2. Reasons for the Revisions

Net sales are expected to exceed the previous forecast, due to the progressively weaker yen and stronger-than-expected market conditions for overseas products. Operating income is expected to exceed the previous forecast, mainly due to an increase in net sales and improved inventory fluctuations. Ordinary income is expected to exceed the previous forecast, due to the improvement in operating income as well as improvements in non-operating income resulting from improved foreign exchange gains and losses associated with the progressively weaker yen. Net income attributable to owners of parent is expected to exceed the previous forecast, mainly due to the improvement in ordinary income as well as an improvement in extraordinary income resulting from gains on the sale of strategic shareholdings.
