptly announce them.
